Round her eyes her tresses fell, Which were blackest none could tell, But long tashes veiled a light Which had else been all too bright. And her hat, with shady brim, Made her tressy forehead dim-Thus she stood amid the stooks

Praising God with sweetest looks Sure, I said, heaven did not mean Where I reap thou shouldst but glean, Lay thy sheaf adown and come Share my harvest and my home.

The Father of Waters. The vastness of the Mississippi river, thus given by a newspaper correspondent - who writes from Maiden Rock, Wisconsin-"While I look upon the river, three miles wide at this point, my mind seems to take in at one grasp the magnitude of the stream From the frozen regions of the north to the sunny south, it extends some 2,300 miles and with the Missouri is 4,500 miles in length. It would reach from New York across the Atlantic, and extend from France to Turkey, and the Caspian Sca. Its average depth from its delta, in the Gulf of Mexico, is fifty feet, and its width half a mile. The trapper or the Upper Mississippi, can take the furs of the animals that habit its source and exchange them for the tropical fruits that are gathered

Best do., between 1 & 2 yrs, Youatt on Cattle, and 2 doest, do., ... Albany Cultivator and 1 Best, do., under 1 year, ... 1

Best Devon cow, 3 years old or upwards, American on the bank below. Slaves toil at one end of this great thoroughtare, while the red men of the forest roam at the other end. The floods are more than a month traveling from its source to the delta. The total number of steamers affoat of this river and its tributaries are 1,500, more than twice the entire tonnage of England and equal to that of all the other parts of the world. It receives a score of tributaries, the least of which are stronger than the caunted streams of mighty empires. It might furnish natural bounds ries for ail Europe, and yet leave for every country a river longer than the Scine. engulfs more every year than the revenue of many pretty kingdoms, and rolls a volume in whose depths the cathedral of St. Paul could be sunk out of sight. It discharges in one year more water than has issued from the Tiber in five centuries; it swallows up.

ets arms lie, space for twenty more. The American Elag.
We are indebted to Samuel C. Reid, Jr. Esq., of Washington, for a pamphlet chtitled "History of the Design of the Present Flag of the United States." The first hational flag of the present design, adopted in 1818, was made under the direction of the veteran and gallant Captain Reid, who commanded the privateer General Armstrong, and is still living. Conclusive contemporary evidence of this is presented in this pamphlet. Let us supply a little prior history. A Boston letter of January, 1776, says: #1 can see the robels camp very plain, whose colors a little while ago were entirely red," but " they have hoisted the Union flog."-Another Boston letter, January, 1776, speaks of this Union flag as having "thirteen stripes," which was hoisted at "Mount Pisgah," (Pros. pect Hill) under a salute of "thirteen guns" and "thirteen cheers;" and Washington says in a letter January 4, 1776, that this "Union flag" was hoisted "in compliment to the

it a half a fathom; in one single reservoir,

(Pepin,) 2,500 miles from the sea, the navies

might safely ride at anchor. It washes the

the national flag in 1777. The stripes continued to multiply as States were added to the Union, so that the number got to be eighteen; and the beauty of the flag threatened to be destroyed. At length Congress determined to alter it; and. number of devices, the main ones being the happy ones to return to the original thirteen stripes, and to add a star for every new State. On the 25th of March, 1818, a comstars, forming one great luminary, as per pasteboard plan you (Capt. Reid) hunded"

following Fourth of July.

This pamphlet is exceedingly interesting, and has the speech which Mr. Wendover made in Congress at the time of the adoption of the design of the present flag .- Bos. Post.

Re-Shingling Old Roofs. I am fully convinced that millions of dollars might be saved in our country every year, by generally pursuing the following method: Whenever a roof begins to leak, and you wish to re-shingle it, do not take off the old shingles-put the new shingles on the top of the old ones-but make use of six penny nails in place of four-penny or shingle-nails. The advantage of this method will consist in the

following particulars: . 1st. You will save the expense of removing the shingles.

2d. The building will not be exposed to wet, in case of rain, before it is finished. 3d. The roof will be much warmer and

4th. Neither snow nor rain can beat under

the butts of the shingles, by heavy winds.

5th. The roof will last good full one-third I have tried the plan, and find it has these

more time to put them on, and, if done in a

old shingles are too much decayed. All the moss (if any) should be removed, or swept off with a stiff broom, before putting on the Judges.—E. M. Hall, A. R. Patrick, and Martin new sbingles. Plattsburg. JOHN T. ADAMS.

ELDERBERRY PIES,—Here is a receipt for making good pies of elderberries. They may be used either fresh or dried. Line the plate or tin with good crust, lay in as many berries as you would currents put in a large quantity of sugar or molasses, at least a tea-cup of sugar to a square tin. Many people think, because they are not a sour berry, they do not need much sweetening, but if considerable is not used, they will be insipid. Sprinkle just flour enough over them to thick-en the syrup a little, but not enough to make it like dough. Cover with crust and bake. If dried berries are used; let them be washed clean, then put to soak over night and stewed

more than myself, but pity them that know

BENTLEY, READ & CO. New Theory of Neutralization. TO THE AFFLICTED EVERYWHERE.

DOCTOR J. P. LAMBERT. Auburn 4 Corners, Pa., PREATS most diseases under the application of

TREATS most diseases under the application of the principles of Neutralization.

This Theory, though new, is the most truthful, and in its application the most effective of any other ever propagated. Its adaptation to meet sudden entergencies, its reasonableness, its rapidity of action when Therapeutically applied, and its effectiveness and certainty secures for it a confidence never secured for any other. It needs but to be known, to be Full double set on Gold, Gums and Banded, \$100,00 full and for any other. It needs but to be known, to be appreciated. It saves more patients, and relieves them more quickly, than any heretofore known theothem more quickly, than any heretofore known theothem more quickly, than any heretofore known theothem.

Silver Plate, half the above rates. ry. It reveals first causes, the effects of those causes on the living man, and points out the NEUTRALIZING REMEDY.

t is no strange affairs, for it effectually and forever o root out Fover and Agne with one dose of medito root but rever and Ague with one dose of medicine. There need be no failures in the cure of Ferers, Dysenteries, Inflammation of the Lungs, &c., &c.
None need die with those complaints, for every case
can be cured with unerring certainty. There need
no man die with Pleurisy, Illiac Passion, or Crampi in
the Stomach; from three to ten minutes will positively relieve and cure the last two named cases. It exacts but few medicines, (so few, that patients often wonder how so few can give so great and sudden re-lief,) and those of the mildest character. It will bear the most rigid scrutiny, and defies a flaw to be picked in its pathology. It cannot possibly hurt any one, but cures nearly all that submit to its action. Ample proofs can be furnished of its effective power to cure, he having met with but one fatal case, within one year, out of several hundreds of cases brought under year, out of several nundreds of cases brought under its treatment, and in curing many cases given up to die by those following the OLD, THEORIES. The rap-id dispersion of disease, before the mild and bland treatment, founded on the theory of Neutralization, is a sufficient vindication of the principles of it, and a triumphant proof of its adaptability to most of the orms of disease around us.

Now you may ask what is this New Theory? All

the answer I can give you here, is, that it neutralizes the cause engendering disease, and in this way cures the case, by arresting it at once.

Stowell's Evergreen Sweet, Early Dutton, Early Brown, Early Dutton, Charges proportional to the severity of the case.
Extra charges for night services.
