FARM AND HOUSEHOLD ITEMS

We invite communications from all persons who are interested in matters properly belonging to this department.

Slay on the Farm.

The Rural New Yorker talks to the farmers and farmers' boys as follows:

If discontented farmers, farmers' wives, sons and daughters, who think the delights of city life something worth realizing, could walk through our streets to-day and read one-thousandth part of the misery and apprehension that haunts the hearts of all classes, and are making lines on their faces, they would thank God for the peace and seclusion and abundance gathered in the gardens of their homes. Thousands of men and women are at the beginning of winter suddenly thrown out of employment! Few, comparatively, of these have aught laid up in store. Young women flock through the streets with restless, eager, anxious eyes, with lips quivering with fear lest they fail to obtain employment that shall give them food and shelter. Boys and girls of the country! be grateful for plenty and shelter. You will, perhaps, never know how to value it until you want and cannot get either. How many of those in the city are country-born; and how many would gladly go back to the homesteads for refuge, and yet many not have the means to get there! Farmers, thank God for the harvests, and that you have unsold food for your families! You have reason!

Bots in Horses.

The complete inefficacy of the various popular panaceas for bots in horses may be better understood when we come to know something of the nature of these persistent parasites. They are not worms, but larvae of a fly, and are possessed of remarkable powers of endurance under adversity. The most insinuating substances are but as milk and honey to them, and in an instance recorded a colony of them attached to the stomach of a dead horse were in no way inconvenienced by an hour's exposure to a bath of spirits of turpentine. But when whale oil was poured upon them they let go their hold and died almost instantly. Now, whale oil being thus indicated as an effective dose, and being aperient in its action upon the horse, would seem to be the remedy that should be chosen before any other. At least it might be well to have some experiments made and the result carefully noticed and made note of.

An Early Opinion of Railroads.

An old copy of the English Quarterly Review of the year 1810 contains an account of a scheme for a railroad, on which it is proposed to make carriages run twice as fast as stage coaches. The editor evidently failed to appreciate the idea, or to believe in its possibility, for he comments upon it thus wise:

We are not partisans of the fantastic projects relative to established institutions, and we cannot but laugh at an idea so impracticable as that of a road of iron upon which travel may be conducted by steam. Can any thing be more utterly absurd or more laughable than a steam-propelled wagon moving twice as fast as our mail coaches? It is much more possible to travel from Woolwich to the arsenal by the aid of a Congreve rocket.

To Bleach Cotton.

A very good way to bleach cotton is to soak it in buttermilk for a few days.—Another way is to make a good suds, put from one to two tablespoonfuls of turpentine into it before putting the clothes in. Wash as usual, wringing the clothes from the boiler, and drying without rinsing. By using two tablespoonfuls of turpentine in the first suds on washing days it will save half the labor of rubbing, and the clothes will never become yellow, but will remain a pure white.

Care of Animals.

Keep fattening animals fully fed, but be careful to vary the food sufficiently to cause a good appetite.

Hogs should be fed on cooked or soaked corn, or corn meal, almost entirely towards the last days of their fattening. Throw lime and ashes, in small quantities, on the floors of the pens from time to time, and occasionally feed a little sulphur.

Young animals ought not to be made tender by too close housing and should be treated gently and with familiarity.

A Word to the Boys.

Boys, did you ever think that this world, with all its wealth and woe, with all its shipping, its steamboats, railroads and magnetic telegraphs, with all its millions of grouping men and all the science and progress of ages—will soon be given over to the boys of the present age—boys like you? Believe it, and look abroad upon your inheritance, and get ready to enter upon its possession. The presidents, kings, governors, statesmen, philosophers, ministers, teachers, men of the future are all boys now.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California; the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What in the cause of the unparalleled success of Vinegar Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Disorders.

If men will enjoy good health, let them use VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form.

R. H. McDONALD & CO., Druggists and General Agents, 301 E. Franklin St., Philadelphia, and 202 Washington and Union Sts., New York. Sold by all Druggists and Dealers. November 10, 1874—1m
