

Clippings.

Thirty thousand slaves were sold and removed out of Virginia last year.

Lots which sold for \$30 last winter in Lawrence, Kansas, now sell for \$300.

Thomas Cunningham of Pennsylvania, has resigned his Associate Judgeship in Kansas.

Fort Wayne, Ind., heretofore loquacious, elected Republican officers on Tuesday last by from 200 to 300 majority.

The Richmond South intimates that Governor Marcy is about to give his open support to the principles and policy of the Republican party.

Hens disappear very rapidly in Marietta by a disease which they denominate the "grab disease." Many roasts have been made desolate in a single night. It is said to be catching.

Passengers leaving Philadelphia at 6 o'clock a. m. by the new route just opened, via the North Pennsylvania railroad and Easton, can now reach Scranton by 4 o'clock p. m.

There is a law in South Carolina which inflicts the penalty of death for grand larceny. A man named Antonio Deo has been tried and convicted under it at Charleston, and on Saturday last was sentenced to be hung in December next.

It is stated that a large military force has been ordered for Utah, to take position on the Government Reserve, forty miles south of Salt Lake City, and there await the requirements of the new Governor.

Application was made to Judge Calver, of Brooklyn, on Wednesday, for an injunction "to restrain the owner from playing further tricks in high heaven, without the consent of his Honor, the Mayor of New York."

An English paper says that the inhabitants of a large district in Wales have purchased a large tract of land in Tennessee, and were about starting in a body to take possession.

The National Era says the grand idea and purpose of Southern politics is to spread negro slavery over the continent. It is this which is at the bottom of filibustering.

Somebody, desirous of perpetrating a bon mot, inquires if *W. M. T.* is any relation to *Henry S. Mott*, who was elected Canal Commissioner by so large a majority.

President of the Louisville Journal, is responsible for the following: "The Washington Union says that the Democratic party is very certain not to go to sleep. Perhaps it can't go to sleep for the same reason that the woman's baby couldn't—its face is so dirty that it can't shut its eyes."

The *Lehigh Register* warns all those who have mistitled printer bills, to pay up before the 10th of June—the time fixed for that comet to strike the earth—so as to be prepared to meet their doom. A sensible and timely suggestion.

The newspapers are commenting and speculating on the mania for crime indicated by the numerous murders and other offences that have recently occurred in all parts of the country. We have never known murders and suspected murders nearly so frequent as at present. Some of these are by brutal violence, but more by the insidious operation of poison.

The farmers of an interior county in New York in the Spring of 1856 had \$455,000 deposited in a certain Bank. Three weeks ago, its deposit account footed up only \$25,000, the balance having been withdrawn for investment in land speculations in the West, and now the farmers are borrowing money!

The *National Era* says, with truth, that "no good Republican newspaper read for a year in a neighborhood, will produce far more fruit than a hundred dollars worth of documents scattered in the air during an election contest." Here is a strong reason "for Republicans to extend the circulation of their papers."

Since *The Salem (Mass.) Gazette* began its existence in that town, forty-nine other newspapers have been started there; forty-six have broken down. Every body thinks he knows how to publish a newspaper. Some buy experience dearly.

A young woman who had been disappointed in love, attempted to commit suicide at Pittsburg a few days since, by jumping into the Allegheny river, but was unable to sink on account of her hoop-skirts. As she floated calmly down the stream she was rescued, and went home quite satisfied of herself.

Hon. Edward G. Loring, Judge of Probate for Suffolk county, Mass., who decided in favor of the retention of Anthony Burns, the fugitive slave, is to be removed, the Massachusetts House having, by a vote of 220 to 60, adopted the address of the Senate for that purpose. This is one of the peaceful modes of revolution which the people can adopt.

The Governor has vetoed the following bills:—to incorporate the Capitol Bank at Harrisburg; Farmers' and Manufacturers' Bank, Blair County; the Schuylkill Haven Bank; to increase the capital of the Columbia Bank. The vetoes were sustained by a unanimous vote.

A shawl was recently sold in Philadelphia for \$1,425. In the same city women make shawls for six cents each. It is said that the man who buys his wife shawls at that rate, can hardly afford to have his shawls made at a higher figure than the Philadelphia price. The women in this case of shawls vs. shawls must complain of—women.

