What I Know About Farming I have read Greeley's "What I know about farming," through nine LIGHTNING RODS times, twice backwards and once standing on my head! Have mestered it at last, and condensed in milder shape what I know about running the thing into the ground.

Young man be a farmer ! Young woman be a farmer! Buy a billiard table, dust your clothes on the top of it, sprinkle on a little dandruff and go to work. Never think of beginning with less than a field of green at least 6:10. Spred on your earth all ever the billiard table evenly, to the depth of one sixth of an libbate with a sponge, and subset depth of ten feet. If you have billiard table, buy a piece of land it you can't Littlefield's Patent Improved Base get a whole, and go to work.

The best way is to stand about in the shade or hire out to hold a chair

then drill and blast. This will pul-verize the earth, clevate your land the finest castings made in this warm it, and you will be able to report before your slow neighbors.

Run your creeks up hill and wash lient. sheep only in warm water.

Pick your goese on Sunday, and set the eggs on fence posts, out of the way of garter snakes.

When turning grindstones to edueate scythes, never turn the handle backward or the early grass will wilt before the color comes to it.

In breaking colts use a club-it is Flat-top, and would call particular attention much better than a crowbar. A sled to its many attractive and valuable improve stake will answer.

Feed all hogs with cup custard, except politicians.

down, so the boys won't sit on the top to supply this season. of them when arguing so long with the hearth. out coming to the point.

Strawberries should be thrashed in May, and the straw saved for beds. Butterflies should never be milked

or churned the day they are slopped, lest the young milk be spoiled. None but the ice cream cows should wear skates-the heel corks scratch the calves so. Hydraulie rams should be butcher

ved for company. Put a swivel on your scythe so that

it will cut both ways.

Canary seed should be sown in drills so that the young birds will The "GREAT FAMILY ECONOMIZER browse very early.

hard to come up. The same with artichokes pips in chickens.

Pitchforks should be sorted and packed in sugar, the juice boiled and does it by pressing. skimmed before running in the cakes.

Pumpkins should hang on the SAMUEL FAUST, trees till frost comes : they should be picked not shook off, and then packed iu sweet oil.

Dandelions should be worked in pink rother than in blue worsted-they will wash botter.

Ordinary shoes will do for oxen when at farm work. Use slippers on them only when going to church.

Old rags are better than glass to stop holes in the windows-the neighbors cannot see in so well.

Beach nuts should never be eaten with the skin on-they change the complexion so.

Young bed quilts should never be taken out of the ground in the salt

until the beds have been well spaded for the next crop. In hatching suspenders care must

be taken that the old hen does not have her nest near the gallows, or the young birds will be hard to hatch, Look out for protection! Let the big hogs eat the little ones, then there

vill be more room in the pen, and less expense for barrels. But in salting pork never use rock salt on a stony farm, but feed them with fine salt from a spoon. Use Epsom salt exclusively for horses. Never put spots on pigs backwards except when they are Keely & Miller. for army use.

Sweet corn is the best to corn beef, though old cows used to the business will eat the common red glaize if the hired man does not bellow at them be fore they get into the garden.

Use peach leaves to color blond, and this is all I know about farming. Farrowily thine,

BRICK POMEROY. T THOMPSON BAKER,

Ayers Hair Vigor,

For restoring to Gray Hair its natural Vitality and Color. A dressing once agreeable, healthy, and effectual for

preserving the hair. It soon restores faded or gray hair to its original color, with the

gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. The restoration of vitality it gives to the calp arrests and prevents the forma-ion of dandruff, which is often so unleanly and offensive. Free from those leleterious substances which make ome preparations dangerous and injeious to the hair, the Vigor can oni enefit but not harm it. If wanted nerely for a HAIR DRESSING, othing else can be found so desirable. ontaining neither oil nor dye, it does ot soil white cambric, and yet lasts ong on the hair, giving it a rich, glossy

istre, and a grateful perfume. Prepared by Dr. J. C. Aver & Co., Practicel and Analytical Chemi LOWELL, MASS.
