FARM AND HOUSEHOLD ITEMS

We invite communications from all persons the are interested in matters properly belonging to this department.

Curious Instincts of the Bee.

Honey bees are governed by instinct, and not by art. They never deviate from the course they were created in. The first comb they ever built was as perfect as at the present day; no art has improved the shape or size. Each bee does its part of the labor in gathering in the stores and nursing the young; and I have noticed for several years past, the mode of gathering pollen or bee bread. It is thus :- When a bee goes out after food, it alights on some kind of flower and gathers a part of its load; then goes to another of the same kind, and perhaps a third, to obtain a load. Another bee goes out, and it alights on another kind of flower, it keeps to that kind tillet gets a load. But how is this known? You go to the hive and watch as they come in; some have yellow pollen on their legs; others have light color: others have dark; but no bee has two colors on his legs. If you see any, you will see more than I have, for I never did; and I have supposed that they stored it in different cells for a change of food. The other day, in overhauling a hive, I broke out a new piece of comb and found the different colors in different cells, which confirmed my belief, for I suppose they like a change of food as well as humans. Another curiosity is their coming out and alighting before going off; for among the hundreds that I had hived I never had one swarm leave direct from the hive. Another curious thing is their rearing the males and nursing them tenderly, and after they become useless they destroy them. But instinct has directed them to do it. Another curious thing is that when they get to be numerous, that the motherbee should call out a part of the brood to go with her, and leave the others to take care of the young. Why not call them all out to go with her? Because instinct has ordered it otherwise. Certain ones go out with her, while others are coming in with stores for future use. A certain part of them don't seem to have any inclination to follow the mother-bee, nor do they mourn her loss, for another is provided .- Field and

#### Plowing Twice for Wheat.

A correspondent of the Cincinnati Gacette writes: "If any one will break his ground deeply and thoroughly two or three times during the Spring and Summer, the extra amount of wheat per acre will pay for plowing, and leave a handsome profit besides. I have tested this practice several times, with the most satisfactory results. In 1869, I had a field of sixteen acres of like fertility. I expected to plant half the field in corn, but for some reason did not. In the half that had been plowed for corn after the ground had been broke, the weeds grew more rapidly. Consequently, I broke it again the 20th of June. On the 1st of September following, I plowed the entire field, and sowed in wheat. The result was as follows:-The half which had only received the single plowing, yielded per acre thirteen bushels and eighteen pounds; the half that received three breakings yielded per acre twenty-three bushels and forty pounds, which made a difference of more than ten bushels per acre. At one dollar per bushel, this would pay for the extra plowing and leave a net extra profit of six dollars per acre besides.

#### Discoloration of the Skin.

Often persons receive an accidental blow ich, from whence discoloration of the skin is apt to ensue. To prevent this, take a little dry starch or arrowroot; moisten it with cold water, and lay it on the injured part. This must be done immediately, so as to prevent the action of the air upon the skin. However, it may be effectually applied some hours after. Raw meat is not always at hand, and some children have an insurmountable repugnance to have it applied. These applications are not always of certain effect. There is no remedy for a black eyes but bathing in hot water, which is often very tedious, but if immediately applied it is a sure remedy or preventive.

#### Novel Provender.

We are informed that several farmers in Illinois are utilizing "the rag weed" for hay. The crops of hay and straw are both so light, owing to spring drought, that unless some other substance can be found to feed cattle on during the winter, many must perish. Hence these farmers are mowing their stubble fields and putting the crop of "rag-weed" away for winter use. It is said that cattle do very well fed on it, and seem to prefer it to the best straw. Farmers in other sections may profitably make a note of it.

Kerosene and powdered lime, whiting or wood nahes, will scour tin with the least labor. Kerosene and whiting will also cleanse silver ware, doorknobs, hinges, etc. Wet the flannel slightly in the oil, dip into the whiting, and rub hard, wash off with hot soap-suds, and brighten with a chamois skin or newspaper.

NOTICE. The Home Reserve force of The Pennsylvania Central Insurance Company of Pottsville, Pa., will be in Perry county in considerable force, and act as the Company's Agents until a full line of Local Agents can be appointed when the reserve force will be recalled. JAMES H. GRIER,

Sec'y of Pa. Central Ins. Co.

#### Insurance Notice.

On and after the tenth day of April, 1872, The Home Reserve force of Insurance Agents belonging to "The Pennsylvania Central Insurance Company" will leave Pottsville in heavy force, and occupy ten different counties of the State, where they will continue to act as the Company's Agents until a full line of Local Agents can be appointed, when they will be recalled. As a body of men, I believe they are superior Insurance Agents, and most of them speak the English, French, Welsh and German Languages. The City Insurance Journals, with all their sneers at Mutual Companies, and continual cry of Fraud! Fraud! &c., cannot muster any better In-Fraud! ! &c., cannot muster any better Insurance material! Why don't the City Insurance papers tell the public that no Mutual Company broke or failed during the last ten years? Why don't they tell the public that more than half the Stock Companies started within the last ten years have? It is a well-known fact that Mutual

Companies cannot fail.

JAMES H. GRIER,
Secretary of Pennsylvania Central Insurance Company.
