A mighty though silent transformation in the condition of human existence has just been effected by the little wire stretching across the occan's bed from the coast of Ireland to that of British America, and one inevitable result of this must be an upexampled community. ble result of this must be an upexampled community of feeling and interest among the nations of Christendom, and a consequent desire for a more intimate acquaintance with each other's doings through the medium of the Newspaper Press. It seems hardly possible that thousands should not henceforth regularly read their own journals, who have hitherto been content with an occasional glance at those taken by their neighbors; while many who have hitherto-been content with a Weekly issue will now require a Semitheir heighbors; which have the hard to the many content with a Weckly issue will now require a Semi-Weckly or Duily. In short, Intelligence, always a vital element of growth in wisdom, success in business, or enjoyment in life, has now become indispensable to all.

It asks especially the patronage and active favor of Republicans—of those who hate all forms of oppression, and desire that every rational being shall be free to employ his faculties in such innocent manner as he shall deem best—of those who would exten Liberty and limit Slavery—but it who would extent therety and him Slavey — out further appeals likewise to all who look and labor for the return of National thrift, plenty, prosperity, through the protection of American Industry by wisely discriminating duties on imports—all who favor National Progress through internal development and melioration rather than by external aggression when the National Progress in the National Progress of the Progress of t and melioration rather than by external aggression and extension—all who would rather have the National resources devoted to the construction of a Railroad to the Pacific than to the purchase or conquest of Mexico, Nicaragua, or Cuba—all who wo'd retrench radically our present inordinate Federal expenditures by abolishing or immensely reducing the Army and Navy, and expending the money thus saved on works of beneficence which will endure to bless our children—all who profoundly realize that 'Rightcousness exalteth a nation,' and that no real advantage can ever accrue to any person or commu-"Rightcousness exalteth a nation," and that no real advantage can ever accrue to any person or community from acquisitions or successes achieved by means which contraverie the laws of Eternal Right. The free allotment of limited portions of the Public Lands to actual settlers thereon, and every hopeful plan intended to diminish the sum of human misery from dearth of employment or inadequate recompense—every scheme especially that seeks to help the unfortunate by enabling and eaching them to help themtunate by enabling and caching them to help them-selves—must command our carnest sympathy and ooperation.
