More lovely still on the window sill, The devered flow rets rest,
While midst the leaves on the moss-grown eaves,
The martin builds her nest;
And all day long the summer breeze
Is whispering love to the bending trees. Over the door, all covered o'er

With a sack of dark green baire,
Lies a musket old, whose worth is told,
A relic of other days;
And the powder pouch and the hunter's horn,
Have hung beside for many a morn. For years have fled with noiseless tread, Like fairy dreams away, And left in their flight, all shorn of his might, A father—old and gray;
And the soft wind plays with his anow-white hair,

As the old man sleeps in the easy chair. In at the door, on the sanded floor, Light fairy tootsteps glide, And a maiden fair with flaxen bair Kneels by the old man's side— An old oak, wrecked by an angry storm While the try clings to its trembling form.

From the American Agriculturist-Prize Article. The Dairy ... No. 1.

As this subject, from the extent of investigation it will require, in the articles of Butter and Cheese, will demand a series of chapters, which, in the end, will be fully equivalent to a cheap and available hand-book for every rural housekeeper, we shall, even at the risk of appearing tedious at first, try to cover all the necessary ground, and in the most condensed manner possible, to embrace this entire interest of our agriculture, namely: the Proper Soils and Climates; the best kinds of Cows; the proper Grasses and Foods; the best methods of making Butter and Cheese. We shall not follow the modern custom of going to England, Ireland, Holland, France, Switzerland for our main ideas, but endeavor to discuss the best and most approv ed modes of dairy practice at home-con tending, by the way, that we both can and do make as good butter and cheese in the United States as in any other country whatof capital in land, buildings, cows, and labor are invested in it-more or less productive. as the soil and climate whereon and wherein it is located, are appropriate, and the labor applied skillfully directed. Of its importance, then, no argument is necessary.

The best dairy climate, of the United States, as so far developed, may be said to commune at about the parallel of 41° north, and extend to about 45", while its present practical longitude extends from the Atlantic met to about 50 west from the meridian at Washington, taking in the majority of the Western Reserve" lands in Ohio, borderthe lime-stone wheat region, and near Syra-cuse, running north to Lake Ontario, and fol-policy of letting them lie in permanent grass, lowing its southern border to the St. Lawrence, and thence east to the Atlantic Ocean. There are some exceptions, however, even the soil, and geological character of the coun try; but, so far, this region comprehends the

Pennsylvania, and some others not now nec- proper soil, unattractive even though it be packed for market, which will keep sweet course or train, that the aid of natural, adfortable purposes six months to a year, inquality can be made almost anywhere that selection. good grass will grow, or other succulent food can be obtained for cows; but such butter will not keep for any length of time, and for distant market purposes, is unprofitable to the purchaser. The new States of the Northwest may in time produce good butter for the Eastern markets when their artificial grasses shall have become properly develop-ed, but as yet their soils have not proved them to be a part of the favored dairy re-

The dairy soils, so far as producing the best butter and cheese is concerned, are peculiar, particularly in cheese. What the peculiarities are it is not, in all cases, easy to describe. A solling, elevated country, hilly oftentimes, abounding in springs of soft water, and drained by clear, rippling streams flowing over gravelly beds, compose its predominating character; while loamy soils, inclining to clay-or argillacious, running into shale, are the atrongest usually, as being the natural blue-grass and white clover lands, and usually of "secondary" formation. Yet fine dairy lands are found in the "primitive" districts, loamy, in general, with a friable warm subsoil beneath, and sometimes abounding in loose stones, or fixed rock, either gran-ite, or trap—as in New England, Eastern New York, and Northern New Jersey while the shales and clays predominate chiefly in the dairy land of Northern, Southern, and Western New York; Northern Penn sylvania and Ohio. In all these the best and sweetest natural grasses obtain—and perhaps half a dozen or more different varieties abound, in themselves full of the best milkproducing qualities. Among them the common blue grass (poe-compresse,) and white clover (briolium-repeas,) predominate, while they are filled in with timothy, red-top, redclover, spear, or June grass (poa-pratensis,) and some others less conspicuous. We say as require re-sowing every few years on soils not tenaciously holding these grasses by their natural tendency—like some of the strong limestone lands, the very best for wheat, but not so friendly to natural pastures. Indeed, we contend that no lands are of the best quality for either the butter or cheese dairy where the grasses upon them are not of the above named varieties, and where they will not flourish continuously from year to year without plowing and re-seeding. Such varieties are eminently healthy, and nutritious, producing milk in the largest quantity, and vishaet quality.

richest quality.

