man. This exercise of putting words in their true relation and connection with one another might be carried much further. We might take whole groups of words, which seem to us at first sight to acknowledge hardly any kinship, if indeed any, with one another, and yet with no great difficulty show that they 'had a common parentage and descent. For instance, here are 'shire,' 'shore,' 'share,' ' sheers ;' shred,' sherd ;' they all are derived from one Anglo-Saxon word, which signifies to separate or divide, and still exists with us in the shape of " to sheer,' which made once the three perfects, 'shore,' 'share,' 'shered.' 'Shire' is a district in England, as it is separated from the rest; a 'share' is a portion of anything thus divided off ;sheers' are instruments effecting this process of separation ; the 'shore' is the place where the continuity of the land is interrupted or separated by the sea; a 'shred' is that which shered or shorn from the main piece; a ' sherd' as a pot ' sherd' that which is broken. off and thus divided from the vessel ; and these which I have adduced by no means exhaust this group or family of words, though it would take more time than I can spare to put some other words in relation with it. But this analyzing of groups of words for the detecting of the bond of relationship between them, and the one root out of which they all grow, is a process which may require more etymological knowledge than you possess, and more helps from books than you can always expect to command. There is another process, and one which may prove no less useful to yourselves and to others, which will lie more certainly within your reach. It will often happen, that you will meet in books, sometimes in the same book, and perhaps in the same page of this book, a word used in senses so far apart from one another, that it will seem to you at first sight almost absurd to assume as possible that there can be any bond of connection between them. Now when you do thus fall in with a word employed in these two or more senses scemingly far removed from one another, accustom yourself to seek out the bond which there certainly is between these several uses. there certainly is between these several uses.
