# Self-Acting Bent-Lever

### PLATFORM SCALES.

other, in the following respects: In the invaria-ble scientific principle involved, and upon which it acts; in its undeviating accuracy; in its lightness and strength; in its wonderful capacity, convenience of form, and applicability to every purpose for which Scales of any kind are required; in its perfect sim-plicity, in the absence of any complication, liable to variation, or to get out of order; and, finally, in the important fact, that this scale can be afforded at a-bout one-third the cost of any other Platform Scale, or like capacity and accuracy in use. And posses-THIS INVENTION claims superiority over every bout one-taira the cost of any other I attorin scale, of like capacity and accuracy in use. And possessing in an entinent degree, all these merits, this invention is conceded to be one of the most useful Invention is conceded to be one of the most queful and valuable ever brought before the public. And coming, as it does, within the reach of all, it cannot but find an unprecedented sale and undivided market among farmers; housekeepers, mechanics, merchants, &c. everywhere, to the exclusion of every other

meighing apparatus.

The invention of the Scales and the many invaluahe improvements which we have made within the past few months, have brought them to such a degree of accuracy, that they may be safely relied upon in every transaction of weight.

Manufactured and for sale only b

R. H. EATON & CO. OPINIONS OF THE PRESS.

IMPORTANT INVENTION .- For some five years past, Mr. D. M. Smyth, of Pennsylvania, (now of this State) an ingenious and scientific mechanic, has concentrated his mind and means upon an invention at length perfectly successful, and for which letters patent have just been issued by the Government of the United States. This invention is known as "Smyth's Self-States. This invention is known as sayin a selfActing Bent-Lever Platform Scale," and as this is
the first public notice of this useful and valuable improvement, we shall take the illierty of expressing
ourselves freely upon its merits. The platform of the scale is about 12 by 18 inches, and the whole scale is about 8 inches high and weighs entire only about 25 pounds, while it has the extraordinary capacity of weighing any object from one ounce to four hundred Its form is compact and convenient, and is which, itogether with the pendulum, the instant any object is placed upon the platform, moves from its centre of gravity to the point indicating the exact weight. The scientific principle upon which it acts is of no inaccuracy or change, and a given pressure or weight upon the platform must always carry the weighted arm and indicator to the same point.— The principle beyond doubt is the correct one, and that it has been properly applied in this instance, the lucky inventor has left no room for doubt. He seems to have attained perfection itself-at least so far as Platform Scales are concerned, and to have combined in a remarkable degree an invariable scientific principle, "known of all men," with compactness, convenience, strength of form, durability and accuracy. But the great and important feature in this Scale is the fact that beyond all these merits it possesses the

concur in all that is said by the Journal. The principle is at once simple and beautiful, and ensures wealth. Mr. II. is fully qualified for the imperfect accuracy, while the price will be three times portant position, and has had much experience less than of the scales now used .- Albany Express.

SMITH'S PATENT PLATFORM SCALE.—We have exon which its acts. The platform which sustains weight lifts a pendulum, suspended and haded at the end, through an arc of a circle; and the indicator points out, upon the graduated circumference, the exact weight. In other platform scales the measure of avoirdupois has to be ascertained by moving a lloose weight on a beam, as on a steelyard, till it hits the precise point. Smyth's invention is a self-working one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by fives or tens: by releasing the weight it gives ounces instead of pounds. For household purposes, it is as cheap and far better than steel and is finding the way to all well regulated kitchens where the receipt book, with its prescriptions of weights and proportions, is used.—Allas and Argus.

- A New IDEA—If anybody doubts that this is an inventive age; they should east and examine Smyth's Self-Acting Bent-Lever Platform Scales. For simplic ity of design, and economy of space, they take precedence of any scales that have yet been invented.— There is one peculiarity about this scale; it possesses very little machinery, and can never make a mistake so long as the laws of gravitation continue. Smyth's scale has another advantage—its small cost.

SHITH'S PATENT PLATFORM SCALE.—This new and valuable invention was on exhibition at our State Fair just closed. Nothing in its department received more attention or was more generally admired or approved. This acate, possessing the extraordinary merits conceded to it at the East, cannot but be exceedingly valuable, and must, we think, come into

The Albany Evening Journal publishes the above and side: This scale (Smyth's) was also exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest premium awarded—a diploma and silver medal.—Cleveland (Ohio) Journal.

SETTIE'S SELF-ACTING BEST-LEVER PLATFORM Scale."—The fundamental principle of every impor-tant invention has been very simple. In its simplici-ty is the elements of its worth, its unefulness and a daptability. Inventions of complicated morement and visionary theories have never performed the object sought to be obtained, for with adaptability, according to the "celestials."—Australian Gazette. euracy and durability must be combined cheapuess.

