MONTROSE, PA.

dar November 19, 1857. Corners have always been popular. The chimney corner, for instance, is endeared to the heart from the earliest to the last hours of existence. The corner cup-

board! What stores of sweet things has it contained for us in youth? With what luxur-"ies have its shelves grouned in manhood? A snug corner in a wall! Who ever objected to such a thing? A corner in a woman's heart! Once get there, and you may soon command the entire domain. A corner in the temple of fame! Arrive at that, and you become immortal. But a word of caution to corner

GETTING OVER A DIFFICULTY.—A class which graduated not over a thousand years ago, embraced among its members one Tom Elliot, an incorrigible wag, who was not noted for any particular and marked attention to his studies. Mathematics was a particular object of Tom's disregard, and this caused him an occasional jen d'esprit with the dry rangements to get New Goods weekly from New Applications received. him an occasional jen d'esprit with the dry rangements to get New Goods weekly from 15 to 20 per professor of conies. On one occasion, the pro- York, and they will sell the same from 15 to 20 per cent cheaper, than any other establishment in Sus- B. R. LYONS, Agent. fessor, during the recitation, asked Tom to explain the horizontal parallax of the sun. explain the horizontal parallax of the sun. Tom replied: "I don't know how."

But," said the professor, "suppose were appointed by the government to ascer-

In one of Caroline Gilman's romances, (library copy) this passage was marked and very much thumbled :

"There is no object so beautiful to me as saved is better than two carned." We are determined to spare no pains to give general satisfaction, I do a star in heaven.

"That is my view-exactly!" sighed Miss Josephine Hoops, as she laid down the volume; "in fact, I think that there's nothing so beautiful as a young man, even if he aint

Rich is he who owns a farm, for by the same token, he owns a fleet besides .-There in the azure harbor of his "Eighty" floats a craft; its hull is crimson; its taffrail gleams with gold. It is an argosy of Cloud consigned to him, with all its freight of gentle showers and gracious shades. Slowly it showers and gracious shades. Slowly it was a proper good of the showers and gracious shades. Slowly it was a proper good of the showers and gracious shades. CAPITAL, 8500,000.

FIRE, MARINE, & INLAND TRANSPORTATION.

THIS Company was organized with a Cash dapital, and the Directors have determined to adapt the business to its available resources—to observe prudence in conducting its affairs, with a prompt adjustment of losses.

INIS INVENTION claims superiority over every other, in the following respects: In the invariable scientific principle involved, and upon which it acts; in its undeviating accuracy; in its lightness and strength; in its wonderful capacity, convenience of form, and applicability to every purpose for which Scales of any kind are required; in its perfect simplicity, in the absence of any complication liable to variation, or to get out of order; and, finally, in the important fact, that this scale can be afforded at about one third the cost of any other Platfacen Scale bout one-third the cost of any other Platform Scale, of like capacity and accuracy in use. And possessing in an eminent degree, all these merits, this Invention is conceded to be one of the most useful and valuable ever brought before the public. And coming, as it does, within the reach of all, it cannot but find an unprecedented sale and undivided market

among farmers, housekeepers, mechanics, merchants, &c. everywhere, to the exclusion of every other weighing apparatus.

The invention of the Scales and the many invaluable improvements which we have made within the past few months, have brought them to such a degree of accuracy, that they may be safely relied up-on in every transaction of weight.

Manufactured and for sale only by

B. R. LYONS, Agent.

Nontrose, Jan. 1857.

B. R. LYONS, Agent.

Nontrose, Jan. 1857. the first public notice of this useful and valuable im-provement, we shall take the liberty of expressing ourselves freely upon its merits. The platform of the scale is about 12 by 18 inches, and the whole scale scale is about 12 by 18 inches, and the whole scale is about 8 inches high and weighs entire only about 25 pounds, while it has the extraordinary capacity o weighing any object from one ounce to four hundred pounds. Its form is compact and convenient, and is pounds. Its form is compact and convenient, and is applicable to every purpose for which scales of any kind are required. Under the platform and attached to the leverage is suspended a weighted arm or pendulum. To this pendulum is attached an indicator, which, together with the pendulum, the instant any object is placed upon the platform moves from its centre of gravity to the point indicating the exact weight. The scientific principle upon which it acts admits of no inaccuracy or change, and a given pressure or weight upon the platform must always carry the weighted arm and indicator to the same point.

