Fouts's Horse and Cattle Powders are renowned the world over for preventing and curing diseases; it is, therefore, unnecessary to give them any further recommendation. Try them.

Life and health are God's gifts, and it is a sin to impair them by neglect. You can promptly relieve the disorders arising from a cold and tending to consumption, by the regular use of Dr. Haas' Expectorant.

The experienced editor can always tell at sight the man who comes in with his first attempt at original poetry. He walks on tip-toe, and looks as though he had just passed a counterfeit bill or strangled a baby.

—— Kid gloves selling at reduced prices at S. Weis's, Selinsgrove.

A few days ago says one of our exchanges Mr. Dewalt, of Shermansdale lost a coat, and after skinning the carcass hung up the hind quarter where it was accesible as though it was beef. During the night some person stole it, and perhaps is now feasting on horse steaks.

——Oppenheimer of the popular Clothing Firm ,Weis & Oppenheimer, has just returned from the City with another large stock of clothing. He has purchased his stock at such low figures which will enable him to offer great bargains to his customers. Call at Weis & Oppenheimer's above the Keystone Hotel, Selinsgrove. if you wish to buy cheap clothing.

——No Sewing Machine has met with such universal approbation as the White, notwithstanding the fact that it has been manufactured less than one year.

Its sales to-day are almost if not quite in excess of the oldest machine in the market. Try it and you will buy it, it is the best for people to use. For sale by C. C. Seebold Middleburg, Pa.

Hot Ashes.—At this season of the year people cannot be too careful with hot ashes. Frequently buildings are destroyed from this cause. Particularly where you have careless servants, housekeepers should keep a watchful eye. Ashes, especially made from hickory and oak wood will keep alive a long while, and to place it in a wooden vessel, or to throw it near wood, is simply to invite a conflagration.

Small-Pox at Huntingdon.—There is a small-pox panic at Huntingdon. The disease was introduced into the place by a little boy who had visited Pittsburg.—The Huntingdon physicians who attended the case pronounced it chicken pox and the Huntingdonians not fearing that disease gave it ample opportunity to spread. After a little while the physicians found some cases of varioloid and directly the disease developed into actual small-pox. Now the schools are closed, the infected houses quarantined, vaccination is proceeding briskly and every effort is being made to stamp out the malady. Thus far there have been four or five fatal cases.

On Monday evening about 5 o'clock Mrs. Graver, wife of *Dr.* Graver, of Thompsontown, went to the stable to milk, leaving two children, aged 2½ and 4 years old, in the sitting room of the house. When she returned to the house the older child was absent, and the younger one was lying on the floor of the room in which she had left the children, with all its clothes burned off, and its body burned almost to a crisp. The unfortunate child lingered till 11 o'clock that night, when it died. The children, when the mother went out, played with the fire, and in the play the clothing of the younger one were set on fire, with the above result. The older child became frightened, ran out and left the younger one alone. —*Sentinel & Republican 16th inst.*

NEW PUBLICATION.—John Blair Linn, Esq., Deputy Secretary of the Commonwealth, has published a volume entitled Annals of Buffalo Valley, Pennsylvania, which is a work of great local value and contains much information for the general reader. It is a large volume of six hundred pages, octavo, and may be said to embrace the history of Northumberland, Snyder and Union counties very fully from 1755 to 1855, with much of the adjoining counties. There are also interesting items of Cumberland Valley, which are incidently thrown into the book. The book has cost the author a vast amount of labor and research, but none was more competent for the task than he, and no more complete work of its class has ever been issued in the State.

Eclipses for the Year 1878.

During the present year there will be four eclipses—two of the sun and two of the moon.

An annular eclipse of the sun on February 2, at two o'clock in the morning, partly visible only in nearly the whole of Australia.

Partial eclipse of the moon on the morning of February 17, visible from the United States. Eclipse begins at three hours fifty-two and a half minutes a. m., and will continue until six o'clock, forty-eight and a half minutes, a. m.

Total eclipse of the sun, July 29, visible in all parts of North America.