There is now one Examiner in the Patent Office whose entire attention is given to Harvesters, (Reapers and Mowers,) and another whose time is devoted to Sewing machines, for which no less than two hundred patents have already been issued, while new ones are constantly applied for.

Rev. Mr. Lorriauz, a Protestant minister of France, has visited Virginia under the auspices of the American Home-Head Company and secured 3,000 acres of land in Montgomery county at the cheap rate of seventy cents per acre. His countrymen of 500 Waldenses will immediately remove thither from the Alps in the south-east of France, and he believes that thousands will follow them, as soon as they become aware of the cheap and desirable homes that await them in this country.

Equal and Exact Justice to all Men! was once the battle cry of the "Democracy." They have got bravely over that. The Year 1857 finds them sustaining a Property Qualification here, opposing Emancipation in Missouri, screening thieves from police in New York, repudiating State Debt in California, proscribing voters at birth in Ohio, and denying the right of Press, Pulpit, or Legislature to open their lips, when an arbitrary Court takes away the citizenship of half a million people! Equal and Exact Justice to all men!—*Atlantry Journal.*

There is a negro named Grey, now living in Chicago, who holds a passport under the hand of the Secretary of State, broad seal attached, which declares that he is a citizen of the United States, and grants him protection. Mr. G. also holds a certificate of commendation, made in 1835, which is signed by James Buchanan, who therein states that "Mr. Grey is a citizen of the United States." In view of the recent decision of the Supreme Court, the question arises how and by what Law colored men have ceased to be citizens since.

The secretary of state has transmitted to the New York Senate a record of the criminal statistics of the state. The convictions during the year were 11,324; 2,806 were of American birth, and 8,518 foreign. This statement speaks volumes on the question of American morals. Most of the criminals are not our own, they are Europe's thrust upon us. The returns show an increase of convictions during the year, as compared with those of last, of 4,850. This is not attributed to an increase of crime, but to more accurate reports from sheriffs.

Will meet at their room, on Lathrop's Store, on Monday evening, June 1st, at 7 o'clock. P. & All persons interested, will govern themselves accordingly. C. W. MOTT, Clerk. Montrose, May 27, 1857.

The Eclectic Medical Society will hold its Annual Meeting at Union Hall, Harford, on Tuesday the 10th of June next. A general attendance is solicited. A. GRAMERLIN, Secy.

There is, perhaps, no organ of the human system so important, and none so liable to become deranged, as the liver. It is this organ which secretes the bile and circulates it through all impurities. But no sooner does it cease to perform its functions than noxious particles are absorbed and carried to the blood, which disorders the whole animal system, subjecting us to be attacked at any time by some disease or other. On the other hand, while the liver continues in healthy action, we need not be apprehensive of sickness of any kind. Of such vital importance is the healthy action of this organ, that the attention of the wisest physicians has been attracted to the subject, but not until the discovery of Dr. Halsey's Forest Wine and PILLS, has any remedy proved a specific. Thousands are more or less affected with derangements of the liver; but the disorder comes on so gradually that we are not aware of its existence until the blood becomes so impure that other disorders, more dangerous in character, begin to threaten us. Dr. Halsey, of New York City, by whom the celebrated Forest Wine and Pills were discovered, assures us that his remedies will not only cure the liver complaint, but will prevent many other disorders which are the result of its derangement. We understand that the Forest Wine and PILLS, are all respectable druggists throughout the country. Montrose, May 1, 1857.—47

In Hocklim, Pa., on Monday evening, March 2d, WILLIAM JAY, youngest son of David and Esther Morgan, aged 16 years and 4 months.

We gathered 'round his pillow, For we felt that he must die; "I'm tired, my dear, I'm tired," While his bosom heaved a sigh. But he trusted in his Saviour, And his voice was heard in prayer; Till God called home his spirit, To the bright world above.

Then we joined the prayer that offered, For our weeping household band; That our broken links be gathered, In that happy spirit land. Strong ties had bound us children, And the youngest of us all; But on our knees we fell in prayer, The *addict* stroke must fall. The thought *tho't* of had refreshed That their darling son, Would guard their falling footsteps, Till his will came to be done. But while their hearts bled Beneath their Father's rod, They find their greatest solace, Flows from the throne of God.