The principle beyond doubt is the correct one, and

The principle beyond doubt is the correct one, and that it has been properly applied in this instance, the lucky inventor has left no room for doubt. He seems to have attained perfection itself-at least so far as Platfern. Scales are concerned, and to have combined in a remarkable degree an invariable scientific printhe a remarkable degree an invariable scientific prin-ciple, "known of all men," with compactness, con-venience, strength of form, durability and accuracy. But the great and important feature in this Scale is the fact that beyond all these merits it possesses the additional one of being cheap, and within the reach of every family.—Albany Ecc. Jour., Jan. 28, 1856.

We have examined this new Platform Scale and concur in all that is said by the Journal. The principle is at oace simple and beautiful, and ensures perfect accuracy, while the price will be three times less than of the scales now used,—Alberty Express.

SMITH'S PATENT PLATFORM SCALE.—We have examined this new invention. Nothing can be simpler or more completely developed than the principle up-on which its acts. The platform which sustains the weight lifts a pendulum, suspended and loaded at the end, through an are of a circle: and the indicator points out, upon the graduated circumference, the exact weight. In other platform scales the measure of avoirdupois has to be ascertained by moving a loose weight on a beam, as on a steelyard, till it hits the precise point. Smyth's invention is a self-working one, and indicates at once, and to the minutest fraction, the figure. By attaching the weight on the end of the pendulum, the scale becomes multiplied by fives or tens: by releasing the weight it gives onces instead of pounds. For household purposes, it is as cheap and far better than steelyards; and is finding the way to all well regulated kitchens where the receipt book, with its prescriptions of weights and proportions, is used.—Atlas and Argus.

A New IDEA—If anybody doubts that this is an inventive age, they should call and examine Smyth's Self-Acting Bent-Lever Platform Scales. For simplicity of design, and economy of space, they take precedence of any scales that lare yet been invented.—
There is one peculiarity about this scale; it posses-

-Knickerbocker. SMYTH'S PATENT PLATFORM SCALE.-This new and valuable invention was on exhibition at our State Fair just closed. Nothing in its department received more attention or was more generally admired or approved. This scale, possessing the extraordinary merits conceded to it at the East, cannot but be exceedingly valuable, and must, we think, come into general use.

The Albany Evening Journal publishes the above and adds: This scale (Smyth's) was also exhibited at the State Fair at Watertown, and not only received every attention given it in Ohio, but carried off the first and highest premium awarded—a diploma and silver medal.—Cleveland (Ohio) Journal.

"SMYTH'S SELF-ACTING BENT-LEVER PLATFORM SCALE."-The fundamental principle of every important invention has been very simple. In its simplici ty is the elements of its worth, its usefulness and a-daptability. Inventions of complicated movement and visionary theories have never performed the object sought to be obtained, for with adaptability, ac curacy and durability must be combined cheapness All of these desideratums are involved in the inven tion recently patented and known as "Smyth's Self-Acting Bent-Lever Platform Scales." The scale in question, from its construction on the principle of ture govern it. In size the scale is a pign.y. but for capacity it is wonderful, weighing any object from one ounce up to four hundred pounds. It can be regulated by any one who looks at it but for a moment. As their cost is but a trifle, they will speedily be as indispensably necessary in the household calendar as any other useful article of daily use .- Eve. Transcript.

Wentor, has spent some five years in the perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection of his work, and that he has attained perfection has been perfected by the high perfection of his work, and that he has attained perfection has been perfected by the high perfection of his work, and that he has attained perfection has been perfected by the high perfection by the high perfection has been perfected by the high perfection has been perfected by the high perfection by the ed upon a scientific principle which knows no varia-tion or change, and hence its accuracy is beyond tion or change, and hence its accuracy is beyond question. Its capacity and strength is unprecedented, while its form and the principle involved make it convenient and applicable to all purposes requiring scales of any description. It is free from any complication liable to variation or to get out of order. The great and important feature, however, of the scales made under this invention, is the fact that they can be affected a beauty and the strength of the second of the s dan be afforded at about one-fourth the cost of any other platform scale of like capacity and accuracy in the world. The scale we have seen (a sort of pocket ddition as compared with other platform scales,) has the wonderful espacity of weighing any object, from one ounce up to four hundred pounds. Possessing the extraordinary merits and advantages conceeded to this invention, it cannot but be exceedingly valuable, and the scales made under it, brought as they will be, within the reach of every family, must meet with an unprecedented sale, and come into im-inediate and general use, as well to the benefit of the public, as to those so fortunate as to secure the ex-clusive right of manufacturing and vending them.—

