

THE POST. Middleburg, June 28, 1877. Local News, &c.

All communications, business letters &c., for this office, to secure prompt attention should be addressed as follows: THE POST, Middleburg, Snyder County, Pa. Advertisements, communications &c. must be handed in by Monday noon, to secure insertion in next issue.

A full line of regular made hose at S. Weis's Selingsrove.

J. F. W.—We are sorry to state that one of your notices was too late for last week's issue.

There will be no paper issued from this office next week. The work will however be attended to as usual.

Some persons often ensure the conduct of others, when under the same circumstances they would not have acted half so well.

Some one suggests that tramps should be employed to catch potato bugs. This would be a good way to make them earn their board.

ADAMSBURG.—The first two sessions of the Fourth of July Exhibition were held at Adamsburg. The fair was very charge. The change has been made since the printing of the posters.

The republicans of Union County have nominated Chas. H. Hassenpflug for Prothonotary, Calvin M. Hayes for County Surveyor and Wm. R. Half-penny for Coroner.

The clergymen of Chambersburg have resolved to oppose Sunday funerals. Why not at the same time oppose Sunday schools? A general dissent is a wedding then in a funeral. Funerals generally don't pay well. Business is business, sure, down in Chambersburg.

To Boil Potatoes.—Let the potatoes be of a size; do not put them into the pot until the water boils; when done, pour off the water and remove the cover until the steam is gone; then scatter in half a teaspoonful of salt and cover the pot with a towel. By adopting this plan watery potatoes will be made.

The city council of Harrisburg has, by ordinance, forbidden the sale or firing of fire-crackers and other substances within the city limits, and the boys will have to forego their usual Fourth of July fun. We hope that our Council will pass an ordinance of the same sort, and enforce it too.

The will of the rich man of the future will read: "To the respective attornies of my children I give my entire estate and worldly goods of all description. Personally to the children, and to my beloved wife, I give all that remains." This instrument will satisfy the family and save the trouble of proving the old man insane.—Ec.

A Pipe Organ will be dedicated at the Town Church next Sunday, July the first, at 2 o'clock in the afternoon. The Rev. E. L. Wolf, D. D. of Gettysburg, will preach the dedicatory sermon in English and the Freeborn Choir will furnish some choice music to enliven the occasion. All are invited to attend.

Good Advice.—There never was better advice given to any man than the following taken from one of our exchanges: "Get up early every morning young man—just as the sun darts his first rays up the eastern horizon—sharpen your wits, and perhaps in the course of a dozen years you can tell at a glance what a horse will weigh, or how much wheat it requires to make a barrel of flour, without first putting each on a pair of scales. It takes time to acquire such knowledge. A man can't inherit sharpness—he must receive it at the grindstone of experience."

THE FIRE CRACKER NUISANCE. In many places laws have been passed prohibiting the use of fire crackers. They are dangerous, as well as a nuisance and should be abated. The Germantown Telegraph states that "statistics show that during the past twelve years about \$1,500,000 worth of fire crackers have been imported into this country, and the loss by two conflagrations, known to have originated with these dangerous articles, amounted to over \$15,000,000. It is believed that every dollar's worth of these explosives imported occasions \$100 worth of damages."

An exchange expresses our likes and dislikes to a dot, as follows: "We are not a man full to take his local paper, and all the time sponge on his neighbor for the reading of it. We like to hear a man complain, when we ask him to subscribe for his home paper, that he takes more papers than he reads now, and then go around borrowing his neighbor's paper until he has gathered all the news from it. We like to see a mechanic or merchant refuse to advertise in his home paper, and then try to get a share of the trade which the newspaper brings in town. We don't like to see one of our rich, miserly men, who cannot pay \$1.00 a year for his local paper, always manage to be around in time to read the paper at the expense of a friend not worth a tenth part of what he himself. It looks so economical, thrifty and progressive."