All of these desideratams are involved in the invention recently patented and known as "Smyth's Self-Acting Bent-Lever Platform Scales." The scale in Clair county had advertised a negro man to question, from its construction on the principle of gravitation, is never liable to be out of order. It must perform its work thoroughly, because the laws of naulated by any one who looks at it but for a monient.

finding and Valuable Inventor. Among others we have been favored with an examination of the new and valuable invention (recently patented.) known as Smooth's Self-Arting Bent-Lever Plat-form Scale." Mr. D. M. Smoth, the ingenious in-ventor, has spent some five years in the perfection of his work, and that he has attained perfection there seems but little doubt. This scale is construct ed upon a adentific principle which knows no variaquestion. Its canacity and strength is unprecedented, while its form and the principle intellect make it convenient and applicable to all purposes requiring scales of any description. It is free from any complication liable to variation or to get out of order. The great and important feature, however, of the scales made under this invention, is the fact that they can be afforded at about one fourth the cost of any other platform scale of like enpacity and accuracy in other platform scale of like enjacity and accuracy in the world. The scale we have exertances of pocket edition as compared with other platform scales,) has the wonderful capacity of wording any object, from one ounce up to four hundred pounds. Possessing the extraordinary merits and advantages conceded to this invention, I cannot but be exceedingly valuable, and the scales made under it, brought as they will be, within the react of every family, must meet with an unprecedented sale, and come into investigate and general use, as well to the benefit of the public, as to those so fortunate as to secure the exceedingly eligible of manufacturing and vending them.

A DISGUSTED DEMOCRAT.—Mr. Carpenter, of the Madison Patriot, the organ of the anti-Barstow wing of the Wisconsin Democracy, writes to his paper the following:-"It is well known that, in company with score of Deniocrats from Wisconsin, I remained in Washington about a month to aid in so exposing the misdeeds of 'the "Forty. Thieves" that we should forever be rid of them hereafter, and it must be notorious ere this that most of our endeavors have failed.

The hopes for our party have vanished, and we pave been cleaned out! The "40" find we pave been cleaned out! The "40" find Silk and Cashnere Shawls; Mantillas, Parasols, favor at court, while the old stand by Democrats who have never been indicted for stealing, gambling, or perjuries, are permitted to The writer is disgusted, but not unutterably so, with the Administration, as is evident

from his closing paragraph: "I am arranging some business preparatory to taking a bee-line for Madison to-morrow or next day, with the full determination that the Union may be rent asunder; the Poapplicable to every purpose for which scales of any kind are required. Under the platform and attached to the leverage is suspended a weighted arm or pendulum. To this pendulum is attached an indicator, revel in rampant luxury and dominion at the revel in rampant luxury and dominion at the its towering head at the feet of n'mole hill; that cholera, yellow fever, croup, and chicken pox may vomit forth their pestiferous and in the presented to the undersigned for settlement, and all persons indebted to said Estate are requested National Capital; that Chimborazo may nod devastating miasma to sufficate the poisoned mats of Washington; that lice, frogs, and all the plagues brought upon Egypt by the wickedness of Pharaoh may overrun and devastate our country, before I'go to Washington again with a view of preventing thieves from filling places of honor."

HENRY C. HICKOK, Esq. - The Senate has unanimously confirmed the nomination of this additional one of being cheap, and within the reach of every family.—Albany Eve. Jour., Jan. 28, 1856. gentleman as Superintendent of Common Schools, for three years from the 1st of June, We have examined this new Platform Scale and under the act which detached that office from with the law and details of the School Sys

### GOOD PEOPLE

TTEND

Head of Navigation,

A ND examine the choice stock of Spring & Sund-mer Goods, just received and open for impretion, and sale at a very low price, by C. W. NOTE.

Shooting Affair!

BUT a short time since the equilibrium of our usually quiet village was disturbed by the report of fire arms, and the rumor that a man's life had been imperiled in our streets. It proved to be no very serious occurrence, and the difficulty was finally satisfactorily adjusted.—That perturbation having

- ALL KINDS OF GOODS Sofuly and gently we would say to the fair ladies of our community; our stock comprises almost every thing necessary to complete a complete lady a west-robe, from a nicely—H—Hoo—Hooped Skaiets—Skirt, to a splendid Flounce flowing Robe. For matter that benefit we will enumerate. Lawn Robes, beautiful flounced and plain Berege Robes, Fancy all wool Delaines, De Beges, Imperial Challis, Plain and Figured Brillianta, Chambras, Ginghams, Merimad Frints, Plain and Figured, Black Lawns, Ladies mourning Collars and Trimmings, French Embroidered Collars, Undersleeves and Flouncings, Samped Collars, Edgings, &c., Brass Hoops, Bamboo, do., Hooped Skirts, Silk and Moire Antique Belts, Velvet and Hoire Antique Trimmings, Estella Shawls, Broche do., ditta, all kinds of Shades and Colors, Gloves, and Hodery a great variety, Bracelets, and Jewely, a fine assertour community; our stock comprises almost evel mankind in general, we would say, that we done believe that "Dress makes the man," yet we do think that he can he made to look wonderfully like one by "piling" himself into some of the materials which we have provided for his individual use. Call and co-vince yourselves by an examination of the shundance.

Fancy Shirtings, Fancy Neck Then, Fancy Collect, Fancy Shirts, Vests, Pants, Coals, Vestings, Clothe, Fancy Cassameres, Symmer Plaids, Kentucky Jonns, Tweeds, Sattenetts, Hats and Caps, a great supply of the most improved fashious and colors Fancy Poster, Halfs, Linen do., Fancy Border, Silk do., Suppenders, Parl and Gold Shirt Sluds and Slave Butters. tons, Carnelean Coal Fasteners and Buttons, da, de-In fact almost everything requisite to improve a Lidy's or Gentleman's wearing apparel can be ob-tained at F. B. CHANDLERS.
