The principle beyond doubt is the correct one, and that it has been properly applied in this instance, the lucky inventor has left no room for doubt. He seems to have attained perfection itself-at least so far as Platfern. Scales are concerned, and to have combined in a remarkable degree an invariable scientific prin-riple, "known of all men," with compactness, con-renience, strength of form, durability and accuracy. But the great and important feature in this Scale is the fact that beyond all these merits it possesses the additional one of being cheap, and within the reach of every family.—Albany Ere. A word about breaking colts may not come amiss. The following general principles should be kept in mind :---

"1. Begin early: 2. Begin by degrees. 3. Be gentle and patient. 4. Be firm. 5. Feed well with generous, but not too stimulating food. 6. Be very sure neither to overtask the strength, or crush the spirits of a colt. Use no whip or spurs, and in their place put kindness. Three grains of kind. ness are worth all the whine and sours in the ness, are worth all the whips and spurs in the world, in breaking a colt. There are a great many horses injured for want of kindness .-This I am sure no one will pretend to deny. For instance, a man has a colt to break. The THE WAR IN KANSAS CONTINUES: colt has never been handled. The man, with colt has never been handled. The man, with several others to help hum, drives the colt into a stable. He then forces the bit into her mouth, and if there is one among them her mouth, and if there is one among them who dares, he jumps upon his back, well whose BOOT AND SHOE STORE is located on Main clings to the colt's back as long as he is ablo, ket, bought at the but is finally thrown off. He tries again and again, until completely exhausted, the colt is obliged to yield; that is, for the time being. Is this the way to break colts? No, to be

"Certainly," was the reply, " any kind of turning done at the shortest notice." "Well then, said the wag, "turn me ten somersets in about one minute."

A farmer told a friend of his, who had come from town for a few days' shouting, that he once had an excellent gun that went off immediately upon a thief coming into the house, although not charged. "Wonderful gun, indeed," said the sportsman; " but how the deuce did it happen ? must have been an Irish gun." "Not at all," said the farmer ; " the thief and it went off together, and before I had time to charge him with it."

Inventions of complicated movement and visionary theories have never performed the ob-ject sought to be obtained, for with adaptability, ac-curacy and durability must be combined cheapness. All of these desideratums are involved in the inven-tion resently point and known as "Smith's Soil" R. H. EATON & CO.,

ed upon a scientific principle which knows no varia tion or change, and hence its accuracy is beyond question. Its capacity and strength is unprecedent-ed, while its form and the principle involved make it NZ eq. while its form and the principle involved make is convenient and applicable to all purposes requiring scales of any description. It is free from any com-plication liable to variation or to get out of order. The great and important feature, however, of the scales made under this invention, is the fact that they can be afforded at about one-fourth the cost of any other platform scale of like causeity and accuracy in SHOULD PURCHASE ONE OF **MYTH'S PATENT** other platform scale of like capacity and accuracy i IMPROVED SCALES. the world. The scale we have seen (a sort of pocket

edition as compared with other platform scales,) has the wonderful capacity of weighing any object, from one cunce up to four hundred pounds. Pos-SMYTH'S from one cunce up to four hundred pounds. Pos-sessing the extraordinary merits and advantages con-ceded to this invention, it cannot but be exceedingly valuable, and the scales made under it, brought as they will be, within the reach of every family, must meet with an unprecedented sale, and come into im-mediate and general use, as well to the benefit of the muldie, as its theorem.  plaints, requiring an active purge, they are an excellent remedy.
 For Costiveness or Constipation, and as a Diamer Pill, they are agreeable and effectual.
 Fits, Suppression, Paralysis, Inflammation, and even Deariness, and Partial Blindness, have been rewed by the alterative action of these Pills.
 Most of the pills in market contain Mercury, which, although a transhe remedy in skilful lands, is dangerous in a public pill, from the dreadful consequences that frequently follow its incan-tions use. These contain no mercury or mineral substance whatever. Li. U.
