FARM AND HOUSEHOLD ITEMS

We invite communications from all persons who are interested in matters properly belonging to this department.

The First Requisite.

It is a rare compliment to pay any woman to say she is an excellent housekeeper.

The very first requisite of such a house mother, is that "She looketh well to the ways of her household and eateth not the bread of idleness."

"She that would thrive most prosperously, herself must every corner see." It is in these little wastes that cut up the largest incomes, and no one can see where the money goes.

If, when the meat comes in, care is taken to cut off every particle of superfluous fat before it goes into the pot or oven, and then at once place the fat in a dripping pan, with a little water in it, and also put it in the oven to fry the fat out, a valuable basin of drippings can be saved, and always had in readiness, which will be a great saving in the matter of butter and lard.

A good housekeeper must be accomplished in many little table arts, which go so far towards making home attractive.

No wasteful women, whether in high or low life, can be a good housekeeper—nor one that does not see to the ways of her house—however many helpers she may have to carry out her plans.

Foul Air.

It is a most mischievous error to suppose that wherever a light can burn a man can live. A candle would burn to its end in plenty of gaseous mixtures that would be instant death to any warm-blooded animal entering them.

It is without doubt the best remedy known in cases of CHOLERA AND YELLOW FEVER. It is a Specific for such diseases, and should be kept in the household of every family, especially during those months in which

CHOLERA AND YELLOW FEVER are liable to prevail. A small quantity taken daily will prevent contracting these terrible diseases.

In connection with a question answered in a late issue as to the largest amount of wool taken from a single sheep, we may state that a buck owned by Charles E. Hiester, of Westown, Chester county, clipped nineteen and one-half pounds, all of one year's growth.

A Merino buck in Western Pennsylvania recently clipped nineteen and three-fourth pounds, but those acquainted with the two classes of wool, will give Mr. Hiester the precedence.

To keep honey all the year round let it run through a fine sieve to separate it from the particles of wax; then boil it gently in an earthen vessel, skim off the foam which gathers on top, and cool it in jars. After covering these tightly, set them away in a good cellar.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California.

The properties of Dr. WALKER'S VINEGAR BITTERS are Aperient, Diaphoretic, Carminative, Nutritious, Laxative, Diuretic, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti-Bilious.
