FARM AND HOUSEHOLD ITEMS

We invite communications from all persons who are interested in matters properly belonging to this de-partment.

Uses of Buckwheat.

The name buckwheat is derived from the German "Buchweitzen" (Beechwheat), from the resemblance of the seed to beechmast. It belongs to a family of knotweeds, of which there are numerous species in the United States. There are three cultivated plants, viz., common buckwheat, Polygonum fagopyrum; Tartarian buckwheat P. Tatarrieum, and notched-seeded buckwheat, P. emarginatum. The first is cultivated chiefly in America, the second in Italy, the third in China.

There is a close resemblance in the composition of buckwheat and rye. In the grain of buckwheat there is twenty-seven per cent of husk. The seventy-three per cent of flour closely resembles that of rye in color and properties, and the amount and composition of the ash of both plants are nearly identical when they are grown in similar soil. The dry grain or rye contains 2. 4 per cent, of ash, that of Buckwheat 2.1 per cent, of ash.

Buckwheat is extensively used as food for man and live stock, and is decidedly nutritious. In the States of New York and Pennsylvania it is considered the best fattening food for sheep. The unground grain and fresh straw produce a singular effect upon swine, causing cutaneous eruptions of the skin, and dizziness which sometimes ends in death. In some places buckwheat is plowed in as green manure for the wheat crop.

Although buckwheat flour is seldom used in the United States except for making hot cakes in winter, it is employed in a variety of ways in Europe. In Italy and Holland crumpets are made of it which is eaten with butter or sugar. It is also used in these countries with water or milk for hasty pudding. In almost any part of Germany it is used with the flour of rye or wheat for making bread. In Saxony and Silesia, buckwheat cakes or pudding form a great part of the three daily meals of the peasantry. Various preparations of buckwheat flour appear prominently on the tables of the rich in Holland, Germany and Russia, and by all classes in these countries it is considered wholesome and nutritious.

Electric Railway Whistles.

The French have lately introduced a system by which a stationary electric battery is made subservient to blow the whistle of an approaching locomotive, in case the road is not clear, without the engineer having to give any attention to it. Such an arrangement is, of course, exceedingly valuable at night, and especially during a fog, when signals cannot be seen at a distance. It is the reverse of the system introduced on the Hudson river railroad, by which every approaching locomotive sets a stationary electro-magnetic alarm bell at the depot in motion. In the French system referred to, the obstruction at the depot starts the steam whistle on every approaching locomofive when the train is still far enough away to slacken speed and stop. It has now been in uninterrupted operation on the line of the Northern Company of France for some time, and has been found practically successful in use, regularly informing the engineer whether the way is clear or not. The signal tender turns a disk, andsends an electric current in the direction of the coming train to a bar placed between the rails; when the engine reaches the spot, a metal brush, placed between the wheels, sweeps the bar, the current passes to the engine, and, by means of an electromagnet, presses upon a lever which opens the steam whistle, thus making it blow automatically. The rapidity with which the danger signal can be sent appears to be much in its favor.

The Simple Secret.

Twenty clerks in a store, twenty hands in a printing office, twenty apprentices in a ship yard, twenty young men in a villageall want to get on in the world, and expect to do so. One of the clerks will become a partner, and make a fortune, one of the compositors will own a newspaper, and become an influential citizen; one of the apprentices will become a master builder; one of the young villagers will get a handseme farm, and live like a patriarch-but which one is the lucky individual? Lucky! There is no luck about it. The thing is almost as certain as the rule of three. The young fellow who will distance his competitors is he who masters his business, who preserves his integrity, who lives cleanly and purely, who devotes his leisure to the acquisition of knowledge, who gains friends by deserving them, and who saves his spare money. There are some ways to fortune shorter than this old dusty highway; but the staunch men of the community, the men who achieve something worth having, good fortune, good name, and serene old age, all go in this road."

Dr. J. Walker's California Vingar Bitters are a purely Vegetable properties are a purely vegetable properties aration, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the usedicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the course of the properties of the propert is the cause of the unparalleled success of Vinegan Britis?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, reliev-ing Congestion or Inflammation of the Liver and Visceral Organs, in Bilions Dis-

If men will enjoy good health, let them use Vinegau Britess as a medicine, and avoid the use of alcoholic stimulants every form.

No Person can take these Bitters NO Ferson can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Grateful Thousands proclaim Vine-

OAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

Billious, Remittent, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Ala-bama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their hver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Britters, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Dyspepsia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Tight-ness of the Chest, Dizziness, Sour Eructa-tions of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys and chemical in the region of the Kidneys, and a hundred other painful symptoms, are the off-springs of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional Diseases, Walken's Vinegan British have shown their great owers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases, -Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S INEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuneles, Ringworms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelminities, will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Jaundice.—In all cases of jaundice, cest assured that your liver is not doing its work. The only sensible treatment is to promote the secretion of the bile and favor its removal. For this purpose use VINEGAR BITTERIS.

Cleanse the Vitiated Blood when-Cleanse the Vitinted Blood whenever you find its impurities bursting
through the skin in Pimples, Eruptions,
or Scres; cleanse it when you find it obstructed and singgish in the veins; cleanse
it when it is foul; your feelings will tell
you when. Keep the blood pure, and the
health of the system will follow.
