

HEADQUARTERS REPUBLICAN STATE CONVENTION, HARRISBURG, MARCH 27, 1878. In pursuance of a resolution of the Republican State Committee, adopted at a meeting held in Harrisburg this day, a Republican State Convention (to be composed of delegates from each Senatorial and Representative district to the number to which such district is entitled in the Legislature) is hereby called to meet in the city of Harrisburg at twelve o'clock noon, on Wednesday, May 15, 1878, for the purpose of nominating one person for Governor, one person for Lieutenant Governor, one person for Secretary of Internal Affairs, and one person for Judge of the Supreme Court. By order of the Committee.

WILLIAM P. WILSON, Chairman. JOHN A. SNELL, Secretary.

The Income Tax. As the Ways and Means Committee have decided to report a measure re-imposing the income tax we shall soon have a revival in Congress of that broomy Western and Southern eloquence which has so often shown how atrociously criminal it is for the Eastern States to have more money than other States, and that the only atonement they can make is to pay all the taxes. It is proposed to assess two per cent on all incomes above two thousand dollars. This, therefore, is not exclusively a tax on the rich man, and must necessarily give the tax an extensive application in every part of the country if the bill shall ever become a law. For a good while there have been murmurs that the West and South would insist upon the revival of this tax, because under their section, as the relatively less moneyed districts, would escape easily, while the Eastern States would pay heavily. But the very fact that under this tax the burden falls on communities not in proportion to population is one which constitutes the tax an illegal one. It can only be justly imposed in such a way that New York and Illinois will equally pay, not according to the number of people in each, and if it is imposed otherwise its collection will be opposed in the courts.

SPECIAL RESUMPTION.—At a conference at the United States sub-treasury in New York last week, between Secretary Sherman and the members of the late syndicate, resulted in the signing of a contract for the sale of \$50,000,000 of 4 per centum bonds. The details of the negotiations, including the method of payments, are withheld in the official statement of the "transaction given out at the sub-treasury, and of which the following is a copy:

The secretary of the treasury and the members of the last syndicate have entered into an agreement for the sale, for resumption purposes, of \$50,000,000 of 4 per centum bonds, to be subscribed immediately and \$5,000,000 per month, during the balance of the year.

The sale of 4 per cent. bonds will be continued by the treasury department as heretofore upon the terms and conditions of the last circular and the proceeds will be applied to the redemption of the 6 per cent. 5 2/3 bonds.

THIRTY-SIX thousand dollars have been recently appropriated to strengthen, renew or repair the foundations of the Washington monument in the city of that name. Nearly a generation has passed since the original foundation was laid. If history records it aright President Taylor lost his life from exposure on that occasion, and eating too heartily of blackberries and milk after listening to the classic eloquence evolved on that memorable Fourth of July. It is questionable whether any foundation can be made at the present site that will support the proposed shaft of five hundred and fifty feet. It would seem to be wiser to take down the work already done and build upon soil that can stand the pressure. This work has been a subject of ridicule and shame long enough. It should be either completed at once or "eliminated."

The responsibility for the confederate defeat at Gettysburg, like the credit of the Union victory, has been a bone of contention among military men, and Gen. Longstreet's strenuous efforts to shift the blame from his shoulders upon Lee's has provoked a lengthy article on the other side from Fitzhugh Lee, which meets with general favor in the South, and which contains a letter from a prominent Southern officer who says that Gen. Lee told him "that battle would have been gained if Gen. Longstreet had obeyed the order given him, and had made the attack early instead of late." He said further, "Gen. Longstreet, when once in fight, was a most brilliant soldier; but he was the hardest man to move I had in the army."

The resumption of specie payment is virtually accomplished. For some time past gold has been paid out in change over the counter of A. T. Stewart's great store in New York, and other large establishments. On Monday last the principal banks of Chicago and Cincinnati announced that they would redeem their notes in gold. The Pittsburg national bank of this State made the same announcement. Gold is now quoted at only one quarter of a cent premium, and will soon be worth only its face value, when greenbacks will be at a premium. And thus is vindicated the wisdom of Horace Greeley's oft-repeated argument—"the way to resumption is to resume."

The war cloud in Europe has not yet been dispelled.

The public debt of Pennsylvania, State and municipal, is nearly \$450,000,000.

Government land costs \$1.25 an acre, and whiskey \$2. a bottle. And yet there are many who prefer whiskey to land!

Chester, last Saturday, had a big demonstration against the "Wool" tariff bill. Senator Blaine was the hero of the day.

The bill to repeal the bankrupt law has passed the United States Senate.—There is very little doubt that it will also pass the House.

Sherman expects to be able to resume gold payments by the 1st of January, whether Congress repeals the resumption bill or not.

The bell punch would be an immense card for the saloon keeper the first few days. The boys by hundreds would step in and smile, just to hear the bell ring.

William Phillips one of the Pittsburg rioters, tried for murder at that place, after the most condemnatory evidence was acquired by the Jury. Pittsburg has a keen sense of justice.

At a caucus of the Republican members of the House at Harrisburg on Monday evening of last week it was resolved to close the session of the Legislature by final adjournment the 24th of May.

It is slowly but surely coming. The Northwestern Bank of Chicago, and the Third National of Cincinnati are redeeming their notes in gold; and this course will soon be followed by all the leading banks of the country.

Another Mollie Maguire was convicted of murder in Mauch Chunk on Saturday last. It would seem that the only way to end this infamous organization is to hang all of its members, and the prospects of such a consummation are exceedingly good.

The Republican committee of Union county elected George W. Schoeb, editor of the Millburg Telegraph, delegate to the State Convention on Saturday, by a vote of 23 to 13 for Dr. Rook, with instructions to vote for Wickesham for Governor all the time.—Phila. Times, 22nd inst.

