The Human Family are constantly using Bitters and Tonics to build up and strengthen the system. Domestic animals, whose lives and habits more nearly resemble man's, should be subjected to the same treatment. Foutz's Horse and Cattle Powders will accomplish all that is claimed for them.

NOT CORRECT.—The item, now going the rounds of the press, in regard to the finding of the remains of Christian Hager in the Sugar Valley mountains, is stated by a correspondent of the Democrat, to be not correct. In fact it was a hoax gotten up by a resident of the Valley to fool the good citizens of the vicinity.—*Daily Miltonian.*

An exchange says: "Don't grease your pancake griddle and thereby advertise to your neighbor just what you are having for breakfast—to say nothing about smoking yourself out of house and home, but after each griddle full, rub it smartly with a teaspoonfull of coarse salt and a wad of brown paper and the cakes will not stick,

A deaf and dumb man recently died in *Harrisburg*, at the age of twenty-one years. Just previous to his death, he called out in a loud voice to his sister, who was in another room repeating her name several times. The sister scarcely crediting her own hearing, hastened to his bed-side, and found that it was really true. He had called to her. In a few moments he was dead.

JURY COMMISSIONERS.—A bill has been introduced into the Senate to abolish the office of jury commissioners and have that duty performed by the county commissioners. This was formerly the law, but the office of jury commissioner was created and minority representation provided for to obviate the selection of partisan juries as was the custom under the old law. But this reason has no longer any force, as the minority are now represented in the Board of Commissioners. The office is useless expense now and should be abolished.—*Ex.*

The Lewistown *Gazette* tells of an encounter a couple of hunters recently had with a bear on Black Log mountain. Mart. Whitzell and brother, while hunting on Black Log, encountered a bear which they had previously wounded with rifles, but showed considerable pluck. When met, the game was having a free fight with four dogs with which the Wetzells were hunting. Not caring to see the dogs abused one of the brothers attacked the bear with a hatchet; the sport getting a little warm, his brother came to his relief, killing the bear.

MR. W. H. HAINES formely of this County now at Auburn Kansas, writing to a friend in this place, says: I like Kansas very well, game of all kinds is very plenty. During the fall and Winter, I shot 373 squirrels, 196 Rabbits, 305 prairie chickens, 36 quails 14 flickers, 1 antelope, 2 wolves, 19 chicken hawks, 22 crows, 1 musk rat, 1 ground squirrel." Tall shooting that, Oh for a lodge in some vast wilderness, where wolves, crows and chicken-hawks abound.

*Trades and Professions of Members of the Legislature*—The following are the ages and occupations of the members of the present legislature: Of the senate, 21 are lawyers, 7 physicians, 6 merchants, 5 farmers, 3 journalists, 2 manufacturers, 2 contractors, 2 politicians, 1 teacher and 1 oil producer. The oldest senator H. G. Bussey, of York, born in 1816, and youngest is J. C. Newmyer, of Allegheny, born 1848. Of the representatives, 52 are merchants, 41 are tradesmen and clerks, 37 farmers, 24 lawyers, 15 physicians, 10 manufacturers, 8 teachers, 6 oil producers, 3 editors, 2 bankers, 2 railroad conductors and 1 hotel keeper. Henry Scarborough, of Berks born in 1806, is the oldest representative, and Samuel S. Jones, of Luzerne, born in 1850, is the youngest.—*Harrisburg Patriot.*

A NEW CEMENT.—The New York Tribune gives the following recipe for a cement of superior character for uniting stone and resisting the action of water. It becomes as hard as stone in unchangeable in the air, and resists the action of acids. It is made by mixing together nineteen pounds of sulphur, and forty-two pounds of pulverized stoneware and glass. This mixture is exposed to gentle heat until the sulphur melts, when the mass is stirred until it has become thoroughly homogeneous, and then run into moulds and permitted to cool. When required for use it is heated to 248 degrees Fahrenheit, at which temperature it melts, and may be employed in the usual manner. At 230 degrees Fahrenheit, it becomes as hard as stone, and preserves its solidity in boiling water.