In the hour of deepest sorrow, The Saviour sits at our side, With His ever blessed promise, The drooping heart to cheer. [Ct.]

In Fair Haven, Conn., on Saturday, Jan. 17, 1857, Capt. WILLIAM C. BALDWIN, son of David and Ruth Baldwin, of Forest Lake, Susq. Co., Pa., in the 40th year of his age, died of cholera, at 10 o'clock, after a few hours' illness, the last of which he was commander of the brig G. A. Cacerly.

Also, on the 29th inst., LILLIAN, youngest daughter of Capt. WILLIAM C. and Phebe S. Baldwin, aged one year and eight months.

In Forest Lake, Sept. 22, 1856, ALBERT N., son of Henry J. and Amanda Baldwin, aged one year, four months and ten days, died of cholera.

Dear little ALBERT now is placed Within the silent grave; His little hand a snow-drop traced, The last that friendship gave. No more to taste of death or pain, No more to feel the cold and chill; He shines among the infant train On the celestial shore. Conducted by an angel band, To bloom in Eden's bower, More flowers than earth can expand, A pure and spotless flower.

Armies of infants clothed in white, How dazzling to behold, Arrived in Jesus' glory bright, With raiment of pure gold! Food mourners, weep not that he joins The brilliant army; they all hail His golden hair how bright it shines, How sweet redemption's song. Sweet ALBERT rests from future care, In this dark world of woe, And full salvation flows. E. E. G.

LOOK HERE: The subscriber has been receiving during the past three weeks a fine lot of

SPRING & SUMMER GOODS, making, with former stock, an assortment with which there is no comparison in this city, and which they are being sold in a manner satisfactory to customers is manifest from the fact, that notwithstanding his efforts at competition, the goods and sales thus far have been unprecedented.

We mean with frequent additions, to keep the assortment good and ready for our paying customers can rest assured that the old store is not to be outdone. In addition to the large variety kept for years, we now have a good assortment of

READY-MADE CLOTHING, in all varieties. Please give us a call. Gibson, May 27, 1857. S. S. INGALLS.

Farm for Sale!! ONE of the best and cheapest FARMS on Rock River, Ill., for sale. It contains

125 acres, all under fence, 100 under plow, all the timber necessary for any convenient; a good stream of living water runs through the place; good new house, well furnished, &c. It will sell for \$23,000 worth of grain per annum, or is well arranged for a stock or dairy farm. It is only one mile from Camp, a town of 600 inhabitants, which contains first rate grist and saw mills, wagon, and blacksmith shops, &c. It is only two miles from R. R. Depot, and four miles from Sterling, the county seat.

TERMS, \$5,000: \$1,500 to \$1,000 down, remainder in nine annual payments, with 6 per cent interest. Apply to G. C. LYMAN, Sterling, Whiteside County, Illinois. Or to the undersigned, at the office of Pine Lumber, in Wisconsin, and prices in Iowa, for sale, on time. May 20, 1857.—47

An Acrostic. M O R T I S, rator's keen, my Brush can scribble, h'ome, all, all, on land or sea, is twenty steps, rest for my child's sake, place feet, smooth as a chisel, charge a shapence—simple for stranger, I am death on hal-

Dr. E. F. Wilnot, GRADUATE of the Eclectic Homoeopathic College of Medicine, is now permanently located in Great Bend, Pa. Office, corner of Main and Elizabeth St., nearly opposite the M. E. Church. May 1st, 1857.—17

Dr. H. Smith, SURGEON DENTIST, has removed his office from South St. to his own building opposite the Baptist church, (North side) in Montrose, where all Dental operations will be performed in his usual manner. Montrose, May 21, 1857.

FIVE HUNDRED Local & Traveling Agents Wanted! BUSINESS parties from \$50, to \$150, per month. No salary or chance business. Permanent employment given and no capital required. For further particulars enclose postage stamps and Address, A. SIMPSON, Etcetera, N. H. May 20, 1857. 19m.

