Thou remember'st Since once I sat within my dormitory, And heard a tom-cat on a baker's shed, And heard a tom-cat on a baker's shed,
Uttering such piercing, unharmonious breath,
That the loud babes grew civil at his song;
And certain men shot madly from their hearths,
To stop grimalkin's music.
That very time I saw, (but thou could'st not.)
Running between the bake-house and the shed,
Richard all armed; a certain aim he took
At the black minstrel, throned by the spout;
And loos da brick-bat smartly from his hand,
As it should slay a hundred thousand cats;
But did I see young Richard's semi-brick
Smash through the chaste panes of a neighbor's hou
And the screnading pussy passed on,
In feline trepidation, Dickey-free.
Yet mark'd I where the bat of Richard fell;
It fell upon a little tailor's head on a little tailor's head-Betore, milk-white; now purple with the wound-The doctor called it "fracture of the skull."

LUCK AND PLUCK.-Every community has its "lucky" man. The boys in the street know him, and point him out as he passes; lu the artificial soil of our gardens, strawthe admiring crowd lift their hats to him; the unsuccessful envy and perhaps traduce him. Success seems natural to him. If he was not born with a gold spoon in his mouth, he has several inches apart. long since exchanged his wooden one for it. Every thing he touches seems to turn to his general principles connected with successful general principles connected with successful strawberry culture. Now for an application: years since, would now sell for double the money. If share is but one good or on relief. in the town, you will be sure to find it in his ways brings him. Depend upon it, there's two feet deep, and if the soil is warm, something in it, he's a lucky man. This and porous throughout all you have to do is to just spade up the earth, level it off, and set to just spade up the earth, level it off, and level it of of his hard fate, and sigh and wait for luck; let him feel the conviction that success is something indefinite, uncertain, which may or may not follow effort, as a kind of mysterious, uncontrollable chance may direct, and it is not difficult to predict his future. His stars will all be unlucky; the golden comet with its splendid train of glorious results for which he looks, will never be seen above the

The man of "luck" is a man of "bluck." tic. It has a ring like steel. It tells of a man who does not know when he is conquered. If the backward Spring disappoints his calculations for a large corn crop, he is sure to have a fine field of buckwheat; or if this fail, he rejoices in a fallow ready for a notable vield of Winter grain. If debt presses ing boldly when there is a probability that success may be attained. Scarcely a man success was within his reach, had he possessold ways," good-only in age. The cultivator especially, who hopes to succeed now. must have not only the energy which rises against opposition, and bears up under misfortune, but also the enterprise which looks for and adopts improvements; and there never was a time when such enterprise had surer promments, both in the manner and implements of cultivation, more marked and abundant. The plucky man of to day will be the lucky man of ten years hence.—. 1m. . 1griculturist.

Echors.-A good ear cannot distinguish one sound from another, unless there is an interval of one ninth of a second between the Crimson Cone. arrival of the two sounds. Sounds must, therefore, succeed each other at an interval of one ninth of a second in order to be heard distinctly. Now, the velocity of sound being elèven hundred and twenty feet a second, in one ninth of a second the sound would travel one hundred and twenty four feet.

cles are placed opposite to one another, as parallel walls, for example, which reflect the

which repeats seven syllables three times; at Mark Lane Express, in answer to the ques-Woodstock, in England, there is one which tions "Why do we waste our straw, so valrepeats a sound seventeen times during the label for reeding purposes? How much day, and twenty times during the night.— should it be worth per acre? He says:

An echo in the villa Smionetta, near Milan, "The quantity of wheat straw removed is said to reject a sharp sound thirty times from an acre of well-farmed clay, where the audibly. The most celebrated echo among average is 5 qrs. per acre, would be 2 tons the ancients, was that of the Metelli, at Rome, per acre. Science has shown us that, ployed

upon a trumper, they were returned by this erally being done over millions of acres."

echo upon a key a third lower than the original notes, and shortly after upon a key still libs fine cut straw, 8 libs, of hay, 5 libs. rape

There is a surprising echo between two barns, at Belvidere, Alleghany county, N. Y. The echo repeats eleven times word of one, two, or three syllables; it has been heard to repeat thirteen times. By placing oneself in the centre between the two barns, there will be a double rebo, one in the direction of each barn, and a monosyllable will be repeated twenty-two times.

