BORAX and its Uses.

It may not be generally known how very valuable borax is in various purposes of household use. We find it the very best cockroach exterminator yet discovered. One half pound, costing but fifty cents, has completely cleared a large house formerly swarming with them, so that the appearance of one in a month is quite a novelty. The various exterminating powders puffed and advertised have been found not fully effective, tending rather to make the roaches crazy than to kill them. There is something peculiar, either in the smell or touch of borax, which is certain death to them. They will flee in terror from it, and never appear again where it has once been placed. It is also a great advantage that borax is perfectly harmless to human beings; hence no danger from poisoning. It is also valuable for laundry purposes. The washwoman of Holland and Belgium, so proverbially clean, and who get their linen so beautifully white, use refined borax as washing powder instead of soda. In the proportion of a large handful of borax powder to ten gallons of water. They save soap nearly one half. All the large washing establishments adopt the same mode. For faces, embrocations, etc., an extra quantity of the powder is used; and for eruptions (requiring to be made stiff) a stronger solution is necessary. Borax, being a neutral salt, does not in the slightest degree injure the texture of linen. Its effects are to soften the hardest water, and therefore it should be kept on the toilet table. As a way of cleaning the hair nothing is better than a solution of borax in water. It leaves the scalp in a most cleanly condition, and the hair is thus sufficiently stiffened to retain its place. This stiffness, however, can be readily removed, if objectionable, by washing with water. Borax is also an excellent dentifrice; dissolved in water, it is one of the best tooth-washes. In hot countries it is used, in combination with tartaric acid and bicarbonate of soda, as a cooling beverage.—Manufacturer and Builder.

Recruits for the German Army.

The patriotism which inspires every true German heart, and the anxiety for the success of fatherland which it feels in times like the present, must have some effect upon the propagation of humankind. In proof of this proposition we direct attention to this splendid story:

A certain lager beer saloon, the other night was full of customers, most of them discussing the new aspects of the Franco-Prussian war. At one table sat a solitary Deutscher, who seemed listless and anxious, as if there might have been a disagreement between his beer and himself.

Presently in ran a little girl, her face radiant with smiles, exclaiming: "Oh, father, we've got a little boy at home!"

"Dat is good," said the dutchman as the anxiety disappeared from his countenance; "come boys fill up der glasses!"

Not many minutes elapsed before he rushed the little girl again with the announcement: "Oh, father, we've got two little boys at home!"

The dutchman looked a good deal astonished and not altogether gratified at this little family redundancy, but rising at length to the magnitude of the occasion, he said:

"Vell, den, dat is also goot. I treats all in de house. Fill up der glasses!"

In a few minutes again appeared the radiant messenger, with the astounding proclamation: "Oh, father, we've got three little boys at home!"

This was too much however for Teutonic impassibility. There was no further call for glasses.

"Vell, den," says he, "I goes up dere and stops der whole tam business. Bismarck must have sent a letter to my frow, and engaged her to git up recruits for the German army."

Here home mechanics, patronize home manufactures and home merchants, build up home interests, take a home paper and all will go well.

J. S. BURKHART.

Selling Groceries, Snyder Co., Penna. Keeps constantly on hand a large and well made assortment of Tin, Sheet-iron ware, Stoves, &c., &c. He is Agent for the following named articles.

"THE MORNING GLORY." Littlefield's Patent Improved Base COAL STOVE.

In this pattern of The Morning Glory, several new and important features have been embodied, which can only be seen to be admired. This new stove is made entirely of cast iron, as first so arranged, but can be made with sheet-iron upper portion when preferred by the purchaser. Its ornamental finish is drapery, making it a handsome piece of furniture, far more so than any stove heretofore made. Its internal construction, though resembling some of the former patterns of The Morning Glory is quite different, making it more durable, and far less difficult to be repaired. The castings are of the highest order, fully equaling the finest castings made in this country.

"THE BARLEY SHEAF." Anti-Dust Air-Tight Cooking Stove, with Extended Fire-Box for Wood or Coal.

Patented May 10th, 1868. We take pleasure in offering our customers the above Stove, a New First-Class Flat-top, and would call particular attention to its many attractive and valuable features.

This Stove has been carefully tested for several months, and the results have proved so highly satisfactory, that several of our oldest and most experienced stove dealers prefer it to a sale far beyond our ability to supply the demand.

Slide front fire-door, giving full use of the hearth. An additional slide in the oven, so arranged as to give more room in the upper part of the oven a great convenience much needed. The oven is nearly as wide at the top as at the bottom, and is not only increased in size, but will be recognized as a great advantage in baking.

POTY'S CLOTHES WASHER. The best, cheapest, and most popular Washing Machine ever invented.

It is easy to operate, sitting on standing makes but little room; injures no garments; makes its work from two to four minutes; is durable and convenient; and it is the only Washing Machine known that is liked by the washer the longer it is used.

THE UNIVERSAL CLOTHES WRINGER. The "GREAT FAMILY ECONOMIZER."

The terms of our Patent call our Machine a "Wringer." Years of experience prove it also to be a most excellent WASHER. When we reduce every invention for washing clothes to a principle they all amount to that of pressing and squeezing, and forcing the water through them, thus removing the dirt. Most Washing Machines do it by rubbing. The Universal Wringer does it by pressing.
