Self-Acting Bent-Lever

THIS INVENTION claims superiority over every other, in the following respects: In the invariable scientific principle involved, and upon which is acts; in its undeviating accuracy; in its lightness and strength; in its wonderful capacity, convenience and strength; in its wonderful capacity, convenience of form, and applicability to every purpose for which Scales of any kind are required; in its perfect simplicity, in the absence of any complication liable to variation, or to get dut of order; and, finally, in the important, fact, that this scale can be afforded at about one-third the cost of any other Platform Scale, of life expecter and accurate the cost of any other Platform Scale, of like capacity and accuracy in use. And possessing in an eminent degree, all these merits, this Invention is conceded to be one of the most useful and valuable ever brought before the public. And coming, as it does, within the reach of all, it cannot but find an unprecedented sale and undivided market among farmers, housekeepers, mechanics, merchanit c. everywhere, to the exclusion of every othe weighing apparatus.

The invention of the Scales and the many invalu

ble improvements which we have made within the past few mouths, have broughs them to such a flegree of accuracy, that they may be safely relied upon in every transaction of weight.

OPINIONS OF THE PRESS.

IMPORTANT INVENTION.—For some five years past, Mr. D. M. Smyth, of Pennsylvania, (now of this State) an ingentous and scientific mechanic, has concentrated his mind and means upon—an invention at length perfectly successful, and for which letters patent have ust been issued by the Government of the United States. This invention is known as "Smyth's Self-Acting Bent-Lever Platform Scale," and as this is the first public notice of this useful and valuable im-YEAS—Messrs. Anderson, Backhouse. Ball, Beck, Bower, Calhoun, Campbell, Carty, Ent. Sausold, Foster, Gildea, Hamel, Harper, Heins, Hiestand, Hillegas, Hoffman, (Berks.) Hoosekeeper, Imbrie, Innes, Jenkins, Johnson, Kanffman, Knight, Leisening, Longaker, Lovett, Maffeur, Maugle, M'Ilvain, Moothead, Musselman, Nichols, Sicholson, Nunemacher, Pearson, Peters, Potrikin, Pownall, Purcell, Ramsey, (Philadelphia,) Rainsey, (York,) Resmer, Roberts, Rup, Shaw, Sloan, Tolan, Vail, Voeghley, Walter, Westbrook; Wharton, Zimmerman and Gets, Speaker—57. Roberts, Rupp, Shaw, Sloan, Tolan, Vail, Voeghley, Walter, Westbrook, Wharton, Zimmerman and Getz, Spraker—57.

Nays—Messrs. Arthur, Augustine, Backus, Benson, Bishop, Brown, Chase, Glever, Crawford, Eyster, Gibboney, Hamilton, Harcock, Hill, Hine, Hoffman, (Lehanon,) Jacobs, Kerr, Lebo, McLamont, Munma, Reed, Smith, (Cambria,) Smith, (Centre,) Stevenson, Struthers, Thorn, Vanvoorhia, Vickers, Wagonseller, Warner, Wintrode, Witherow and Wright—34

So the question was determined in the affirmative, On the question was determined in the affirmative, Will the the House agree to the third amendment? The yeas and nays were taken agreeably to the pro-

> We have examined this new Platform Scale and concur in all that is said by the Journal. The principle is at once simple and beautiful, and ensures perfect accuracy, while the price will be three times less than of the scales now used .- Albany Express

> SHITTE'S PATENT PLATFORM SCALE.—We have exarrined this new invention. Nothing can be simpler or more completely developed than the principle upon which its acts. The platform which sustains the weight lifts a pendulum, suspended and loaded at the end, through an arc of a circle; and 'the indicator points out, upon the graduated circumference, the exact weight. In other platform scales the measure of avoirdupois has to be ascertained by moving a ose weight on a beam, as on a steelyard, till it hits finding the way to all well regulated kitchens where the receipt book, with its prescriptions of weights and proportions, is used.—Atlas and Argus.

A New Idra—If anybody doubts that this is an inventive age, they should call and examine Smyth's Self-Acting Bent-Lever Platform Scales. For simplicity of design, and economy of space, they take prece-ity of design, and economy of space, they take prece-dence of any scales that have yet been invented.— There is one peculiarity about this scale; it posses-ses very little machinery, and can never make a mis-take so long as the laws of gravitation continue. Smyth's scale has another advantage—its small cost.

SHITH'S PATENT PLATFORM SCALE.-This new and valuable invention was on exhibition at our State Fair just closed. Nothing in its department received more attention or was more generally admired or approved. This scale, possessing the extraordinary merits conceded to it at the East, cannot but be ex-

ceedingly valuable, and must, we think, come into

ceedingly Trinable, and must, we think, come more general use.

The Albany Escaing Journal publishes the above, and adds: This scale (Smyth's) was also exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest premium awarded—a diploma and ailver medal.—Cleveland (Ohio) Journal.

"Butth's Stle-Active Brut-Lever Platform SCALE."—The fundamental principle of every impor-tant invention has been very simple. In its aimplici-ty is the elements of its worth, its mefulness and a-daptability. Inventions of complicated movement and visionary theories have never performed the ob-ject sought to be obtained, for with adaptability, ac-curacy and durability must be combined cheapness. All of these desideratums are involved in the inven-tion recently patented and known as "Smyth's Self-Acting Bent-Lever Platform Scales." The scale in question, from its construction on the principle of question, from its construction on the principle of gravitation, is never liable to be out of order. It must gravitation, is never liable to be out of order. It must perform its work thoroughly, because the laws of nature govern it. In size the scale is a pigmy, but for capacity it is wonderful, weighing any object from one ounce up to lour hundred pounds. It can be regulated by any one who looks at it but for a moment. As their cost is but a trifle, they will speedily be as indispensably necessary in the household calendar as any other useful esticle of daily necessary. any other useful article of daily use.—Ere.Transcripe

IMPORTANT AND VALUABLE INVENTION .- Among INFORTANT AND VALUABLE INVESTION.—Among others, we have been favored with an examination of the new and valuable invention (recently patented.) known as Sanyth's Belf-Acting Bent-Lever Platform Scale." Mr. D. M. Smyth, the ingunious inventor, has spens some five years in the perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he satellined is beyond question. Its capacity and strength is unprecedented, while its form and the principle involved make its convenient and applicable to all purposes requiring ed, while its form and the principle involved make it convenient and applicable to all purposes requiring scales of any description. It is free from any complication liable to variation of to get out of order. The great and important feature, however, of the scales made under this invention, is the fact that they can be afforded at about one-fourth the cost of any other platform scales of like capacity and scouracy in the world. The scale we have seen (a sert of pocket edition as compared with other platform scales,) has the wonderful capacity of weighing any object, from one comec up to four hundred possels. Persecution of the extraordinary merits and advantages conceded to this invention, it cannot but be exceedingly valuable, and the scales made under it, brought as they will be, within the reach of every family, must since twich an improvedented sale, and come into imposite and general and, as well as the benefit of the public, as to those so factamets as to secure the exclusive right of sansafacturing and vending them.—
