FARM AND HOUSEHOLD ITEMS We invite communications from all persons who are interested in matters properly belonging to this department.

Apples for Human Blood. With us the value of an apple, as an article of food, is far underrated. Besides containing a large amount of sugar, mucilage and other nutritive matter, apples contain vegetable acid, aromatic qualities, etc., which act powerfully in the capacity of refrigerants, tonics and antiseptics; and when freely used at the season of mellow ripeness, they prevent debility, and indigestion, and avert without doubt many of the "ills that flesh is heir to."

Adulteration of Spices. A friend of ours, recently returned from Europe, informs us that while at Malaga he was asked to buy almond shells. Not knowing to what use they were put, he was informed—and has since found it to be true—that parties from New York have for a year or two past imported several cargoes, to be ground and mixed with spices, principally cassia, which when ground, it so nearly resembles that it can not be detected by the eye. That all sorts of ground spices have been for a long time largely adulterated is a fact well known to most people.

Save the Best Fowls for Breeding. It is the worst possible policy to kill all the best and handsome fowls, and save only the mean and scraggy ones to breed from. This is precisely the way to run out your stock; for like tends to breed like, and the result is, that by continually taking away the best birds, and using the eggs of the poorest, your flock will grow poorer and poorer every succeeding year.

Nothing is lost by a little self denial to start with. The extra pound or two of poultry flesh that you leave on its legs, instead of sending it to the market, is as good seed, and will bring forth tenfold and twenty-fold in your future broods. Save your best stock for breeding.—The Poultry World.

Cheap Paints. Take eleven pounds of unslacked lime and one gallon of boiling water and stir into a thick pudding; then add to it two gallons of linseed oil and one quarter of a pound of potash dissolved in one pint of boiling water. Mix thoroughly, and if the oil and potash do not unite, add a little more potash water; there must be enough to cut the oil perfectly, but no more. It will be thicker than common paint, but will spread easily with a common paint brush, and will wear excellently well, and has all the appearance of a superior paint, while its cost is less than half as much. For a paint for barns, out houses, fences, etc., it is unequalled.

Preserving Peach Trees. It is a general complaint that peach trees, after producing a few crops, not only cease bearing, but perish in a short time; whereas the natural life is fifty or sixty years or more. Dr. Wood communicates the result of some experiments, which he thinks, furnishes a key to unlock this mystery, and affording peach growers a remedy for the early loss of their trees. He believes this defective power of growth is owing to a lack of potash in the soil, and he assures us, that if alkali is supplied to the tree so that it shall recall the small roots and be absorbed, the fruit bearing power is restored, and the fruit itself revived.

NOTICE. The Home Reserve force of the Pennsylvania Central Insurance Company of Pottsville, Pa., will be in Perry county in considerable force, and act as the Company's Agents until a full line of Local Agents can be appointed when the reserve force will be recalled. JAMES H. GRIER, Sec'y of Pa. Central Ins. Co. Insurance Notice. On and after the tenth day of April, 1873, The Home Reserve force of Insurance Agents belonging to "The Pennsylvania Central Insurance Company" will leave Pottsville in heavy force, and occupy ten different counties of the State, where they will continue to act as the Company's Agents until a full line of Local Agents can be appointed, when they will be recalled. As a body of men, I believe they are superior Insurance Agents, and most of them speak the English, French, Welsh and German Languages. The City Insurance Journals, with all their sneers at Mutual Companies, and continual cry of Fraud! Fraud! &c., cannot muster any better Insurance material! Why don't the City Insurance papers tell the public that no Mutual Company broke or failed during the last ten years? Why don't they tell the public that more than half the Stock Companies started within the last ten years have? It is a well-known fact that Mutual Companies cannot fail. JAMES H. GRIER, Secretary of Pennsylvania Central Insurance Company. 6 16