Administrator's Sale. NOTICE is hereby given that in pursuance of an order of sale issued from the Orphan's Court of Susquehanna County, the subscriber will on Saturday the 10th day of June next, upon the premises in Bush, offer for sale to public tender the following described property, late the estate of John H. Shaddock, deceased. Bounded North by lands of Joseph Shaddock on the east by unrold lands, on the South by lands of John Moore, and on the West by lands of John Tickner. Containing about fifty-five acres, more or less, most of which is improved, and has thereon a Dwelling House, Barn and Saw-Mill. C. Texas or Texas and a few other day of sale—One half of balance on confirmation of sale, and the last half to be secured by judgment upon the premises, on giving bond for the same. HENRY J. CHAMPION, Administrator. Rush, May 20, 1857. 19m.

MONOPOLY! MONOPOLY! This is the great principle upon which all monopolies are based. In proof of this look at the late Act passed at Harrisburg, prohibiting lawmaking and peddling in Susquehanna County; an Act passed to gratify some of the Merchants who have expressed a desire "to stop some large seasons." GUTTENBERG, ROSENBAUM & CO., S. A. Y. DOWN WITH MONOPOLY!

These large wares will run more regularly than ever before, and their prices will be reduced. In order to accommodate the community and to bring to market more successfully, they have made arrangements to get New Goods weekly from New York, and they will sell the same from \$1.00 to 20 per cent cheaper, than any other establishment in Susquehanna County. We have now received our

LARGEST STOCK OF NEW SUMMER GOODS! The largest, cheapest and best selected stock ever offered in this market. It is not necessary to enumerate the articles which our assortment comprises; it is sufficient to say that we have a general stock of the latest and most fashionable goods in the market, and that we will sell them at a low price, as in prices. A few words more to our fellow-citizens, and particularly to those who feel themselves independent and not obliged to purchase at some particular store. We have a stock of goods that we can examine and price our goods before purchasing elsewhere; that is a true motto that "a penny saved is better than two earned." We are determined to spare no pains to give general satisfaction, and will sell always ready and happy to exhibit our assortment to those who will favor us with a call. GUTTENBERG, ROSENBAUM & CO., Montrose, May 21st, 1857.

SMYTH'S PATENT PLATFORM SCALE.—We have examined this new invention. Nothing can be simpler or more completely developed than the principle upon which it rests. The platform which sustains the weight lifts a pendulum, suspended and loaded at the end, through an arc of a circle; and the indicator points out, upon the graduated circumference, the exact weight. In other platform scales the measure of avoirdupois lbs. is ascertained by moving a loose weight on a beam, as on a steelyard, till it hits the precise point. Smyth's invention is a simple, reliable one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by five or ten; by releasing the weight, it indicates ounces instead of pounds. For household purposes, it is as cheap and far better than steelyards, and is finding the way to all well-regulated kitchens where the receipts of the cook require the use of weights and proportions, is used.—*Atlas and Argus.*

A New Idea.—If anybody doubts that this is an important one, they should call and examine Smyth's Self-Acting Bent-Lever Platform Scale. For its simplicity of design, and economy of space, they take precedence of any scales that have yet been invented.—There is one peculiarity about this scale, which possesses very little machinery, and can never make a mistake so long as the laws of gravitation continue. Smyth's invention is another advantage—its small cost.—*Knickerbocker.*

SMYTH'S PATENT PLATFORM SCALE.—This new and valuable invention was on exhibition at our State Fair last week. It attracted the attention of many more persons than were generally admitted or approved. This scale, possessing the extraordinary properties conceded to it in the East, cannot but be extensively valuable, and must, we think, come into general use.

The *Albany Evening Journal* publishes the above, and adds: "This scale, which was exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest premium awarded—a diploma and silver medal.—*Cleveland (Ohio) Journal.*"

"SMYTH'S SELF-ACTING BENT-LEVER PLATFORM SCALE."—The fundamental principle of every important invention has been very simple. In its simplicity, it is the basis of all the great inventions of our age. It is a simple, reliable one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by five or ten; by releasing the weight, it indicates ounces instead of pounds. For household purposes, it is as cheap and far better than steelyards, and is finding the way to all well-regulated kitchens where the receipts of the cook require the use of weights and proportions, is used.—*Atlas and Argus.*

SMYTH'S Self-Acting Bent-Lever PLATFORM SCALES. THIS INVENTION claims superiority over every other in the following respects: 1. In its scientific principle involved, and upon which it acts; in its undeviating accuracy; in its lightness and strength; in its wonderful capacity, containing five times as much weight as any other platform scale of any kind; in its perfect simplicity, in the absence of any complicated parts, or variation, or to get out of order; and, finally, in the important fact, that this scale can be afforded at about one-third the cost of any other Platform Scale of like capacity and accuracy in use. And possessing in an eminent degree, all these merits, this invention is conceded to be one of the most useful and valuable ever brought before the public. And coming, as it does, within the reach of all, it cannot but find an unprecedented and an undiminished market among farmers and stock-keepers, merchants, mechanics, &c. everywhere, to the exclusion of every other weighing apparatus.

