Fair at . Dundaff. The Ladies of the Episcopal Church in Dundaff village will hold a sale of useful and fairey articles on the 4th of July. A warm dinner will be provided. Ice Cream and other Refreshments in abundance. The public are

To Parents.—Childhood, the most tender portion of our existence, is generally most neglected and thousands of youth die every year from neglect of parents to attend to the early symptoms of discase. Every parent must be well aware that headaches, dizziness, sick stomach, furred tongae, etc., indicate a disordered stomach and blood, and some violent fit of sickness must soon follow, if the cause violent fit of sickness must soon follow, if the cause which gives rise to such symptoms be not at once expelled from the system. How criminal, therefore, is it for parents to neglect the health of their children, when Dr. HAISEY'S celebrated FOREST PILLS are so well adapted to remove every restige of impending disorder. These mild vegetable fills not only cleanse the stomach and blood from all impurities, but when used in connection with the Forest Wine, will cure, readily, old standing colds and coughs, ague and fever; scrofulous affections; and other chronic diseases.

Dr. Halsey's advertisement may be seen in another clumn.

TO THOSE WHO WANT FARMS. A Farm Within the Reach of Every Man.

THE RIDGWAY FARM COMPANY has made arrangements by which all who desire to settle or

purchase a home can do so.

The Farms consist of the best limestone soil of the most superior quality for farming, in a rapidly improving place, into which an extensive emigration is now pouring. The property is located in Elk County, Pennsylvania, in the midst of a thriving population of some 10,000. The climate is perfectly heal-thy, and the terrible plague of the west fever is un-known. It also has an abundance of the best quality of Coal and Iron. The price to buy it out is from \$2. at the time of purchasing, or a share of 25 acres entitling to locate the same for \$300, payable \$6 per month or 121 acres payable \$4 per month. Discount for every sum of \$100 and under, paid in advance, a discount of 5 per cent, will be allowed, and for over \$100 a discount of 10 per cent. \$100 a discount of 10 per cent.

satisfactory reference, for the possession of all of the workable veius of the best fiftuinions Coal, amounting in the aggregate, to over 22 feet, which makes the business.

Montrose, Pa.

other, in the following respects: In the invaria-ble scientific principle involved, and upon which it acts; in its undeviating accuracy; in its lightness and strength; in its wonderful capacity, convenience weighing apparatus.

The invention of the Scales and the many invalua

ble improvements which we have made within the past few months, have brought them to such a de-gree of accuracy; that they may be safely relied up-on in every transaction of weight.

Manufactured and for sale only by

Important Invention.—For some five years past, Mr. D. M. Snyth, of Pennsylvania, (now of this State) an ingenious and scientific mechanic, has concentrated his mindeard means upon an invention at length perfectly successful, and for which letters patent have just been issued by the Government of the United States. This invention is known as "Smyth's Self-Acting Bent-Lever Platform Scale," and as this is the first public notice of this useful and valuable improvement, we shall take the liberty of expressing ourselves freely upon its merita. The platform of the scale is about 12 by 18 inches, and the whole scale is about 8 inches high and weighs entire only about 25 pounds, while it has the extraordinary capacity of weighing any object from one ounce to four hundred pounds. Its form is compact and convenient, and is applicable to every purpose for which scales of any kind are required. Under the platform and attached to the leverage is suspended a weighted arm or pendulum. To this pendulum is attached an indicator, which, together with the pendulum, the instant any object is placed upon the platform moves from its centre of gravity to the point indicating the exact weight. The scientific principle upon which it acts admits of no inaccuracy or change, and a given pressure or weight upon the platform must always carry the weighted arm and indicator to the same point.—

The principle beyond doubt is the correct one, and tlat it has been properly applied in this instance, the lucky inventor has left no room for doubt. He seems SMYTH'S PATENT IMPROVED FIRST

that it has been properly applied in this instance, the lucky inventor has left no room for doubt. He seems to have attained perfection itself—at least so far as Platform Scales are concerned, and to have combined

We have examined this new Platform Scale and we have examined this new I mutin to an entire concur in all that is said by the Journal. The principle is at once simple and beautiful, and ensures perfect accuracy, while the price will be three times

opened to accommodate the emigration and settlement which has already taken place.

There is no opportunity equal to it now offered to the man who wants to provide himself a home in an easy way, and make a settlement where he can live in prosperity and independence in a climate PER-TECTLY HEALTHY.

No case of the fever ever having been known to occur in this settlement, it is not like going to the backwoods of the West, among perhaps intelerant backwoods of the West, among perhaps intelerant opened to accommodate the emigration and settlement which has already taken place.

125 SCPS, all under fence, 100 under plow, all the timber necting one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight of the pendulum, the scale becomes multiplied or the stack or one injuriest. It will turn off \$2,000 worth of grain per animal, or is well arranged for a stock or like from the first one indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight on the first one, and indicates at once, and to the injuriest fraction, the figure. By attaching the weight of the pendulum, the scale found in the proposition, the figure for the first one, and indicates at once, and to the injuriest one, and indicates at once, and to the i

A New IDEA—If anybody doubts that this is an inventive age, they should call and examine Smyth's Self-Acting Bent-Lever Platform Scales. For simplicity of design, and economy of space, they take preceding dence of any scales that have yet been invented.—
There is one peculiarity about this scale; it possesses very little machinery, and can never make a mistake so long as the laws of gravitation continue.

valuable invention was on exhibition at our State Fair just closed. Nothing in its department received more attention or was more generally admired or approved. This scale, possessing the extraordinary merits conceded to it at the East, cannot but be exceedingly valuable, and must, we think, come into general use.

