Probably never before in the whole history of medicine, has anything won so widely and so deply upon the confidence of mankind, as this excellent remedy for pulmonary compliants. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affectious of the hings and threat, have made it known as a reliable protector against them. While adapted to mittler forms of disease and to young children, it is at the same time the most effectual remedy that can be given for incipient consumption, and the dasperous affections of the threat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all about be provided with this antidote for them.