The invention of the Scales and the many valuable improvements which we have made within the past few months, have brought them to such a degree of accuracy, that they may be safely relied upon in every transaction of the most delicate nature. Manufactured and for sale only by R. H. EATON & CO., HARFORD, SUSQUEHANNA COUNTY, PA.

OPINIONS OF THE PRESS! IMPORTANT INVENTION.—For some five years past, Mr. D. M. Smyth of Pennsylvania, (now of this State), has been engaged in the invention of a platform scale, perfectly simple, and for which letters patent have just been issued by the Government of the United States. The entire stock having been purchased and attached to the leverage is suspended a weightful arm or pendulum. To the pendulum is attached an indicator, which, together with the pendulum, is situated on a centre of gravity to the point indicating the exact weight. The scientific principle upon which it acts depends on no machinery or change, and a given pressure or weight upon the platform must always carry the weighted arm and indicator to the same point. The principle beyond doubt is the correct one, and is the only one which will not be affected by any additional one being changed; and within the reach of every family.—*Albany Even. Jour., Jan. 28, 1856.*

We have examined this new Platform Scale and concur in all that is said by the *Journal*. The principle is in one simple and beautiful, and ensures perfect accuracy; while the price will be three times less than of the scales usually used.—*Albany Express.*

SMYTH'S PATENT PLATFORM SCALE.—We have examined this new invention. Nothing can be simpler or more completely developed than the principle upon which it rests. The platform which sustains the weight lifts a pendulum, suspended and loaded at the end, through an arc of a circle; and the indicator points out, upon the graduated circumference, the exact weight. In other platform scales the measure of avoirdupois lbs. is ascertained by moving a loose weight on a beam, as on a steelyard, till it hits the precise point. Smyth's invention is a simple, reliable one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by five or ten; by releasing the weight, it indicates ounces instead of pounds. For household purposes, it is as cheap and far better than steelyards, and is finding the way to all well-regulated kitchens where the receipts of the cook require the use of weights and proportions, is used.—*Atlas and Argus.*

A New Idea.—If anybody doubts that this is an important one, they should call and examine Smyth's Self-Acting Bent-Lever Platform Scale. For its simplicity of design, and economy of space, they take precedence of any scales that have yet been invented.—There is one peculiarity about this scale, which possesses very little machinery, and can never make a mistake so long as the laws of gravitation continue. Smyth's invention is another advantage—its small cost.—*Knickerbocker.*

In its simplicity, it is the basis of all the great inventions of our age. It is a simple, reliable one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by five or ten; by releasing the weight, it indicates ounces instead of pounds. For household purposes, it is as cheap and far better than steelyards, and is finding the way to all well-regulated kitchens where the receipts of the cook require the use of weights and proportions, is used.—*Atlas and Argus.*

SMYTH'S PATENT PLATFORM SCALE.—This new and valuable invention was on exhibition at our State Fair last week. It attracted the attention of many more persons than were generally admitted or approved. This scale, possessing the extraordinary properties conceded to it in the East, cannot but be extensively valuable, and must, we think, come into general use.

The *Albany Evening Journal* publishes the above, and adds: "This scale, which was exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest premium awarded—a diploma and silver medal.—*Cleveland (Ohio) Journal.*"

"SMYTH'S SELF-ACTING BENT-LEVER PLATFORM SCALE."—The fundamental principle of every important invention has been very simple. In its simplicity, it is the basis of all the great inventions of our age. It is a simple, reliable one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by five or ten; by releasing the weight, it indicates ounces instead of pounds. For household purposes, it is as cheap and far better than steelyards, and is finding the way to all well-regulated kitchens where the receipts of the cook require the use of weights and proportions, is used.—*Atlas and Argus.*
