I had hoped ed conclusion :) Traveler. Friend, can I obtain accommo dations here for the night ? we might land in the night, and so, under Arkansas Artist. No, Sir-'nary 'commofavor of darkness, the fugitive be enabled to da'ions go on shore, unseen by those on board. 1 T. My dear sir, I have already traveled determined to watch for and assist the creature, who had been thus providentially con-

thirty miles to day, and neither myself nor my horse has had a mouthful to eat: why signed to my care. On the sixth day (we below were being moved, in order to come out of everything to eat in the house; Bill's gone to mill with the last nubbin of corn on at something which was wanted; and so

SIBERIA .- Siberia has been civilized by the exiles sent thither, and by voluntary emigration from Russia, till nearly four of the five millions of inhabitants of that region are Europeaus, or of European descent-more fortunate than their western kinsmen in this that there is not a serf among them. Siberia is fast becoming a place of great commercial importance. Its proximity to Oregon and California will give a trade which will make Russian empire. The ice used in San rran-cisco was formerly obtained from the United States. It now comes from Siberia, affording constant employment to half a dozen ships la five years from now the trade between Siberia and California will be a matter of importance. The Siberian mail is conveyed from St. Petersburg to Moscow by thence to Irkutsk, the capital of Eastern Siberia, in carriages drawn by horses. The distance from Moscow to Irkutsk is 3,426 miles, and there are 210 mail stations on the road for changing horses. The mail communication is semi-weekly, and the expense of it to the Russian Government is about \$237, 000 3 year. The mail from Moscow to Irkutsk is generally conveyed in about 25 or 30 days. The mail communication between Russia and China is carried on by a horse post between Pekin and Kyachta, a frontier town in Trans Baikal, close to Mongolian China, once every three months. The distance between Kyachta and Pekin is reckoned about 1,000 miles, and is traversed in about 30 days. The China mail is conveyed on horseback. USEFUL EFFECTS OF LIGHT .-- Sir James Wylie, late physician to the Emperor of Russia, attentively studied the effects of light asa curative agent in the hospital of St. Petersburg, and he discovered that the number of patients who were cured in rooms properly lighted, was four times that of those confin in dark rooms. This led to a complete retermined-not-to-be "host" out a little, before form in lighting the hospitals. In all the informing him of the fact that he too could cities visited by the cholera, it was universalplay the "Arkansas Traveler;" which, once ly found that the greatest number of deaths being known, he conjectured, would be a took place in narrow streets, and on the sides of those having a northern exposure, where T. Well, friend, if I can't stay, how far is the salutary beams of the sun were excluded. The inhabitants of the southern slopes of A. Ten miles; and you'll think they're mountains are better developed and more mighty long ones, too, afore you get that.