The *Mauch Chunk Coal Gazette* says: The Strohl family, of Northumberland county, is probably the largest family in the United States. The head of the house is Nicholas Strohl, a Pennsylvania German, now about 76 years old. By three wives he has had 30 children, 27 of whom are living. The first wife presented him with 8, his second with 11, and the third with 11. The youngest child is now three years old, and was born when its father was 73 years old. Of the 27 children 19 are married, and their families average about 8 children. Mr. Joel Strohl, one of the well-known farmers in the lower end and child of his father's first wife, has 17 children, and is not an old man. He is the father of two pairs of twins, a distinction which his father, Mr. Nicholas Strohl, never attained. If the families should gather together there would be over 200 persons. They nearly all reside in this county. Old Mr. Strohl is still hearty and bids fair to live many years.

IMPURE COAL OIL.—The *Parker City Daily*, issued in the centre of Pennsylvania oil regions, has this to say about impure grades of refined petroleum so universally used—danger to property, danger to life, more danger than the people using it know of. If the oil now put on the market was only freed of half its deleterious particles there would be no occasion for the press of the country to keep signals constantly flying to warn consumers of their peril, but where explosive compounds are foisted upon the people under the disguise of illuminants, it is absolutely necessary that something be done to destroy the danger that lurks in every household."

The same journal adds: "Every community should immediately adopt measures to prevent the coming into its midst any and all grades of poor quality oil.—This they can and should do by ordinance. They should ignor the inspector's stamp and proceed as though the fluid had never passed through his hands. This is the only means of securing safety, and this safety is the people's right—a right that should not be withheld from them by those in whose power it is to award it."

Saturday Feb., 2d. was Candlemas Day—a day that is noted in England as a religious festival, associated with the mass of the Roman Catholic church, with which we presume it had its origin.

In several localities in this State—and it may be in other States also so far as we know—the 2nd of February is known as "Ground Hog Day"—a weather prognosticator. It is the belief, at least the assertion of not a few good people, that if the sun shines on the 2nd, of February, when the animal comes out from his cozy winter-quarters and can see his shadow, he will return to them and there remain for six weeks to escape the severe winter weather that is sure to prevail during that period; but if the day be cloudy or foggy, so that he cannot see his beautiful shadow, he will stay out and enjoy on the surface of the ground all the good things of the season, because the six weeks following the cloudy or foggy 2nd of February will be mild winter weather.—It is no sign to believe the ground hog theory, and those who wish to do it should enjoy their opinion, But so far as our observation goes, we regard it as a humbug.

FLOUR.—Can you tell good flour from bad? If you speak with millers and dealers in the article you will find few who will assert their ability to always tell the one from the other. Some time ago a dealer shipped a car load of flour to the coal regions. After it was there, the discovery was made that a number of sacks of poor flour had by mistake been mixed with the sacks of good. Says the dealer to the miller known to be a good judge of the article: 'I will give you $50 and pay you expenses if you will go there and select the sacks of good flour from the poor.' But the miller answered that he could not do it, nor could any other man. Millers and dealers have several ways of 'trying' flour, but they are never sure that it is good until they see it in bread. Among others, a dealer will say he tells good flour by throwing a little against a smooth perpendicular place. If it adheres there it is good if not bad. Another takes a portion in his hand. If it makes a good smooth impression, it is good. Another will put it within the folds of paper, and if it is smooth will pronounce it good. Another will toss it against the ceiling and if it adheres it is a favorable sign. But they will all say, that there are many cases when these tests hold good and yet the flour will not bake well. The dealers have their theories, too, in regard to wheat; but often the prettyest looking wheat does not make the best of flour. There is great room for study for the miller and the dealer see that when we complain of

DEATH OF HON. JOHN A. GAMBLE.—We announced yesterday the serious illness of Hon. John A. Gamble from an attack of paralysis. Inteligence has been received that he died on Thursday morning at 2 o'clock.—*Sunbury Daily American.*