It may be asked, why are not the wide prairies, and wooded regions of the Western and North-western States equally good for the dairy, producing, as they do, the finest beef, and wool, and in a climate essentially the same as the soils apove described? In answer, we say that the soil is essentially different; the water is hard and the face of the country unlike. Besides, no butter or cheese of the best quality has been yet produced there, although frequent trials by ex-perienced Eastern dairymen have been made. "Western" butter, of any age, is usually quoted in the Eastern Markets as "grease" at a low price, and choose made must of

"Western Reserve" is scarcely known, any 1858. J. DICKERMAN, Jr. 1858. where. So far, then, the cheese districts of our country seem to be pretty well defined, while the table butter of those regions out-side of them, appears to be confined chiefly to the local markets within them. Such facts if facts they be and of them

the writer has no doubt-might open a wide field for speculations in the future agricultural economy of our country, in the absence of other new dairy lands opening in the future at the West and North-west; but as this is no part of our present subject, we shall not further notice it, other than by simply remarking, that our present dairy lands bid faiters himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing his own Wares, Stoves, &c., give him a decided adherent himself that his facilities for manufacturing himself himself that his facilities for manufacturing himself fair to be ultimately much more valuable than at present considered, when the de-

ordinary farm lands, according to natural fertility, location, or improvement, facilities per cent more than an article is worth. In the line of for getting to market, or otherwise, and may now range in value from twenty to one hund-

form the best of hay for winter forage, and although they may, under ordinary us-age, "run out," after a few years, with the pasture grasses altogether, yet, by plowing and manuring they will still hold their pro-ductiveness in hay for all coming time. Al-

though not intending to now treat of the management of either meadow or pasture Inada, as a system, we will remark that pasture, once well set, properly used, need never be broken up, for the reasons, that it takes them half a dozen years to get well re-seeded, and acquire a thick, heavy turt, and that the grass of an old sod is every way sweeter, and more nutritious than that of a now seeding. Of this fact all experienced dairymen are aware.

We know extensive ranges of pasture, and the impact of the pasture, and the impact of the redit system; we have suffered enough by it already, and are determined to rid ourselves of the whole "citter" Believing that the nightle signeroes is the true system; we have the nightle signeroes is the true system; we have a true to the pasture of th We know extensive ranges of pasture, and nowing lands in our best dairy regions which

have never been disturbed by the plow, even on their first clearing—two hundred years ago, and down to fifty—the grasses having been simply sowed upon them with a first harrowed in crop of oats, wheat, barley, or ever. The Dairy is a largely productive rye, and remained ever since in the full and branch of our agricultural wealth. Millions profitable production of grass, either pasture or meadow. We are a much younger country than Eogland, and our climates are unlike, forming, therefore, no exact parallel in the mode of cultivation which should govern them; but it is well enough to remark that in her best dairy districts, as Cheshire, Gloucester, and others, the lands devoted to that object have lain in grass from time immenorial-perhaps a thousand years, and upwards. We know large farms in the rich lime-stone and blue-grass regions of the "Valley" of Virginia, and in Central Ken-tucky, worth a hundred dollars an acre, which have lain in grass, devoted to grazing of beet ing on Lake Erie, and embracing in its range cattle ever since their first clearing—eighty that of Ohio, Northern Pennsylvania, the years—and said to be at this day better than "Southern tier" of counties in New York- ever. We do not say that these natural or all the western part of the State south of grass lands will not, at some time, need re

little dispute. There are some exceptions, however, even Saying thus much in favor of congenial within these boundaries, caused chiefly by soils, and the proper climate for the dairy in producing the best butter and cheese, we do not deny that there are wide, and frequen chief present Cheese-making, as well as the districts which will produce passable butter, best Butter-making, district of the United and indifferent cheese; but they are of such character as to render these articles unprofit There are many localities, however, out sble as staples of their production. They side, both south, west, and north in the Cancan be better turned to ordinary crops, or raising cattle, feeding beef, breeding sheep, the "Sweet-scented-vernal-grass" neighborand growing wool. So, then, let him who boods of I'hiladelphia, and other portions of is about to embark in the dairy select the essary to recount. To explain the term lat first, yet by the proper application of lagood butter," we mean butter that can be bor, skill, and capital he will find, in the cked for market, which will keep sweet course of time, that he has judged wisely to cluding its shipment for "Navy" consumption—like the "Irish Rose Butter," or that of Holland. Every-day table butter of fair In our next we will talk of cows, and their

so long as they produce well, there can be

Scented Oils,-Some of these are sold by perfumers at a very high profit. They can all be prepared at a very small expense. Take a quart of common olive oil, and heat Take a quart of common onve on, and neat it in a stoneware vessel, up to 212 degrees, then add half an ounce of sal-soda, and stir all for fifteen minutes. Allow the oil to cool, and a sediment will fall to the bottom; pour off the clear oil, and scent it with any of the essential oils, such as rosemary, bergamot, and lavender. One fourth of an ounce of essential oil will scent a quart of the prepared oil, which is very excellent for the hair, and equal to Rowland's celebrated Macasser oil, sold at such extravagant prices.