A striking and beautiful effect of echo is produced in certain localities by the Swiss nountaineers, who contrive to sing their Rans des Vaches in such time that the reflect ed notes form an agreeable accompaniment to the air itself.—Professor Silliman.

notes of a bugle, as the traveler rows from point to point in the beautiful lake.

WEAT NEXT!-A recent number of Life Illustrated, says :- "Everybody may not be average profit after paying all expenses inciaware that nearly all the pretended wine in this market (New York city) is a spurious concoction of cider, whiskey, sugar, water, and villainous drugs; and that much of the sparkling champagne, which is sold at \$2 a bottle, is manufactured of turnip-juice instead of the juice of the graps. A few days since a freight train on the Eric Railroad brought to this city 20 barrels of turnip-juice, which will soon, no doubt, find purchasers, who will eagerly guzzle it, under the ballucination that they are enjoying themselves on the choicest imported article; the guzzlers, howthe best, if not the only means to rescue him
ever, though cheated, are not robbed at all,
from certain death; and it is infallible. So
for the turnip-juice is actually the least inju. for the turnip-juice is actually the least inju-rious of the two."

respondent of the London Agricultural Ga. dirt be cleared from about the foot of the sette concludes, from a number of trials with trunk early in Spring; a ring subbed unionth the dynamometer on plows with and without around the bark, and a strip of brown paper wheels, that the wheel plows are of one-third covered with gas tar fastened about it. lighter draught than the swing ploms.

A correspondent who has a horse, the use of pork as an article of wholesome who kicked everything within reach to pieces diet. It was the flesh of the loathsome swine in his stall, cured him by fastening two. feet of Syris, which fed on odds, dead bodies, and of trace chain to each hind foot, thursobliging the horse problibited, not the grain-fed him by fastening two. feet him to punish himself every line he kicked. The American farm. The rivest fruit grows on the soughest wall. The top strawberries the action the first.

How to Baise Strawberries. This month is one of the best in all the year for planting the strawberry, for this reason, and because many persons still imagine that there is some mystory in the taking of this excellent fruit, we will now set forth all that is really necessary to know on the subject. For a more full discussion of the theory and practice, we refer the reader of articles in our recent volumes.

The strawberry likes a warm, sandy loam, with a sunny exposure. It will bear fruit in poor soil, but to produce large berries and a plenty of them, the land must be enriched. It will bear fruit a short time, in a light and thin soil, but to prolong the season of bearing into the midst of dry weather, the soil mus be deepened by trenching (digging). Some varieties have imperfect flowers, i. e. are either stammate or pistillate, (male or female) and can not fertillize themselves, therefore, those of one sex need to be planted in the neighborhood of the other. A few have perfect flowers, and are called hermaphrodite berry plants are apt to grow too rank and dense for their highest productiveness, and

should be thinned out so as to keep them

The above are perhaps the most important money. If there is but one good crop raised ed by trees or vines, and where there is no standing water in the subsoil. If the garden out your plants. but supposing the subsoil is hard, and the top soil somewhat stiff and cold, and exhausted by other crops, then proceed as follows: . Begin at one end of the proposed bed, and take off the top soil one spade deep and four feet square, and carry the same to the other end. Spread over this uncovered spot, a compost of old manure and rotted weeds or muck from the woods, and spade it down and mix all thoroughly togeth-

er. Then uncover four feet more, throwing the top soil over the part already manured. We like that word. It is solid and yet elas Manure the uncovered soil as before, and so proceed the whole length of the bed: on reaching the end you will find use for the top soil taken off at the beginning. If now, the top soil is not rich enough, or is too hard and sterile, apply a dressing of fine compost, or sand and wood earth and ashes, mixing the ble yield of Winter grain. If debt presses whole thoroughly. Then level off and lay heavily upon him, it but bends him more out the beds four feet wide, and as long as closely to his work. But more than all is your space demands. Three beds, of that the "plucky" man distinguished by ventur width and fourteen feet long, will supply an ordinary family and their cousins, with abundance. Set three rows in each bed, and of fifty years, but remembers the time that let the plants be eighteen inches apart in the rows. Mulch the ground between the plants ed nerve enough to break from his old rou- with tan-bark or straw. If the weather is dry tine, and follow the opening; while many a for several weeks after planting, give an ocone has been deterred from competence and casional watering. Keep the runners clipped, casional watering. Keep the runners clipped, even fortune, by timidly adhering to "good and the weeds-let none be seen. You may be tempted to let the plants bear fruit the first year; but this will only weaken them and prevent a bountiful crop the second season. The very best way is to keep down all the runners, and to pinch off every blossom trimmings to match, of all shades,

As to the best varieties, it is no easy matise of success, for never before were improve- ter to decide, where there are so many excellent sorts; but the following may be relied on as certainly good:
Staminate sorts: Wilson's Albany, Long-

worth's Prolific, Hooker, and Large Early Scarlet. Pistillates: Hovey's Seedling, McAvoy's Superior, Burr's New Pine, Black Prince,

Some of the above are regarded in certain quarters as hermaphrodite, viz.; Longworth's Prolific, Hooker, and Wilson's Albany.