FRIGHTFUL ACCIDENT.—An accident of a shocking nature occurred at Tippett's boilers works, about ten o'clock yesterday afternoon which resulted in one of the workmen named William Murphy, being maimed for life. Murphy is a boiler maker by occupation, aged about thirty years, and has been working off and on at the works for some time. Yesterday, at the hour above designated, while Murphy and another mechanic, were about to tighten a belt which had been thrown from the pully for that purpose, and were standing on the platform about twelve feet above the ground—Heller engaged in lacing the belt and Murphy holding it up with his right hand—by some unaccountable occurrence Murphy's coat sleeve caught in the shafting while the powerful engine was making about 250 revolutions per minute, and before he could extricate his arm he was carried upward against the pulley, where he braced himself with a powerful effort with his left hand and actually stood the fearful strain until his right arm was wound up in the belting and torn off about half way between the elbow and shoulder. The unfortunate man then dropped to the floor, his fellow workmen gathering around him as soon as possible to render assistance. The engine was then stopped and the mangled arm removed. Had not the unfortunate mechanic (who is a strong, muscular man) braced himself with a deathlike 'purchase' he would most likely have been carried among the machinery and horribly mangled. He was assisted to walk to Dr. Free's office, opposite the works, where, after the bleeding stump was bound up, he was placed upon a street car and taken to the hospital. Dr. DuNott, assisted by the faculty, made a clean amputation, of the arm about an hour after the accident occurred, cutting off the ragged stump about three inches below the shoulder. Murphy is married and has a wife and two children risiding in one of Mr. Tippett's tenant houses an Indian alley, south Harrisburg. He was doing well as could be expected under the circumstances at nine o'clock last evening.—*Harrisburg Patriot 4th inst.*

### Remarkable Success.

The success of the leading literary paper of the West THE CHICAGO LEDGER, is truly remarkable. Since its introduction to the reading public, six years ago. The Ledger has steadily advanced in favor, and is now acknowledged second to no paper of the kind in the country. Its circulation is national, and has been obtained through the efforts of its publishers to produce a paper of high moral character, and at the same time sell it at a price consistent with the present hard times. That they have succeeded and well, too, the thousands of readers of THE LEDGER scattered from Maine to Texas and from Oregon to Florida will bear testimony. THE CHICAGO LEDGER is a large forty-eight column weekly paper, which contains stories both complete and continued, in each number, written by the best authors of the day, and a great variety of information interesting to everyone. The subscription price of THE LEDGER is only $1.50 per year, postage paid, and it is equal in every particular to other papers of the same character which sell for $3 a year. Three copies of this valuable paper will be sent to any one who sends 10 cents and their address to THE LEDGER, Chicago, Ill.

The Standard Remedies for all diseases of the lungs are SCHENCK'S PULMONIC SYRUP, SCHENCK'S SEA WEED TONIC, AND SCHENCK'S MANDRAKE PILLS, and if taken before the lungs are destroyed they affect a speedy cure To these medicines Dr. J. H. Schenck, of Philadelphia, owes his unrivalled success in the treatment of pulmonary disease. The Pulmonic Syrup ripens the morbid matter in the lungs, nature throws it off by an easy expectorant, and the patient has relief from the prostrating cough. The Mandrake Pills must be freely used to cleanse and stimulate the stomach and liver; they remove all obstructions, relax the gall bladder and start the bile freely, and the liver is soon relieved. Schenck's Sea Weed Tonic is a gentle stimulant and alternative: the alkali of which it is composed mixes with the food and prevents souring. It assists the digestion by toning up the stomach to a healthy condition, so that the food and the Pulmonic Syrup will make good blood; then the lungs heal, and the patient will surely get well if care is taken to avoid fresh cold. Full directions accompany each preparation. All who wish to consult Dr Schenck personally, can do so at his principal office, corner of 8th and Arch Sts., Philadelphia, every Monday.

Letters to the above address, asking advice, answered free of charge.

Schenck's Medicines are sold by all druggists.
