 Food for Culdren.When a child lins no appoctito wholeseme food, womething in wrong in the
brain of too mother. Why, look at tho
facts of the case. For the sixs or eighit facts of thio case. For the six or eight
yeara of a colin' lififot itoes nothing butt
sloep, eat, play and grow. The very haw
hat of growh and assimulation gives if a sharp
oraving for ailiment,
by mound tho craving is fiep fed and constant netivity ; unleass its digestive organs have been tamper-
ed wilh by weak and injodicious handk, there will nothing ail its appotite. Just
fere is the dificenty. To necure a brief rospite candy cr cake pastry is put into the
hands of the babiy, until it cries for it, and with sostisited wiwh nothing else. It may
be that the foundation of this longing for
nwects

 its eariest infauce, and it nevor know the
bit of forman hugger, or the estisfation or
a " good square meal." One can tell such

enay digestion, and every child ouglit to cony digestion, and every
have just such an ivory mill.
 parents, wo think unwisely, antows thany
children abundance of meat. the child restless and impationt of control;
it has, in fuet, the samp effect on chitidren that corn has on young animatas It makess
them charfe to and fro within their narrow bounds, just na beurs and tigers do in their
itron eages. Graminivorous nnimals, the Lorse the cow, tho oheoro, aro milid and do cille, while the carnivora aro fieree, agite
and lean. Clildren who live on bread and milk and vegetables will, as a general rule,
be more aminible, more obedient, and fuller tios of meat. Regularty in feaciugz chil-
dren is of form a habit of eating six or eight times day, or it may learn to natisfy its appetitio
at three regular meals. If those, howerer aro more cian iivo hours apart thero should
bo a alightit lunch between-long enough beedgo fron the appotite. .siting utp lato at
night, undue espeltement, and activity jut finto a nervoua condifition, and thua oreation a morbia wate of the body which will causo
the appetio to crave unwholesome food.-
Farly to bed especially for the young, and for f thery waoky,
early, wery have theif rloep out. Very rapid growing than thoso who attuin their growth slowly
and lymplatio in their temperment seems to uu almote cruel to waiken a growing ound out of sound siecp. As many
prirenta depend on the services thoir chill. dren are able to render, if the boys and
giris must be up early in the morning. they thould be compolled to rotiro botimes. One reason why chilaren clamor for cate
and pio no much is doubtless because tho
bread to which poor. It is tastelease, or orourt, or tatle, or and appetizing. Wo aro norry to beilio that in the majority of families the bread positively bad. Those mothera who will hiavo on their tablees the best of bread will
bear testimony that theirir olilidren do not by tho examplo of royalty. The littlo prinen, according to report, do not Gor-
mane
 ery, excopt now . and then, and in very
mmall guantition. They have abuodanco or plenty of fruit and vogatables, and it is notable fact that not a young child has died
in olther of these royal famillese, nor has The inen in the fhot that the children are raised
in strict obedience to the laws of ufo and henith. They aro not pampered with tax
zurdee,
a natural corisequeme they gowe tent
fand bappy.-Erechange.
It b s ailid all kinds of poiltry and meat ann be cooked quitcer hy adang to wo
 rondoring them guito tonder and easy of
digation
 this way, and if not used too froely wo