The staminates and pistillates may be set together in the same bed; but it is better to keep them in separate patches. If they are within six or eight feet of each other, the pis-Repeated echoes happen when two obeta tillate plants will be sufficiently fertilized.

THE TRUE USE OF SERAW .- Mr. J. J. Me sound successively.

chi, the celeorated and successful English farmer, has sent a valuable paper to the chi, the celebrated and successful English Bonnets,

which, according to tradition, was capable of in and considered as manure, it is worth but repeating the first line of the Encid, containing fifteen syllables, eight times distinctly, if properly prepared, realize a value of 40s.

Dr. Birch describes an echo at Roseneath. per ton. Now what farmer would knowingly Argyleshire, which, it is said, does not now throw away 22 to 23 per acre, in so econom exist. When eight or ten notes were played it a business as farming? and yet this is lit-

lower. Dr. Page describes an echo in Fair. cake, 2 los. bean meal, 4 lb. bran, 4 lb. maltiax county, Virginia, which possesses a simil combs,—all of these being properly moistenlar curious property. This echo gives three ed in hot water, the straw requiring more distinct reflections, the second echo much the than the rest,-35 lbs. mangel or Swedish most distinct. Twenty notes played upon turnips. The essential points are warmth a flute are returned with perfect clearnese, and moisture; the cattle being well sheltered But the most singular property of this echo and duly cared for. The straw is a most nuing one partner steadily in New York City to devote is, that some notes in the scale are not re-tritious food; 100 pounds of it containing 72 all his time to this particular branch of manufacture. turned in their places, but are supplied with lbs of muscle, fut and heat-producing substannotes which are either thirds, fifths, or oc ces. The soluble fattening substances are equal to 181 lbs. of oil to every 100 lbs.

> The farm team, says the Michigan remer, on which the work and subsistence of the rest of the stock depends, should be the best, soundest, heaviest, most active and most docile horses on the place, and no man should for a moment suppose that light little scallawags will ever do more than be unprofitable, by wasting the season that is most precious to the husbandman.

At the Farmers' Club of West Cornwall, Connecticut, one of the members observed that no talking should be allowed while milking was going on. Another said that he discharged a man because he would The Killarney notes are quite famous, and talk and interrupt the milking in his dairy, resound with marvellous clearness to the and that in three days the increase of milk was equal to the man's wages!

It is stated that of forty crops of corn offered for premiums in Massachusetts, the dent to cultivation was \$51 per acre. Thus will be seen the benefits not only of offering premiums for this crop, but also that when men contend for a premium of this kind, the crop itself repays them, whether the award is

in their favor or not. When, by letting down a burning candle, it is found that a well contains carbonic acid, it is only necessary to pour down a sufficient quantity of lime water to take it up and if a person lies senseless at the bottom, this is

WATCH JOBBER and grateful to all who have employed him; and doubly so to those that have continued to be his: steady customers since his commencement in Montrose, (now nearly three years,) and encouraged by those who already know his abilities, he now informs those who

do not, that early in life he was taught the art of Finishing New Watches, Compound Syrup of Wild Cherry, by Atkin, late of Lord Street, Liverpool, who was a mind, it being composed solely of Vegetable ingredients, it can be watches. After having worked for him upwards of nine years, (soven of which as an indeutured appren-tice,) he then commenced for himself, and latterly in New York, where he has been employed by some of first and most respectable establishments in adway, Maiden Lane, Bowery, &c., and was by nrueuway, mancen Lane, Bowery, &c., and was by them classed a first rate workman.

N. B. He has always on hand a well assorted stock of Watch Wheels, Cylinders, Watch Jewels, Mainsprings, Watch Hands, and Watch Glasses, which will be carefully fitted, right away, and for prices less than they can be had in the City.
