For the Independent Republican. To Farmers' Wives and Daughters.

LADIES :- I have taken the responsibility to assert that the real estate of this Countycan be doubled in value in five years. I have addressed the farmers in relation to this subject. Now, I wish to consult with you to obtain your co-operation. Many of you are engaged in sewing and other employ-ments injurious to health. Many have healthy employments, but not profitable.— Therefore I beg leave to suggest the propriety of your trying to raise poultry for the market. Good Turkeys will bring about \$1 each : Geese, 75 ets. each, and you keep the feathers; Caickens, from 25 to 64 ets. each; Guinea Hens, 40 cts. Send off the carly poultry in September, and until New Years. How many of you can send off 20 Turkeys, 20 Gerse, 20 Ducks, and 100 chickens?-Such a lot of poultry ought to bring \$66;and if they were first rate and sent at the right time ought to bring \$100. If one former's wife, or daughter, in six, would raise so much poultry and send it to macket, how much money would be brought into the

county? I have said this county was capable ending off \$500,000 worth of butter per year. As large rivers come from springs and small creeks, so counties are made rich by constant droppings from the market; every branch of productive farming wants stimulating by coming to contact with the New York market, and productions will increase and money will become more plenty. For this reason, men have one third of the butter returns. If this wore the case, I think the farmer would have more butter and better butter. Half of the butter sent is of too poor a quality for the market, consequently, the farmer loses. It the wife receive one-third of the returns, she will try to make as good butter as her neighbor, and as much of it, and do it up in as nice a manner. Ladies, be very particular in getting up articles for the household mar-

I think there could not much be done in vegetables, but I think the next thing for the table is fruit. Grapes packed in saw dust oan be sent. Cranberries are \$4 per bushel. Let me advise your husbands to ditch their swall lands and set out cranberries. The rery best kind of Apples we oug! the send to Oct on an ocean all boundless we ride, market, and who has got ony? The very We're homeward bound! hom best kind of Pears we ought to send-and who has got any? Quinces too. Apples and cranberries can be kept in the collar till spring, or can be shipped in warm weather Promise of which on us each he bestowedin January, February, or March, by express. without freezing. Nice hopey will pay to Wildly the storm sweeps us on as it roars, ship. Chestnuts and Hickory nuts will pay to ship. Watch the kousehold markets. There are times these things are scarce and very high. Ladies, if you will apply your selves you will search out many other things which you have to spare and at a good profit. Will you please to think of these things and do what you can for the New York market. We're home at last! home at last! home at last! Softly we drift on its bright silver tide, ject, viz. to make this a marketing county, a estate in five years? I appeal to you, for I know your influence, and appeal to you because the object is more than a special to you because the proper than a special to you because the proper than a special to you because the proper rich county and to double the value of real cause the object is worthy of your attention. From here to New York via N. Y. & E. R. R., the country is poor till you get to Orange county, and that county is not as good as this, naturally. From here to New York ment of via D. L. & W. R. R., there is no dairy dersey is a fruit growing State—so we have no rivals only Orange county, and we must bent that. Will you all try? Will the farmers, when they seed down their land in the susually found in first class Greenies.

SUGARS, TEAS. COFFEE, SPICE, FLOUR and ALL, (by the sack or barrel,) FISH, and all articles usually found in first class Greenies. The attention of Farmers is solicited to a superior of GRAIN & GRASS SEEDS, which the country after you leave Scranton. New Many do not half seed their land. Ladies. please watch them, and a-k them a few questions. Do not let these lords run on to their destruction for in time you may have to suf-fer with them. Men generally lose nothing by consulting with their wives. Last season I had an order for 200 or 300 Hogs, but could not find them. The reason I had the order was this county begins to have a reputation for dairies. One thing leads to another, the more we produce, the more will be the demand upon us on account of our living

prosperty of this county. Yours Respectfully, HENRY McKINNEY. Enterial Duties.-It has been often remarked, and very truthfully too, that a man to write well must think well; and that in order to do either, even conceding the ability. and, equally important—something to write about he must have time. And yet a class of readers are quick to condemn the least falling off in editorial interest, and appear to regard an editor as a mere machine out of which can be incessantly ground every variety of reading, at the mere will of the operator, or to gratily their own copricious demands. No matter what the drawbacks -whether perplexed with a thousand business or domestic cares, whether his body be scorched with fever, or his head racked with pains; whether there is a perfect profusion of startling events, or a gloomy dearth of occurrences he is expected to be unfailing in his daily contributions, both, in quality and indaily contributions, both in quality and in- sire to get their money's worth—to "drop in sterest! To minister each day to a mass of once. Everything must, shall, and will go, readers, and to strive to do it acceptably, is our delight. We love our profession, and will be as indefatigable in our labors to interest our patrons as we can; but we are no steam engine, that does not tire, and we cannot perform pack-horse labor without some
times becoming overburdened and occasion.

Montrose, January 27, 1856. times becoming overburdened and occasionally flagging by the way side. If people could but think or know of the multitude of cares and anxieties incident to editorial life, they would be less exacting and withhold their censurable expressions when the columns of a paper fall short of their approbatior. Could they know of the large list of exchanges to be daily culled over, the communications to be examined criticised and corrected my constant over the superiority of the Homospathic over the Allopathic method of ed, proof sheets to be read, and the amount medical practice: of copy which must be furnished from a hun-dred different sources, they would cease to regard an occasional relaxation from editorial regard an occasional relaxation from Allop. labor as the result of indifference or idleness.
