Wolf Teeth in Horses.

The so-called wolf-teeth are in themselves harmless enough, yet the popular prejudice has a foundation which it would be well for horsemen to ignore. Most diseases of the eyes occur at that period of life when the milk-teeth are being most rapidly shed and the permanent teeth are coming up. To suppose that a horse suffers nothing in cutting his teeth is a great mistake, as is shown by the frequently slow and painful mastication of some young animals, by the dropping of food in a half chewed condition, and by the heat, redness and swelling of the palate and gums. That red, swollen and tender state of the roof of the mouth behind the front teeth, familiarly known as "lampas," is but an indication of his teething trouble; and in not a few instances it renders the animal feverish, weak, and, by virtue of the general congestion of the head, strongly predisposed to inflammation of the eyes. The wolf teeth are in the mouth during the greater part of this period of teething, and are usually shed towards its completion; so that once it is hinted that these are the cause of the trouble with the eyes, the owner, looking into the mouth, seems to find ample confirmation of the statement. The wolf teeth are, however, the most harmless in the mouth, having long ago reached their full development, and are but slightly inserted in their sockets; while the great and dangerous irritation attends on the cutting of the large grinding teeth, and in the male, of the tushes. The presence of the wolf teeth in the mouth at this time is an accident, and not an injury. The temporary recovery often following their removal would have taken place all the same had they been left in the mouth, and a later attack is just as likely as if they were present. The excitement attendant on teething is natural; what we should guard against is its excess. Any constiveness of the bowels should be corrected by the feeding, or, if necessary, by 1 oz. Glauber's salt daily. Teeth pressing painfully beneath tense, resistant, painful gums, indicate the need of the lancet; teeth entangled on the crowns of their successors should be removed; all excessive swelling, redness and tenderness of the gums demand lancing; and, finally, all unnecessary excitement or exhaustion should be avoided.—*National Live-Stock Journal, Chicago.*

Tomato Vines.—If there is any truth in the following it is important: A statement comes from South America that a single property of tomato leaves has been discovered by a fruit-grower. Having cut down some tomato vines he used them as a mulch around his peach trees. He soon discovered that the curculio, which was destroying his fruit, had abandoned the trees surrounded by the tomato vines. Following up this accidental discovery, the free use of tomato vines proved a perfect protection, not only against the curculio, but other noxious insects.

When to Water.—Horses should be watered in the morning before they are fed. A full drink of water immediately after being fed is a sure way of producing indigestion, if not inflammation. When water is drunk by horses, the bulk of it goes directly to the large intestines, and little of it is retained in the stomach. Some old and worthless horses, by way of experiment, were fed with split peas, and then supplied with water immediately before being killed. It was found that the water had carried the peas from fifty to sixty feet into the intestines where no digestion took place at all.

Coffee in Typhoid Fever.—Dr. Guillasse, of the French Navy, reports that, in the early stages of the disease coffee is almost a specific against typhoid fever. He gives to adults two or three tablespoons of strong black coffee every two hours, alternating with one or two tablespoonfuls of claret or Burgundy wine. The beneficial effects is immediate. A little lemonade or citrate of magnesia should be given daily, after awhile quinine.

The Hessian Fly is the most trouble some upon the early sown wheat—that sown after the 15th of this month is not generally damaged—but it makes smaller growth before winter sets in, and so far as that goes it is a disadvantage to sow late, excepting on well prepared land. A farmer of our acquaintance (in the State of New York) for many years sowed his wheat the first week in October, and his average yield has been over 40 bushels per acre. He was first led to practice late sowing to avoid the Hessian Fly, but the practice proved so satisfactory that it was continued after the fly had disappeared. His land was in high condition, and a top dressing of fine manure was applied to give the young plants a good start. It may be better to sow late if a thorough preparation of the soil is thereby secured.

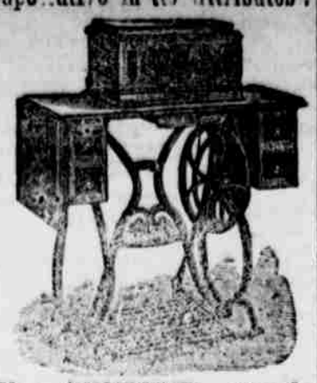
Supe'lative in its Attributes!



The "WHITE" stands acknowledged King of all Sewing Machines.

Important and Cautionary Notice to all intending purchasers of sewing Machines.

Office WHITE SEWING MACHINE Co.
CLEVELAND, O., May 27, 1869.

We particularly call your attention to the fact that we stamp a number in plain, distinct figures on the back shuttle-race slide of each machine and keep a record of such numbers. When sold, a WARRANTY FOR FIVE YEARS is given to the purchaser. This warrant bears the name of the agent who purchased the machine from us, as also the date of purchase and a number corresponding to the slide number. The warrant is signed by us, and has the official seal of our company stamped upon it. All other warrants in our name are spurious, and parties finding the slide NUMBERS MUTILATED OR DEFACED, and no warranty to correspond with the above description, may know at once that sooner or later the owner will be involved in trouble, with no one to fall back upon.

The sewing "White" is to-day the most popular machine upon the market, the cheapest, and not to wear or soil. A larger number of the "White" have been made and sold since they were placed upon the market, than any other make in the same length of time since Sewing Machines were invented. Their lightness, speed, space, beauty, quietness, durability, and price combine to make them the machine that every family desires to own, and thoroughly satisfied when once they possess the "White."

THE SOLE AUTHORIZED DEALER FOR Snyder and adjoining counties, is C. C. SEEBOLD Middleburg Pa., and we advise intending purchasers to patronize none other, and thereby get the genuine "White."

Rupture

DR. J. A. SHERMAN—AND THIS DAY DR. SHERMAN known to the public for the past 15 years or more for his successful method of treating Ruptures without the annoyance and injury trusses inflict, may now be consulted weekly at his New York and Boston offices Dr. Sherman is the discoverer of the only known cure for Rupture by local external treatment.

No man is safe who has a Rupture, no matter how insignificant he may consider it, for every man who now suffers from it and the injury of trusses, to such an extent that life has no enjoyments, once regarded it as unworthy special attention. It is not a stand-still affliction: it is steadily progressive, even unto death and he is wise who takes the necessary steps to be effectually relieved of it before the day of suffering and gloom comes upon him.

Patients from abroad can receive treatment and leave for home same day. During treatment any kind of active exercise or labor can be performed without interfering with the treatment and with safety from the dangers of strangulated Rupture. HIS BOOK ON RUPTURE gives the most reliable proofs from distinguished professional gentlemen, clergymen, and merchants of his successful practice and popularity therefrom throughout this country and the West Indies. The afflicted should read it and inform themselves.

It is illustrated with photographic likenesses of extremely bad cases before and after cure, and mailed to those who send 10 cents. In consequence of the great demand for Dr. Sherman's personal services, he will, till further notice, divide his time between his New York and Boston offices as follows: Saturday, Monday, and Tuesday he may be consulted at his New York office, and Wednesday, Thursday, and Friday, at his Boston office, each week. Remember, in writing or calling, the address is

DR. J. A. SHERMAN
251 Broadway, Cor. Murry Street, N. Y., and 43 Milk Street, Boston.

Beware of certain confidence men and impostors who represent themselves as Dr. Sherman.