The Albany Evening Journal publishes the above, and adds: This scale (Smyth's) was also exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest prefilum awarded—a diploma and silver medal.—Cleveland (Ohio) Journal.

"SHYTH'S SELF-ACTING BEST-LEVER PLATFORM Silk and Cashmere Sharls; Mavitillas, Parasols, Rick Ribbons, Bonnets and Plowers, Broadcloths, Cassimeres, dec., with a great variety of other STAPLE & FANCY GOODS, including Groceries, Crockery, Hardware, Iron and Steel, Nails, Stores, Hats and Capt, Boots and Shoes, Carpeting, Floor Oil Cloths, Painted Window, Shades, Wall Paper, Clocks, Drujs, Oils & Paints, dec., &c. The entire stock having been bought for Cash and with much care, will be sold at the lowest figure, and to meet the views of the closest Cash on tour from its construction on the principle of cuestion, from its construction on the principle of cuestion. figure, and to meet the views of the closest Cash or Time buyers.

New Milford, May 13, 1857.

N. B. Flour and Salt constantly on hand.

Time buyers in exercise the principle of gravitation, is never liable to be out of order. It must perform its work thoroughly, because the laws of nature govern it. In size the scale is a pigmy, but for capacity it is wonderful, weighing any object from one ounce up to four hundred pounds. It can be regulated by any one who looks at it but for a moment. As their cost is but a trifle, they will speedily he as indispensably necessary in the household calendar as any other useful article of daily use.—Eve, Transcript.

MONOPOLY: MONOPOLY: THIS is the great principle smoog, our selfab, small merchants. In proof of this look at the late Act passed at Harrisburg, prohibiting hawking and peddling in Susquehanna County; an Act passed to gratify some of the Merchants who have exressed a desire "to stop some large wogons." GUTTENBERG, ROSENBAUM & CO.

-SAY-DOWN WITH MONOPLY Their large wegon will run more regularly than ever before, until their licensessor peddling expires. In order to accommodate the community and be able

to battle monopoly successfully, they have made arrangements to get New Goods weekly from New York, and they will sell the same from 15 to 20 per cent cheaper, than any other establishment in Susquehanna County. We have now received our NEW SUMMER GOODS! The largest, cheapest and best selected stock ever offered in this market. It is not necessary to enaoffered in this market. It is not necessary to ennmerate the articles which our assortment comprises
it is sufficient to say that we have a general stock of
the latest and most instronable goods in the market,
and we cannot full to suit the public, as well in taste,
as in prices. A few words more to our fellow-citizens, and particularly to those who feel themselves
independent nist not obliged to purchase at some particular store. We know that it will be for your interest to examine and price our goods before purchasing elsewhere; that is a true motto that a penny
saved is better than two earned. We are determined to spare no pains to give general satisfaction,
and we shall always be ready, and happy to exhibit
our assortment to those who will favor as with a call

SMYTH'S

THIS INVENTION claims superiority over every

and strength; in its wonderful capacity, convenience of form, and applicability to every purpose for which Scales of any kind are required; in its perfect simplicity, in the absence of any complication liable to variation, or to get out of order; and, finally, in the important fact, that this scale can be afforded at about one-third the cost of any other Platforn Scale, bout one-third the cost or any other l'lattorn Scale, of like capacity and accuracy in use. And possessing in an eminent degree, all these merits, this Invention is conceded to be one of the most useful and valuable ever brought before the public. And coming, as it does, within the reach of all, it cannot but find an unprecedented meand undivided market among farmers, housekeepers, mechanics, merchants, &c. everywhere, to the exclusion of every other

HARFORD, Susq. Co., Pa., May 13, 1857.

OPINIONS OF THE PRESS. IMPORTANT INVENTION .- For some five years past,

in a remarkable degree an invariable scientific principle, "known of all men," with compactness, convenience, strength of form, durability and accuracy. But the great and important feature in this Scale is the fact that beyond all these merits it possesses the additional one of being cheap, and within the reach of every family.—Albany Exc. Jour., Jan. 28, 1856.

ess than of the scales now used .- Albany Express. SANTH'S PATENT PLATFORM SCALE.—We have exanined this new invention. Nothing can be simpler or more completely developed than the principle upon which its acts. The platform which sustains the weight lifts a pendulum, suspended and loaded at the rend, through an arc of a circle; and the indicator points out prop the enduated circumstance of oxact weight. In other planting scales the measure of avoirdupois has to be ascertained by moving a loose weight on a beam, as on a steelyard, till it hits

proportions, is used .- Atlas and Argus.

Smyth's scale has another advantage-its small cost -Knickerhocker. SAVIE'S PATENT PLATFORM SCALE.—This new and

there, we have been favored with an examination of the new and valuable invention (recently patent-ed,) known as Smyth's Self-Acting Hent-Lever Plat-form Scale. Mr. D. M. Smyth, the ingenious inventor, has spent some five years in the perfection of his work, and that he has attained perfection there seems but little doubt. This scale is constructthere seems but little doubt. This scale is constructed upon a scientific principle which knows no variation or change, and hence its accuracy is beyond question. Its capacity and strength is unprecedented, while its form and the principle involved make it convenient and applicable to all purposes requiring scales of any description. It is free from any complication liable to variation or to get out of order. The great and important feature, however, of the scales made under this invention, is the fact that they can be afforded at about one-fourth the cost of any other platform scale of like canacity and accuracy in C.W. MOTTS.

Can be afforded at about one-fourth the cost of any other platform scale of like capacity and accuracy in the world. The scale we have seen (a sort of pocket of the cost of any other platform scales, in the world.