A SWINDLER EXPOSED.—For some weeks past, vague rumors have been circulated in this community regarding a nefarious swindle that was being perpetrated. These rumors have now assumed some positive shape and will no doubt be a decided sensation in this county. It appears that a number of persons have been quietly informed that an over issue of money had been made by persons connected with the Treasury department at Washington, and that the aid of discreet persons was needed to get it into circulation. They were told that by investing \$100, or any larger amount they would receive double the amount in this fraudulent issue. The money was paid to a confederate at Harrisburg, and the package purporting to be the stolen money was placed in the hands of the victim. When this was found to contain old paper cut in the shape of bills, or some other equally worthless stuff. We have a list of quite a number of persons, some residents in this county, and some in counties who were invited to share in the stolen money, but who without the names for the present, until the matter can be further investigated, and till the list is more complete. Among the names we notice many who stood high in the estimation of the people, and who were better known than...

TAKING THE CATTIES.—The Lewistown Gazette has an item of interest to all fishermen and lovers of fish. It says, "The number of deer fish in the river, mostly caught by a subject of general remark, and various causes are assigned for it. We had been under the impression that it was caused by deleterious matter getting into the water or drugging, but an examination of the fish taken from the river, yet struggling for life, showed a prominent spot on the lower side which looked like the fatal sting of an insect or the result of some disease, and we are informed that the same thing has been noticed by others. The larva which exactly like the poisoned circle of a wasp or a bee's sting on the human skin. For the present or until the right cause is ascertained, we would advise all persons to abstain from eating catfish."

TRY THIS.—The following seasonal receipt is easy of application, and we are satisfied that if properly used it will do good to the world. It is good for vegetables but death to animal life. The bugs burrow in the earth at night and fall to rise in the morning. It is also good to kill the "grub" in peach trees—only use twice as much as a quart to each tree. There was not a yellow or blistered leaf on trees or flowers to which it was applied last season. No danger of killing any vegetable with it—a concentrated solution applied to beans makes them grow wonderfully.

It is almost impossible to calculate the amount of injury done to the character and reputation of the most discreet persons by the trifling, senseless gossip engaged in by thoughtless individuals throughout the community. The slightest rumor is seized upon and enlarged upon and then scattered broadcast to reach through the community traveling additional copies are made to appear the vilest, and they are injured in reputation, business, and in social circles to such an extent that it is difficult to recover themselves. If the gossipy individuals in a community would for a moment reflect what injustice they do to their neighbors, they would consider long before they gave vent to their thoughts. For frequently "the wish is father to the thought."

SWEET POTATO BUG.—Another pest has just made its appearance in the agricultural world, and if proper efforts are not made to check its advance, the rater of sweet potatoes will find his hands full of the pest. It is a small insect that plants from its ravages. Last Friday, Mr. Benjamin Johnson residing at Cashtown, brought to this office for our inspection about a dozen specimens of this new pest. They are a little larger than the well known lady bug, and resembles it some what in appearance, but was informed by Mr. Johnson, that when in a healthy condition and on the stock, the shell, or sheath of the wings, has a bright yellow appearance resembling gold bronze. The sheath is cleft from front to rear, the two parts being joined at the shoulders. Our informant also remarked that this bug does not molest the common potato.—Public Opinion, June 10th.

A BIRD SWINDLER.—Last week, a rough character, well known about town, connected one of the most audacious swindles yet on record. Starting for the country, he reported that a young boy, residing in Hazleton, who had a great number of friends in the rural districts, was dead—frankly, that when in a healthy condition, he had been taken by a witch which legs were cut off—and that he was commissioned to collect a sum sufficient to bury him. By means of this artless story, he succeeded in securing over fifty dollars, promising that it should be paid back when the railway company paid "the damages." At one place, the residence of the boy's aunt, he told the story so pathetically that the old lady fainted, and for two hours laid in a stupor, fears being entertained that she would die. As the boy was worth a dollar or two from the house he left a high taste for Paris unknown. A profitable or more contemptible swindle it has not been our lot to record. So completely did he succeed in deceiving his rural dupes that several towns in the county were notified to attend the funeral. The fellow is now under the name of Ed. Reimer, and should be, and will be nabbed by the officers.—Hazleton Sentinel.