MONTGOMERY BLAIR'S Presidential ejection project cannot get a paternity even in the Maryland delegation in Congress, with whom Mr. Blair has been working in vain. Each particular Representative shrinks from the notoriety which would result from allowing his name to be associated with the scheme.

Mrs. Tilton, publishes a confession in the New York papers of last Monday, in which she says that the charge brought by her husband of adultery between herself and Henry Ward Beecher is untrue. Mr. Beecher confronts the confession with an explicit and absolute denial.

The special commission appointed under resolution of the State Legislature to select subjects for the statutory to be contributed by this State to the national collection in the old Hall of Representatives at Washington city, have agreed on General Peter Muhlenberg and Robert Fulton as the representative Pennsylvanians worthy of being handed down to posterity in enduring marble.

GEN. JACOB M. CAMPBELL of Johnstown, Cambria county, member of Congress from the Bedford, Blair, Cambria and Somerset district, has been appointed as Pennsylvania's representative on the National Republican Congressional Committee, to succeed Gen. Cameron. The selection is a good one, and is announced as giving satisfaction to the Republican leaders.

A New Country.—The bill providing for the division of Luzerne county passed the Senate on third reading last week by a vote of 38 yeas to 4 nays. The bill now awaits the signature of the Governor to become a law. The new county will be called Lackawanna, with Scranton as the county seat. Wilkesbarre will remain the county seat of Luzerne. Luzerne county had a population of 160,915 by the census of 1870. Scranton the county town of the new county of Lackawanna had a population of 35,093 in 1870.

There is a good deal of horse sense in the suggestion of the Atlanta (Ga.) Constitution, that if the South is satisfied with Mr. Hayes' Southern policy, the divided North has no right to complain, and if it does, what are its wrangling politicians going to do about it? A man and a half or two small men may be in a majority in corner grocery controversy, but when the case has broader bearing and is submitted to the arbitration of a general tribunal a reversal of judgment is quite likely to follow in interests of justice and common sense.

There is pathos, real and unfeigned, in the closing passage of Mr. Christian Rosen's lecture concerning his lost Charley when he compares his quest to search in a deep, dark abyss by the light of a taper, where he hears now and then a little voice in the darkness crying, "This way, papa, hear I am!" but when he goes in the direction of the sound he finds it is only the voice of his own hopes and the whispering of his own heart.

ABOLISHED.—Gov. Hartranft has signed the bill abolishing the "pruety vailor girl" system, so popular in Pittsburgh. Its provisions are general. It prohibits proprietors of places in which intoxicating liquors are sold from employing females to dispense drinks, under a penalty not exceeding \$500 or imprisonment for one year. No license to sell intoxicating liquors is allowed to be issued unless with the express understanding that the applicant does not employ any females for the purposes indicated. In addition to the fine and imprisonment provided for, the act requires the forfeiture of liquors.

A Million of Dollars. Seems a great deal of money, but Oak Hall just now contains about a million dollars' worth of superior clothing for men and boys. Entering this month on its eighteenth year, Oak Hall brings to its work of clothing the people an immense and valuable experience in knowing exactly what the people want and in being able to furnish it at the lowest figures.

The present Spring stock at Oak Hall has been prepared with even more than ordinary care. In Spring overcoats, every style; in neck wear, the nicest novelties; in boys' suits an immense variety; in business and dress suits for men, all descriptions. The advantages of dealing where the stock is so ample as to furnish abundant opportunity for selection, both as to style and size are too obvious to need more than passing mention.

The old rules prevail at Oak Hall. Promptness, politeness, cash and complete satisfaction guaranteed. The fitting of each article with its lowest price, from which there is no abatement, is a great convenience to all concerned.

The custom department of Oak Hall is one of its chief features, and the facility with which goods may be ordered by mail sent from Oak Hall by express, brings the people's great Clothing Establishment to the doors of all our readers.

A timely dose of Schenck's Mandrake Pills is sure to prevent an attack of biliousness, when a short neglect of the warning symptoms may develop a serious case of fever, either bilious, remittent or typhoid.

Schenck's Mandrake Pills remove all causes of biliousness, promptly start the secretions of the liver, and give a healthy tone to the entire system. It is no ordinary discovery in medical science to have found a harmless cure for this stubborn complaint, which accomplishes all the results heretofore produced by a free use of calomel, a mineral purgative, or other cathartics, and is acknowledged to be destructive in the extreme to the human system. The properties of certain vegetable compounds, the virtue of calomel without its injurious qualities, is now an admitted fact, rendered indisputable by scientific tests. Those who use the Mandrake Pills are fully satisfied that the best medicine for biliousness, promptly start the secretions of the liver, and give a healthy tone to the entire system. It is no ordinary discovery in medical science to have found a harmless cure for this stubborn complaint, which accomplishes all the results heretofore produced by a free use of calomel, a mineral purgative, or other cathartics, and is acknowledged to be destructive in the extreme to the human system. It is no ordinary discovery in medical science to have found a harmless cure for this stubborn complaint, which accomplishes all the results heretofore produced by a free use of calomel, a mineral purgative, or other cathartics, and is acknowledged to be destructive in the extreme to the human system. The properties of certain vegetable compounds, the virtue of calomel without its injurious qualities, is now an admitted fact, rendered indisputable by scientific tests. Those who use the Mandrake Pills are fully satisfied that the best medicine for biliousness, promptly start the secretions of the liver, and give a healthy tone to the entire system. It is no ordinary discovery in medical science to have found a harmless cure for this stubborn complaint, which accomplishes all the results heretofore produced by a free use of calomel, a mineral purgative, or other cathartics, and is acknowledged to be destructive in the extreme to the human system.
