TRIPOLI, Syria, March 15, 1859. If you will look on your map of Western Asis, and trace out the Red Sca, you will find on the eastern shore a city named Jeddah. The Moslems say that when Adam and Eve fell out of Paradise down to this

vorid, Eve landed in Jeddah, and Adam somewhere else, far in the interior. This city Jeddah is now the seaport of Mecca, the holy city of the Mohammed ins, and all the Mos'em pilgrims to Mecca from the North and West, pass through Jeddah. . This fact

has made it a very center of Moslem fanatacism, and there is no place where all foreigners and Franks are so cordially hated. For some years past, English and French Consuls have resided there to attend to the in the Red Sea. Last Summer, as you may remem

til we can get the lease of the two rooms over our ber, the Moslem population arose, and put to death all the Frank population, including the French and English consuls. It was supposed that the city Governor had something to do with it, as he had just sent off all of the Turkish soldiers garrisoning the place, when the outbreak took place. An English

out envious that he had he leez (English) or Protestant. His eye had an evil look and we held off from him. At length he said he was falsely accused of murder, and put in the Beirus Prison, whence he escaped a year ago. Afterwards, n being questioned by Yanni, he admitted that h did the deed. We refused to have anything to do with him, but he tried to get us to help him in mon v matters, saying that twelve hundred dollars is the price of a man's life in this country, and he could ge free by paying his uncle, the father of the murdered boy, that amount. He then left us, and after a few days got into a quarrel with a Moslem in the street nd has been sent handcuffed to Beirut. Thus we tten have men of the most strange and varied char

cters coming to us for relief, almost reminding on of David when he lived in the Cave Adullam : "and very one that was in distress, and every one that was in debt, and every one that was discontented gathered themselves unto him."--(I Samuel, 22:2.) Since our last letters home, we have been looking for a house again: Our lease of this house expires in four months, and then we go to Duma. From that time onward we wish to have another house which we can keep for a term of years. In two weeks we

go to Beirut to the General Meeting, and on our re turn we go to Hunis, accompanied by Yanni and Miss Temple, so that we shall be absent from home about a month. I find it very difficult to find a good house. The most of the houses are dark and damp and full of vermin, and the people are now raising the rent of their houses so enormously that I do no ce how I can get along very well without paying on undred and twenty dollars a year, and pay all in advance for five years. If I do so, the Mission will advance me the money, and I pay it back in annua payments out of my salary. We have two houses in view which are tolerable, and we muy conclude to take one of them.

We told you that Mr. Beebee left here for Smyrna, taking Saleh as servant. Yesterday Saleh came back, stating that Mr. B. arrived safely in Smyrns, and his children were both well. Mr. B. sailed March fst. onathe bark "Race Horse," from Smyrna, and will probably reach home by the lat of May. He has romised to visit Montrose, and he will tell our friends. here about our situation here, though he will not have the latest news. Last week we received papers from home giving

an account of the latest fire in Montrose by which a part of F's building was consumed. We had a fire here a few weeks since. The wood

work of the house was burned out, and the Bim Pasha or commanding officer of the Turkish soldiers here who occupied the house, escaped by the roof, his maid servant, a black Abysinnian slave being burned to death, and his black slave jumped into the street from the second story. Fires are very rare in Tripoli On Sunday the 6th of March, we had commun n the Chapel, and though our numbers were but few, it was a retreshing season to us all. We expected a native to unite with us, but he was prevented from arriving in time. Our bell is a great com fort to us and an object of much interest in the city The Arabs listen with great wonder to the statemer that it is the sift of the children in America.-

Its tone seems sweeter and sweeter every time business of the merchants, and the steamers plying it is rung. Last Sabbath I preached on the merits of Christ, from the text, "and of his fulness have we all received, and grace upon grace."-(Jno 1:16.) It is to me one of the most glorious of all

the doctrines of the Christian religion that we are resarded as vighteous for the sake of Christ, when we have no righteousness at all of our own, and that God should regard such miserable creatures as we are. a man-of-war was sent there and bombarded the city righteous in his sight, because his son has borne our sorrows and griefs, and suffered death in our stead.

one of which is for Sam, while he is staying with u to learn the language previous to entering upon his station as a Syrian Missionary. Yanni says that it is

cheap house at three-thousand plastres. On the first of July the owner gives us permissio promove all of our things to the house, and on the first of October we are to have full possession. From this time onwards for five years I expect to have n nore trouble with houses.

This afternoon I was calling at Yanni's to see bout the house, and I met a Moslem Sheikh named Sheikh Kalleeuy. He is Governor of Kolast il Hos on, an ancient Castle of great strength, about hali way to Hums. He repeated the invitation given ome time since to us, to visit him during our jour ney to Hums. Shortly after my return home, h called, accompanied by an old Jew, his Secretary and an armed Kawass. After the usual salutations and listening to the music, &c., he drew his chair un to me, and after declaring how much he esteeme and how much I might favor him, he ask ed my aid in securing for him the appointment of Governor of the Hosson district. He said that the office had been held by his family for several centurmade Governor. The Turk has now gone away, and | it's influence among us. he applies for the office. He showed me a great firman of the Sultan given to the family years ago, and letters from all the leading men of all the variou eligious sects in all the district, and promises, to hring letters from Sheikh Reschid and from the Governor of Tripoli and all the Effendis. I told him that was only a Missionary, and could not be expected to meddle with political matters, as my office is simp ly religious. He said he understood that, but still, he knew that Missionaries were always consciently

and honest men, and hence anything they might say to a Consul would have weight. He said that h would assure us of perfect security in traveling his district, and perfect protection in preaching th Gospel. He asked me to forward his letters and doc uments to the Consul, requesting him to forward them to the Pasha or to the Sublime Porte at Stam boul. I liked his manner and tone very much, and promised to do all in my power to aid him. It very important for the peace of the country that the local Governors should be natives of the country .-This man belongs to one of the most respectabl Moslem families in northern Syria, and is recomme ed by all the leading Greek monks, priests, and Mon lem Sheiks of the district. Yanni knows him well and has confidence in him, and promises to aid his Yanni's conversation with him brought out son facts very familiar to us in this land, but which may be new to you. Said Yanni to him, "If you send this matter to the Pasha, he knows that you are immensely wealthy, and he will wish to eat a little from your pocket. This taking of bribes is a great shame and disgrace, and I cannot consent to be a party any business in which it is practised, and if you do anything of the kind it must be through other means than through me." Kaleeny replied, " You need not give yourself any trouble on this point. If the Pasha is hungry, I will find means and ways to feed him until he wants no more."

When I go to Beirut I will probably speak to our Consul about the man's claim, and there leave the matter. When we go to Hums, he will undoubted ly receive us in great style. I shall have no objecion to securing his good will, if we can only secure foothold in the dark and benighted region over which he wishes to have rule. It will also be a comfort to us to feel that the Hums road is safe for travelers. When we go in April, we shall have a large company, and the country is now so secure that there. will not be the least difficulty.
