

Farm, Home, &c.
Fruit Cake.—One pound of sugar, one pound of flour, one half pound butter, one pint sour cream, one pound raisins, one teaspoonful soda, and one of cinnamon.

To Cure Hoarseness.—A small quantity of pulverized borax, about the size of a pea, dissolved in the mouth and let slowly run down the throat will stop the tickling and a cure hoarseness almost instantly.

A man in Salem, Oregon, cleared his premises of rats by catching and pouring carbolic acid over it and burning it loose. The odor of their unfortunate friend appears to have convinced the other rats of the propriety of going elsewhere.

For Hoarseness.—For sick headache, induced by bilious derangement, steep five cents worth of soda and camomile flowers in a little water, to make strong decoction, and take. It has been tried successfully in various cases.

Paint to last long should be put on early in winter or spring, when it is cold and when no dust is flying. Paint put on in cold weather forms a body or coat upon the surface of the wood that becomes hard and resists weather, or even an edge tool, almost like slate.

Sprains and Bruises in Horses.—Dissolve an ounce of camphor in eight ounces of spirits of wine; then add one ounce of spirits of turpentine, one ounce of spirits of sal ammoniac, half an ounce of oil of origanum and a tablespoonful of laudanum. Rub it a quarter of an hour with the hand, four times a day.

All fruit trees like a rather dry, rich soil. On a cold clayey bottom diseases are usually frequent. Do not plant deep; cut off tap roots, and encourage surface fibers. Surface manuring is the best mode of doing this after the tree is planted. Do not allow any thing to grow vigorously around your trees the first year of planting nor allow the soil to become hard or dry.

To drain a depression in a field where a clayey or hard pan subsol prevents the sinking of rain water and the laying of the land is unfavorable for ordinary methods of drainage, first dig a hole as if for a well, through the excavated earth so as to allow the surface water free access to the pit, and standing water will never injure the grass or green crop in that part of the field.

Cough Syrup.—Put five cents worth of pine pitch into a pint of water. Let it simmer until the water is well impregnated with the flavor. Dip out the gum which remains undissolved and add honey enough to sweeten and make a thick syrup. Strain this and bottle. Dose, a teaspoonful four or five times a day, according to the severity of the cough. It will afford speedy relief.

Eggs hatch much better if the nests are made by placing a cut turf, and shovel of mould, sand or ashes in the box or basket, and on this a little straw, than if straw only is used. In this way a convenient hollow is obtained, that prevents the eggs rolling out from under the setting hen. In cool weather the eggs are thus kept of a much more equable temperature than in nests made simply of loose straw.

Brine for Lice on Cattle.—A stock grower writing to the New York club, gives his mode of destroying lice on cattle. He says: "I destroy them with brine—any kind of salt water will do it. I find two kinds of lice; the blue lice, and I think the other is hen lice. I tried red precipitate one year; it killed the lice, two yearlings, and a two-year old. But washing the cattle with brine is easier, and they get into the habit of licking one another, and are more gentle toward each other."

The quickest way to improve our pastures when short of manure is to top-dress them, or to pasture sheep for a season, as these animals will exterminate such weeds and grasses as cows will not eat. If the pasture cannot be given up to sheep, pasture as many sheep as cows, and it will be found that the pasture will sustain as many cows as when they were pastured alone, while the fertility of the pasture will allow an increase in cows of at least ten per cent. annually.

Insects must be looked after now. The clusters of eggs of the tent caterpillar may easily be seen against the sky in a dull day; they are to be looked for as a ring about three-fourths of an inch wide, near the ends of the twigs. Cutting and burning one of these destroys about five hundred caterpillars. The caterpillar has unfortunately reached places where it was not known a few years ago. The insects come out of the ground in early spring—sometimes in February in a warm time—ascend the tree to lay their eggs.

Lamp Explosions.—Many of these may be prevented by trimming the wick daily. When burned for several evenings without trimming, the wick becomes blacked, clogged, and incapable of supplying the oil clearly and uniformly, and the chimneys are sometimes filled with flame and smoke, to the embarrassment and alarm of those present. Some explosions would be prevented by never blowing out the lamp down the chimney; for if the wick happens to be too small, the flame may be driven down into the oil. The best way is to turn it down with the button until extinguished.

SELINGSGROVE MARBLE WORKS.

The undersigned having purchased the Selinsgrove Marble Works, he is now fully prepared to manufacture

Monuments and Headstones.

this summer at prices much lower than heretofore, and lower than has ever been done in the county.

Having just received a large lot of Designs of all the latest styles of Monuments & Headstones, and able to give satisfaction in style and price, to all that wish to decorate their graves with a neat, cheap Monument, Tomb or Headstone.

I have also made arrangements, so as to be able to furnish on short notice, Sandstone, or any other kind of door and Window Sills, at prices not to be met elsewhere.

Persons in need of any of the above articles will save money by calling at the Selinsgrove Marble Works before purchasing elsewhere.

I also keep Hank's Patent Oil-treated Carriage Guards for sale. Five different styles. Come and see.

Mr. J. H. Long, of Adamsburg, is agent for the undersigned where all orders will receive prompt attention.
