FARM AND HOUSEHOLD ITEMS

We invite communications from all personsished are interested in matters property belonging to this department.

The Proper Selection of Food.

There is no country where there is so much dyspepsia as in America because our people pay but little attention to food and cat too much meat for the execise they take. If one has mental labor fish every second day at least is requisite. Soup sets the glands at work and prepares the stomach for the more important function of digestion and therefore should be taken at dinner every day. Beef broth is to the old what milk is to the young. Cookery properly attended to keeps man in health. If the stomach is out of order, the brain is affected.

We should eat more fruits, vegetables, soup and fish. Good and well prepared food beautifies the physique the same as a good and well directed education beautifies the mind. Wrinkles are produced by the want of variety of food. The man who does not use his brain to select and prepare his food is not above the brutes which take it in the raw state .- Home and Health.

### Cure for Lock-Jaw.

A correspondent of the Scientific' American recommends turpentine as a care for lock-jaw. He says : Let any one who has an attack of lock-jaw take a small quantity of turpentine warm it and pour it on the wound no matter where it is or of what nature it is, and relief will follow in less than one minute. Nothing better can be applied to a severe cut or bruise than cold turpentine; if will give certain relief almost instantly. Turpentine is also a sovereign remedy for croup. Saturate a piece of flannel with it and spread the flannel on the throat and chest and in very severe cases three to five drops on a lump of sugar may be taken inwardly. Every family should have a bottle on hand. The remedy is simple and can be easily tested. In all serious cases an application should be made under medical advice.

127" A farmer writes to one of our Agricultural exchanges : "When quite a boy I had learned that grains taken from different parts of the cob developed and ripened differently. I experimented by planting a few grains from the extreme ends. The hills planted from the butt ripened about a month before those from the top. Now these are reasons why the whole ear should not be planted, unless to modify the time of ripening. Corn to replant should be taken from the butt of the ear. All observant farmers know that they should have late pollen for late issues of silk that is produced by "late rains," which "fills out" our com crop. The corn from the point of the cob will do the job."

137" An exchange says that it is generally considered that the principle of rotation in crops is a modern discovery and yet nature has worked in this way from the commencement. Proofs of this are seen in the vegetable remains of rocks and coal-beds and even now we see the same principle at work when ever we cut down a pine woods which if allowed to grow in timber again is replaced with decidous trees as oaks beeches maples, &c., while a beech or maple, or oak wood cut off will be replaced with pines. Here is undoubtedly rotation in crops, and we merely follow nature when we adopt the principle in our agricultural operations.

137" A bar of iron which is worth but \$5, when manufactured into horse shoes is worth \$10, that same bar of iron manufactured into nails is worth \$55, and manufactured into pen-knife blades it is worth \$29,840, and when manufactured into watch springs, it is increased in value to the enormous sum of \$250,000, and all this increase in value is the result of labor alone. If you want this work done in America, protect the labor by a tariff. If you desire to starve your own laborers for the benefit of of the European millionaires, not the laborers, for they do not pay their laborers, abolish protection.

#### To Paper Whitewashed Walls.

Dissolve half a pound of glue, to which add flour, after having stirred out all the humps in cold water. Make rather a thin paste. Apply this hot to the walls and let it dry. Then put on your paper with paste in which there is no glue-put it on cold, for hot paste will soak the paper. Try this, and I'll warrant you will be better satisfied than with scraping the walls.

27

tor The importance of thoroughly seasouing lumber is made apparent to the consumer when it is known that a piece of green lumber weighing one hundred pounds weighs only about thirty pounds when dry; showing that it contains seventy pounds of sap and only thirty pounds of fibre wood.

137" To Glaze Linen add a tea-spoonful of salt, and one of finely scraped white soap to a pint of starch.