> LIME AND PLASTER. THE subscribers are, now burning and will keen d constantly on hand, Lime of a very superior quality at Montrose Depot, and will sell it in any quantities at a fair price. Persons wishing a large quantity can be supplied upon a reasonable notice. Superior ground Plaster will be kept constantly on hand hereafter.

of consumption, and is now carriag a man who has labored and
an affection of the lungs for the hast forty years.

HENRY L. PRINCS Morehout Harford, Susquehanna County, Pa. HENRY L. PARKS, Merchand. A. A. RAMSEY, M. D., Albien, Monroe Co., Iowa, writes Sept. 6, 1555; "During my practice of many years I have found nothing equal to your Chener Pectonal for giving case and relief to consumptive patients, or curing such as are curable."

We might add volumes of evidence, but the most convincing proof of the virtues of this granedy is found in its effects upon Probably no one remedy has ever been known which cared a many and such dangerous cases as this. Some no human at one reacht but even to those the Curter Pictora and ods re-

Aston House. New York City. March 5, 1856.

Docton Area, Lowell: I feel it a duty and appearing to inform you what your Chiman Perforat has done for my wife she had been five months laboring under the danger in a symptoms of Consumption, from which notable we still proving gave her much relief. She was stouchly failing, until Dr. Strong, of this city, where we have come for addice, reconsumented a tria of your medicine. We blers his kindness, as we do rour skill-for the has recovered form that day. She is not yet as strong in the used to be, but is free from her cough, and calls berself well. Yours, with gratitude and record.

ORLANDO SHELDY, or Surlayville. Aston House, New York City, March 5, 1936.

Consumptives, do not despair till you have tried Ayra's Commis PECTONAL. It is made by one of the less modical chemists in the world, and its cures all round us bespeak the high morits of its tirtues. - Padadelpida Leaper. Ayer's Cathartic Pills.

Ayer's Cathartic Pills.

The sciences of Chemistry and Medicine have been taxed their utmost to produce this least most perfect purgative which is known to man. Immunorable proofs are shown that they writtens which surpass in excellence the ordinary medicines, and that they win unprecedentedly upon the esteen of all men. They are safe and pleasant to take, but powerful at your. Their penetrating properties stimulate the viral activities of the body, remove the obstructions of its organs, purify the obod, and expeldisease. They purge out the foul humors which bread and grow distemper, stimulate sluggish or disordered or gam, into their natural action, and impart healthy tone with strength to the whole system. Note ofly do they cure the every lay complaints of every body. But also formidable and denier may diseases that have laffled the best of human skill. While they produce powerful effects, they are, at the same time, in diminished doses, the safest and best physic that can be suppleyed for children. Being sugar-created, they are pleasant to take and being purely vegetable, are free from any risk of harm. Cures have been made which surpass belief were they not substantiated by men of such exalted position and character as to forbid the suspicion of untruth. Many eminent clerry men and physicians have been their names to certify to the public the retiability of my remedies, while others have sent me the assurance of their conviction that my Preparations contribute immensely to the relief of my afficiel, suffering fell-wemen.

The Agent below named is pleased to furnish gratis my American Almanac, containing directions for their use, and certificates of their cures of the following complaints.

Costiveness, Bilions Complaints, Rheumatism, Dropsy, Heart burn, Headache arising from a foul Stomach, Nausoc, Indiges then, Morohid Inaction of the Bowels and Pain arising therefrom Flatulency, Loss of Appetite, all Ulcerous and Cutaneous Diseases which require an excanant Medicine, Scrodula or King Evil. They also, by p

Do not be put off by unprincipled dealers with some other pill they make more profit on. Ask for Aren's Pills, and take nothing else. No other they can give you compares with this in it intrinsic value or curative powers. The sick want the best at there is for them, and they should have it. Prepared by Dr. J. C. AYER, Practical and Analytical Chemist, Lowell Mass. PRICE, 25 Crs. PER BOX. FIVE BOXES FOR \$1. ABEL TURRELL, and by all Druggists and Med-
