New Jorsey seems at present to be in a ferment. There is a Fillmore element in vafious cities and towns which as yet will not fuse with the Republicans. Mr. Daylon's popularity may produce a barmony among the opposition in his favor.

Pennsylvania is still very unsettled. In the western and northern parts of the State the nomination is well received, and the same may be said of many portions of the centre, and south. As examples we may mention that the Bucks County Intelligencer, Delapers in our State still advocate Fillmore and Dobelson, but those in the interior will mostly go with the majority of their supporters, who are fast changing to Fremont.

Montrose, May 26, 1856. TONICS WON'T DO.

THEY never did do more than give temporary reliet, and they never will. It is because they don't touch the cause of the disease. The cause of all ague and bilious diseases is the atmospheric poison called Miasma or Malaria. the difficulty in getting any one to try it was greatly increased from the fact that a remedy had been introduced which was growing into favor with the public as being-better than using Quinine—not knowing, I presume, that the remedy they used to escape Quiine, contained the DRCG ITSELF! This remedy (known as "Smith's Tonic") would invariably preak an ague, but it did not cure it, as it would often return with renewed rigor. This one circumstance I deemed in your favor, if I could institute a test comparison between it and your Cure.-The following is the result: Three persons took your "Cure," all of which were

Three persons took your "Care," all of which were cases of "Quinine Intermittent Fever" of many weeks standing. I did such cases yith your remedy, and they have not had a chill since. In all three of these cases the "Smith's Tonic" had been used, and would, as before stated, break the chill, but after a period or two had elapsed break the chill, but after a period or two had elapsed it would return.