A partial eclipse of the moon in the afternoon and evening of August, 12. The moon will enter the shadow at 4h. 53m. p. m., being then below the horizon, and will be out at 7h. 44m., p. m., when she will rise.

Rock Candy and Whiskey are said to be a sure cure for consumption in certain stages. The prescription is: take five pounds of pure white rock candy and dissolve it in a gallon of pure rye whiskey, the older the better. The whiskey must be distilled in the old fashioned way with a copper worm. No steam whiskey shall be used. Take of this cordial, when properly dissolved, a cherry glass full when going to bed. On waking in the morning take two thirds as much on an empty stomach. Carry a flask in your pocket, and take a spoonful a half a dozen times a day, whenever you think of it. When using this, avoid in your diet all vinegars, pickles, sour wines, malt drinks, and salt provisions of all kinds. Touch no fresh pork under no circumstance. Use black tea and no coffee. Eat roast beef, rare, boiled steak, mutton chops, well done, toasted bread, and all kinds of vegetables. This course of treatment continued for some time is said to have cured some cases of consumption that were far advanced.

An Improved Text-Book

Ridapth's History of the United States, which, we are informed, is in use in more than 1500 schools in this State appears to us to be peculiarly adapted to the purpose of a school history, and worthy of general adoption. It is excellent in narrative and arrangement, progressive maps, chronological charts topographical diagrams, appropriate illustrations, freshness of data and general make up, and in many of these particulars superior to any school history we have examined.

It appears to us very complete and desirable. Its plan embraces some excellent helps for the pupil which are peculiar to this work, and invests it with great interest and permanent value to both old and young. Those who examine it with considerable care, will never regret the time devoted to it, and they will certainly have occasion to be thankful that their attention has been directed to so good a book for the instruction of youth in the great facts of our national record.

Proposed New Penitentiary.—Senator Fisher, of Huntingdon, has introduced a bill in the Senate providing for the erection of a penitentiary in the middle district of Pennsylvania—the district to embrace the counties of Huntingdon, Blair, Cambria, Clinton, Centre, Clearfield, Somerset, Bedford, Fulton, Franklin, Mifflin, Juniata, Perry, Dauphin, Snyder and Union. The bill provides for an expenditure of $100,000 for the purchase of a site, and the commencement of work on the building. The sight is to consist of not less than fifteen acres of ground to be selected by a board of thirteen commissioners. The penitentiary is to have an accommodating capacity of 500 This penitentiary is recommended to be built because of the crowded condition of the eastern and western penitentiaries. Middleburg would be a central situation for such a building, with and number of fine sites in its neighborhood.

Sensible Remedy for Coughs.—A practical house wife sends the following receipt for making an infallable cough medicine, which is particularly opportune at this season of the year when violent colds are being contracted by the sudden changes of the weather. Take a teaspoonful of wool liquorice (liquorice in the wood) a tablespoon slippery elm and a tablespoon of good raisins. Cut into small pieces each ingredient, add one pint of water and let the mixture simmer over a slow fire, until nearly the boiling point in order to extract the strength. When ready for use there should be exactly half a pint quantity, as water may have to be added while steeping. Select the best materials. The seeds must not be removed from the raisins—the finer the latter are cut the better. This remedy has been tried and found to be an excellent one in hundreds of cases. The slippery elm removes the inflammation; the raisins strengthen, and the liquorice heals as fast as the inflammation is allayed. Dose—a teaspoonful every time one coughs or experiences a tickling sensation.

CHRISTIAN HAGER'S REMAINS FOUND.—About two years ago, or over, Mr. Christian Hager, who was the owner of a tract of land and a saw mill in Sugar Valley, left Lock Haven some time in the afternoon for home, a distance of 12 or 14 miles. [illegible] was heard of him until about ten days ago, when two hunters found his bones on the Sugar Valley Mountain. In his decayed clothing was found one hundred and forty dollars, but the bills were so weather-beaten and rotten they could scarcely be handled. On the bone of one of his fingers was found a silver ring on whice was the initials 'C. H' By this ring it is positively known that the wearer was Christian Hager. At the time of his disappearance various stories and predictions were afloat speculative of the event. It was known that he had gone to Lock Haven for money, and it was also known that he had gotten it, and by many it was supposed that he had been robbed and his body buried. By others it was supposed that he had left the country, as it was known that his financial troubles were weighing upon his mind. But now the mystery is solved. What caused his death is, of course, not known. His widow and family at present are at New Columbia. It is said that his life was insured for $10,000.—*Daily Miltonian.*

