The Post.

Middleburg, JAN. 27, 1881.

J. CROUSE, Editor & Proprietor.

McMillan comes from Minnesota as senator and Ramsey will retire to private life.

Blaine says he knows nothing about that $3)000 residence that some of the newspapers have been erecting for him in Washington.

Secretary Sherman has smooth sailing in Ohio. He goes back to the senate as easy as clipping a coupon from a government bond.

Twenty American cities to-day contain over $100.000 people each; twenty American states contain over 1,000,000 people each.

There seems to be no doubt expressed as to the rumor that Blaine will go into Garfield's cabinet as secretary of state; and the Republican party seems to be well satisfied with the selection.

Thomas C Platt, who will take the place of Francis Kernan as senator from New York, is a stalwart Republican, a man of experience and ability, and will make his mark in the senate.

If it is true, as asserted by those who pretend to know, that Eckley B. Coxe spent between $50,000 and $75,000 to be elected state senator from Luzerne county, it is no wonder that he couldn't conscientiously take the oath of office at Harrisburg. No man ever spent that amount of money legitimately and honestly to be elected in a senatorial or legislative district.

A man died in New Hampshire a few days ago from the effects of swallowing a live frog. On one occasion the man swallowed a snake over a foot long, and afterwards caught a black snake five feet in length, cut it open and swallowed its heart. He seemed to have a mania for swallowing live things, and generally succeeded until he tackled his frogship, who refused to be imprisoned in such a novel place, and started on an exploring expedition which caused the man's death.

Now that Grant has been made president of the world's fair commission in New York perhaps it will not be deemed necessary to press his name before congress for something or other with a big salary attached to it. Grant is not a pauper, and he is greatly annoyed by the actions of his over-zealous friends in constantly pressing his name for this, that or the other thing. Let him alone and he will run the world's fair successfully if it takes all next summer.

Congressman Carpenter, of Iowa, has introduced in the house a sensible bill providing for the election of postmasters and other national officers exercising powers within state limits, by the people, such officers to serve four years and not to be removed for political or religious causes. There is no officer who is so closely connected with the people as the postmaster, and if a law can be framed which will guarantee justice to the interests of the government, and which at the same time permits the people to choose their own postmaster, it ought to be adopted.

The largest order in the world is that just given the Baldwin works, Philadelphia, by a southwestern railroad corporation, to build one hundred and forty-four locomotives, at a cost of about one million of dollars. This is another evidence of the rapid increase in railroad business, and shows that every branch of industry is about to receive a new impetus. We already see this in the number of new railroad enterprizes projected on every hand, and if they are carried out, as they undoubtedly will be, a busy year is ahead. The country never was in a more prosperous condition, notwithstanding the assertions of croakers, and no better or more convincing evidence of this fact can be found than in the mammoth order for one million dollars worth of locomotives from one firm.

A dwelling house made exclusively of paper was one of the objects of interest at the international exhibition at Sidney and was furnished throughout with articles manufactured from the same material. Even the stoves used in heating the rooms in which large fires were kept burning daily throughout the exhibition were made of paper. Several banquets were given in the house by its owners to the commissioners, members of the press, and foreigners of distinction. All the plates and dishes, knives and forks, bottles and drinking vessels used at these entertainments were fabricated entirely and solely of paper.

"THE BOOK OF THE AGE."

The Problem of Human Life Here and Hereafter.

"BY WILFORD,"

This book has unquestionably received, from the press and the clergy, stronger praise than any other book ever published, and is universally admitted to be the only work in existence which absolutely demonstrates a personal God and the immortality of the soul by science alone, without the aid of the Bible, utterly annihilating the theories of Darwin, Huxley, Tyndall, Helmholtz and others of the evolution of man from the lower animals and his extinction at death. No better proof of the extraordinary character of this work can be asked than the following extracts from the religious press—a mere specimen of hundreds equally enthusiastic:

"This is the book of the age, and the unknown author need aspire to no greater literary immortality than the production of this work will give him, and thousands of the best educated minds that have appalled by the pitiful logical teachings of modern scientists will rise up and call him blessed."—METHODIST PROTESTANT, Baltimore, Md.

"We can truly say that we are amazed at the originality, thoroughness, and marvellous ability of the author of this work."—NEW COVENANT, Chicago.

"It is entirely out of the ordinary line of scientific and philosophical books, and abounds in arguments of a most startling character."—HERALD AND PRESBYTERIAN, Cincinnati.

"Although strictly scientific, its one aim is the demonstration of a personal God and a hereafter for humanity. It is the literary CHEF D'ŒUVRE of the age. All ministers and lay members should read it. It is an armory full of the weapons of the Almighty for the pulling down of strongholds. It is worth its weight in diamonds."—HARBINGER OF WORK.

"The author (a man of acknowledged genius, and confessedly the brightest scientific star of modern times) has startled the religious world into transports of joy and praise. No religio-scientific work has received both from the secular and religious press such willing and unqualified praise as the Problem of Human Life. It is the death blow of atheistic science."—AMER. CHRISTIAN REVIEW, Cincinnati, O.

"We most cordially commend to the People a of Human Life the well-earned title—the book of the age. Doubtless the God of Providence has raised up the author to meet the wants of the church in this time of need.—HOMILETIC CHRONICLE, Toronto.

"Without doubt it is the most startling book of the century. I should rather have the honor of writing such a book than to be President of the United States."—WARD TOWER.

It is a large royal octavo of 328 pages, richly bound in cloth, and contains a excellent likenesses of six of the greatest scientists of the age. It will be sent prepaid for $2. Agents wanted in every county in the U. S. Liberal terms will be offered. Address all orders,
