mences on the 25th. The watermelons have obtained an

enjoyable state of perfection. A number of valuable farms are ad vertised for sale in this paper. Buildings can be erected one-third cheaper than before the panic.

The farmers are busily engaged at plowing in preparation for seed time.

EVERY body seems inclined to hold fast to all the money they can get hold of, and not disburse it any faster than they can possibly help.—This only makes times the tighter, and affects business all the more. It is noticeable that the less money there is in circutation, the less business there is done. If you wish to keep business brisk let out all the money you can.

Centennial Celebration.—A Union S. S. Celebration will be held at Salem on Saturday the 16th inst. The procession will form at Salem Church at 9 a. m. and proceed to Henry Moyer's Grove. A cornet band will be present, to furnish music. Profs. Boyer and Noetling, Rev. W. A. Haas and Wm. Moyer will address the assembly, A cordial invitation is extended to all S. S. to be present. All are invited to come.

sent. All are invited to come. Ben's Pig departed this life on Monday night last. Ben, with the patience and sympathetic feelings of the good samaritan ministered to its wants and attended it through its long and distressing sickness with the untiring care and vigilance of an old hospital nurse. of an old hospital nurse. But the care of the nurse and the skill of Doctor F. availted nothing. Dr. F. after a thorough rost Norman pronounced the disease TRASE.

WRASEL Sheriff X. says the immediate cause of death was; that the head being too heavy for the body it turned upside down and died of strangulation. It was buried with the honors of war at the dead of night—no drums beating &c.

WHAT shall be done with the large apple crop? is one of the questions asked by those who have large orchards. Cider barrels are scarce, the supply having, in consequence of the failure of the apple crop for years, run very low. People are not prepared to make use of their superabundant fruit. Years ago apples were turned into 'apple jack' by the wagon load. But the machinery for making that liquid is now wanting in this county, even if the sentiment of the people permitted it to be done. Honestly manufactured apple-jack would not be so near a deadly poison as the vile compounds, named whiskies, now in general use.

We will as heretofore make it an object for parties buying for CASH and will continue our plan of treating percent set that they will call again and hads their purchases.

Case of Suicide.—On Saturday last Peter Guyer, Esq., of Vicksburg, had business in Lewisburg. His wife hurried him to the train for fear that he would miss it. On returning home in the evening Mr. Guyer inquired for his wife, A search was made for her, and at last she was found on the garret of the main building dead. She had committed suicide by hanging herself. She had first tied a portion of yarn about one of the rafters and then fastened a handkerchief to this, forming a loop, into which she placed herneck without tightening the loop. Then she laid down in the loop and thus choked herself to death. Her body was so close to the floor that she could have saved herself by reaching to the floor with her hands.

by reaching to the floor with her hands. What caused her to commit the rash What caused her to commit the rash act remains a mystery. There is no doubt she was laboring under a sudden attack of insanity. She was in rather a lively humor during the day and seemed to have no trouble bearing upon her mind. She was a kind, affectionate wife and loving mother, and greatly respected by her numerous friends and neighbors. Many are the beautiful incidents in her life which they relate.—

of Vineland, published in the New York Thisneys, by the well known Agriculturist, Solon Robinson:

All the farmers were of the "well to do" zort, and zone of them, who have turned their attention to fruits and market gardening, have grown rich. The soil is losm, varying from sandy to clayer, and surface gently unduining, intersected with small streams and occasional wet meadows, in which deposits of peat or muck are stored, sufficient to fertillise the whole upland surface after it has been exhausted of its natural iscribity.

It is estainly one of the most extensive ignities tracts, in an almost lovel position, and suitable condition for pleasant farming, that we know of this side of the Western prairies, we found some of the oldest farms apparently just as profitably productive as when first cleared of forces fifty of a hundred years ago.

The geologist would some discover the cause of this continued fertillity. The whole country is a merina deposit, and all through the soil we found evidences of calacteous substances, generally in the force of indurated calcartous mari, showing many distinct forces of anisms challs, of the territory formation; and the mariy cubstance is exterted all through the soil is defined in the force of indurated calcartous mari, and in the exact condition meet assign animiliated by state plants as the force of substance is exterted all through the soil is a very assimiliated by state plants as the farmer distance factors in military state.