HOW TO JUDGE OF POULTRY.—People who buy poultry are often at a loss in judging of the age and condition of a fowl. In order to aid our readers in this important matter we republish from an exchange a few leading points to be observed in making such purchases:

If a hen's spur is hard and the scales on the legs are rough she is old, whether you see her head or not, but her head will corroborate your observation. If the under bill is so stiff that you cannot bend it down and the comb thick and rough leave her, no matter how fat and plump, for some one less particular. A young hen has only the rudiments of spurs; the scales on the legs are smooth, glossy and fresh colored, whatever the color may be, the claws tender and short the nails sharp, the under bill soft and the comb thin and smooth.

An old turkey has rough scales on the legs, callosities on the soles of the feet and long strong claws; a young one the reverse of all these marks. When the feathers are on, the old turkey cock has a long tuft or beard, a young one but a spouting one, and when they are off the smooth scales on the legs decide the point beside the difference in size or the wattles of the neck and in the elastic spoot upon the nose.

An old goose when alive is known by the rough legs, the strength of the wings particularly at the pinions, the thickness and strength of the bill and firmness of the feathers and when plucked, by the legs, the tenderness of the skin under the wings, by the pinions and the bill and the coarseness of the skin.

Ducks are distinguished by *the same means*, but there is the *difference that a* duckling's bill is much longer in proportion to the breadth of the head than the old duck's.

COUNTY INSTITUTE.—VI.

Wednesday afternoon Session.

Prof. Rauh continued the subject of arithmetic, showing how to calculate interest on monthly installments.

After recess Prof. Carter gave an exercise in music, showing how it may be taught in the public schools. He thinks that the elementary principles of harmony should be taught. Teachers should qualify themselves to teach the principles of music. Singing by note, or by the ear, may do well enough for those who cannot do better, but the teachers of the enlightened age, should be able to use their brains in connection with their vocal organs and ears.

Prof. Noetling followed with an exercise in reading. He wrote a number of short extracts on the board, for the purpose of drilling the teachers in emphasis and inflection. He asked the teachers to read the different sentences, changing the emphasis sometimes emphasizing one word, and afterwards reading the same exercise again and emphasizing another. He did the same with the inflections. A sentence was first read with the rising inflection, and after words with the falling, and the change in meaning observed. The Prof. clearly demonstrated to the Institute that emphasis and inflection govern the sense in reading, and that wherever we change either, we change the latter also.

Prof Rauh next spoke on school management. He thinks that misfortune is the fallure to teaching are due to the inabilities of the teachers to govern. Incompetency may also have something to do with failures, but government has more to do with it. Every school room should be made a pleasant place. It is only a place it is much easier to govern boys and girls—than in one that lacks attractiveness. The pleasantness at home is one of the main reasons why so many boys leave it and go elsewhere. Almost every teacher who makes his schoolroom pleasant meets with success. In the Fall, plants should be put into pots and taken to the school. They make the room pleasant and agreeable. Mottoes also should be found in a school. They destroy the blackness of the walls, and teach good moral precepts. A good plan is to select some of the best maps drawn by the pupils and to hang them on the walls; or, if the teacher can do it, he should get chromos, steel-engravings, or any other suitable pictures and hang them up.

To manage boys and girls well, a teacher must get them to assist him in whatever they may be able to do, especially in ornamenting and beautifying the schoolroom. If he asks them to do him favors they generally will take a liking to him.

Cabinets should be formed, and the pupils urged to gather leaves, specimens of rocks, ores and fossils, and to assort them. Such a collection of objects will enable the teacher in the best possible way to give object lessons in every branch of natural history.

A teacher should not fail to see to it that his walls and floor are clean. Nut-shells should not be permitted to accumulate upon the latter. Any one who throws them there should be required to clean them up.
