For Lowering and Raising

CARRIAGE TOPS. D I the use of this improvement, the Carriage top can be raised or D lowered from either the right or the left, the omidde or the inside, thereby obviating the difficulty heretofore existing of springing one joint and then the one on the opposite side, as well as the extreme care necessary to prevent the top from failings to heavily as to break the bows, peops, ac. This is effected by means of a small lever to connection with the heliow prop, to which an arm no or holder is attached. The top may also be raised or lowered with PERFECT EASE, by means of the lower lever, which is usually placed at the right hand side of the seat, the weight of the top being nearly almost which case it down while in the act of failing, and assist in raising it.
