SAVES FUEL! SAVES LABOR!

NATIONAL STEEL TUBE CLEANER.

(Patented July 8th, 1873.)

Carbon is one of the worst conductors of heat known. A deposit of 1-32 of an inch on the tubes causes a loss of 7½ per cent. of fuel.

This Tube Cleaner is made of spring steel. Each segment is of heat a spring, and distends in a perfect circle so as to press against the inside of the tube, removing all the carbon and scale without the slightest injury to the tube.

Guaranteed to clean better, last longer, and work easier than any in the market. Adopted and in use by the U. S. Navy. For sale by dealers. Send for circular.

Cost of Raising Wheat.

The National *Indiana Bl* gives the following on the cost raising wheat: "There seems to an unceasing complaint of the p of wheat, coupled with the assert that it costs the farmer more to r a bushel of wheat than he can sell for at the present price—rang from $1.15 to $1.20 per bushel. N if this was so, there would be so excuse for paying interest on mon taxes on the wheat, and starving their creditors in hope of such ti as they could realize a profit on th labor and investment. But what a the facts? Having taken som trouble to get figures from seven practical and successful farmers this vicinity, I will give you, for t benefit of "all whom it may concern the highest I have yet received the cost of raising and marketin one acre of wheat, including taxe etc. And I may add that the par giving them, when asked what cost to raise a bushel of wheat, sai that "he never figured it, but at a average of 15 bushels per acre, h was confident that it cost at leas $1.00 per bushel." Judge of m surprise when confronted with h own figures, which he said were am ple, and are herewith submitted:

Ploughing	per acre	$2 0
Harrowing	"	4
Seed and sowing	"	1 7
Cutting and binding	"	1 7
Board, harvesters	"	5
Hauling in	"	5
Threshing	"	7
Help and board do	"	1 0
Hauling to market	"	7
Taxes	"	5
Total		$9 9

From which the following deductions are easily made:

Yield.	Cost per bushel.
15 bu. per acre	66 cents.

25 " "	38 "
30 " "	20 "

☞ An enterprising grocer in the town of Santa Clara, California, has adopted an original method of business. Each side of the store is fitted up for business on its own account. In the general arrangement each side is a duplicate of the other the difference being that one side is cash and the other credit. When a customer comes in the first question asked is, "Do you wish to buy for cash or on account?" If it is a cash customer the goods and prices on the cash side are shown, but if it is one who wants credit, he is shown the other side and for the first time in his life, perhaps, made to realize the value of ready money.

How She was Fooled.—A lady in this city, says the Marquette *Journal* suspected that her husband was in the habit of kissing Katy, the cook, and resolved to detect him in the act. After watching for days she heard him come in one evening and quietly pass thro' into the kitchen. Now Katy was out that evening and the kitchen was dark. Burning with jealousy the wife took some matches in her hand, and hastily placed her shawl over her head, as Katy sometimes did, entered the kitchen by the back door, and was almost immediately seized and embraced in the most ardent manner. With her heart almost bursting with rage and jealously the injured wife prepared to administer a terrible rebuke to her faithless spouse. Tearing herself from his foul embrace, she struck a match, and stood face to face with—the hired man. Her husband says his wife has never treated him so well since the first month they were married as she has for the past few days.

Too Smart Altogether.—An Auburn mother the other day was teaching her precocious little three-year, old the names of various things, and after naming over a good many, she thought she would see if he remembered the names of any of them. She asked the child, "Where's your nose?" and the little fellow promptly placed his chubby little hand upon his nose. "Where's your ears?" she asked, and the little fellow pointed to his ears. "And where's your pants?" the mother went on. "Here dey is, mamma," he replied. Seeing that his mother was through interrogating him, the little fellow thought it was his turn to ask a few questions; so he said, "Mamma, where's your ears?" The mother showed him. "Where's your nose?" he asked; and the mother pointed to her nose. "And now, mamma, where's your pant's?" "There, that's enough," said the parent. "Go and see what brother wants."—*Placer Herald.*

Sewing Machine Monopoly.

End of the Great Fight Against the Wilson Combination.

Washington, March 10.—The House committee on patents to-day report adversely on the application of A. B. Wilson for an extension of his patent for sewing machines. This is a celebrated and valuable "four-motion feed." now used by Wheeler & Wilson and other machines. The application has been before Congress for several years, and protests against the extension have been received during that time, signed by nearly one million persons. All of the small sewing machine companies which had been required to pay a heavy royalty to the "Sewing Machine Combination," composed of the four leading machines, have fought the extension savagely since it was originally presented. This refusal will ultimately reduce the price of sewing machines very greatly as soon as the four-motion feed becomes public property. The committee say that the applicant has already made two or three large fortunes out of his invention, and that it is time now to give the public a chance. The testimony taken before the committee shows that the cost of sewing machines is not more than from twelve to fifteen dollars.