A person was remarking the other day, how very cheap everything has got.—
"Not everything," replied a friend. "Why, what has not?" "Woman." Oh, I forgot! women are always dear!"

COBB & ROGERS

OFFER to the public, at prices that cannot fail to suit, a large and superior assortment of

GROCERIES.

At the old and well-known establishment former occupied by O. M. Crane. SUGARS, TEAS, COFFEE, SPICE, FLOUR, and SALT, (by the sack or barrel.) FISH, and all articles usually found in first class Groceries.

Flour by the Wholesale and Retail. As we mean to merit, we hope to receive a liberal we have also opened a

BUTCHER SHOP in the basement of Boyd & Webster's new Store, corner of Main and Turnpile Streets.

N. B. CASH paid for Pelits and Hides.

COBB & ROGERS.

Montrose, Dec. 15, 1858he20oct.

FARMERS ATTENDIL THE undersigned would respectfully announce the FARMERS and all others interested, that MOTT & TILDEN,

at the old stand of M. & E. MOIT, are prepared to furnish PLOWS of the most approved patterns now in use, such as Blatchiey's, Moti's Iron Beam, &c. Also Points of all kinds, Landsides, Cu'tivator teeth, and all kinds of castings for Farmers and others, all of which we propose to sell as low as can be afforded by any establishment in this country.

ELIJAH MOTT.

G. A. TILDEN,

We are also agents for Emery's Horse Powers, Drag and Circular Saws for wood, also Dog Churn Powers, which we can furnish on short notice.

Blacksmithing! Blacksmithing!! THE undersigned would announce to the citizens of Lenox and vicinity that he is prepared to do all sorts of

BLACKSMITHING. CARRIAGE IRONING, HARDWARE

AND STOVE EMPORIUM IN FULL BLAST! THE UNDERSIGNED would take this opportunity to inform his friends and customers that he has recently made large additions to his former extensive stock of

Hardware, Stoves, Stove Pipe, Stove

than at present considered, when the demands upon their annual yield shall have crowded their production to their proximate limits. Understand: these dairy lands are not all productive alike. They vary in producing value, as much as our corn, wheat, or ordinary lands as much as our corn, wheat, or ordinary lands as our lands as our corn, wheat, or ordinary lands association to make the manual to make the manual to make the manual call or the manu

Shelf Hardware,

reu uomars per acre. We note the facts incident to dairy lands, generally, to guard against the belief, with many, that dairies can be adopted any where, and by any body, without regard to soil, climate, or position.

Good zasture soils are usually good hay soils also. Timothy, red, and white clovers, and red-top will flourish wherever the pasture grasses we have named naturally grow.

Our stock of Dry Goods, Groceries, Boots & Shees, Hats and Caps, Yankee Notions,&c. is as large as the times will admit of. They were

sed at a low figure, and will be sold at prices espond with the times. READY-MADE CLOTHING!

the nimble sixpence is the true system, we are re-solved to adopt it and are offering our goods at prices

Montrose, Nov. 10, 1858.

To the Public! SOME Merchants publish a few low prices, or the prices of a few low priced articles, as an induce ment to persons to make their purchases of them, u ment to persons to make their purchases of them, under the presumption that every thing is equally low.
Without occupying space in the public papers to
enumerate prices: I wish it distinctly understood,
that I will sell GOODS as low for the quality, as they
can be bought in any other Store in this place or
County. Baits and Hooks not used. Purchasers
will generally find good qualities of articles at TURRELL'S,

and in Drugs, Medicines, Paints, Oils, and Dye Stuffs, the very best, and the assortments full. The FANCY BOODS DEPARTMENT is also extensive. Also, choice Family Groceries. Crockery, Wall Paper, Jewelrg, Perfumery, &c., &c. In short, nearly every thing usually kept in country stores. As I deal in many departments of trade, and have more articles than I can well cumerate in the limits of a Newspaper, I shall not attempt it; neithre will it be necessary, under these circumstances, to fill a column with useless repetitions and blanks.—
The people are invited to call and examine for themselves.

Montrose, Nov. 10, 1858.
