Philadelphia as a Seat of Polytechnic Ed-

Pennsylvania, a position which he filled with so much bonor. He now unites his interests with those of honor. He now unites his interests with those of the Polytechnic College under equally flattering auspices. The new College is not, like that which he left, designed to afford a classical education. It is devoted chiefly to the education of gentlemen for a high strong man had not read unith him. devotes careny to the equation of gentlemen for a big strong man, had got mad with him. and often serious injury is the result. I do

Nor is it surprising that men of profound scholarship, seeing the tendency of the popular educational
movement, should hasten to identify themselves with
it, and to employ their talents and erudition in its
advancement. A few years ago and the polytechnic
system which had a complished so much for science
and the arts in Europe was almost unknown in this
country. When the initiative was taken in the establishment of our Philadelphia institution the first
college of the kind in the Union, the Ledger indicated the advantages which must accrue to our city and
State if the enterprise should prove successful. Success has now been attained; those advantages are
beginning to be realized, and the sons of our own
citizens, as well as those of distant portions of the Nor is it surprising that men of profound scholar-

and what is known as Physics, depends upon chemiable director of the "Aramingo Chemical Works," near Frankford, are included in its list of graduates Upon Mathematics, the other great foundation-science of the course, depend Mechanics, Civil and Mine Engineering, Architecture, and Design. To say that the instruction on these is confided to the newly elected professor and his accomplished colleagues, is a sufficient assurance of its efficiency. Such a noble

course of education needs to be profusely illustrated not only by specimens and experiments, but also by exhibitions of the actual methods pursued in the most approved practice, and we claim for Philadelphia that these can be seen in greater perfection in her public works and industrial establishments, than spection of the best applications of machinery, to the working of the raw material and to the more delicate branches of manufacture; her contiguity to railroad communication with them, present eligible practical facilities to the students of mining and enfirst Polytechnic College in the Union. It is not a little thing that our city should come to be the centre of American education in science and its applications. While extending the blessings of such instruction to the ingenious youth of the country, she will receive in return a rich reward in the stimulating influence which such a College must directly ex-

The Territory of Jefferson. The Territory of Jefferson is the latest birth in the family of the American confederacy. The message of the Governor to the Territorial Legislature is published. The heart of this Territory is in the Rocky Mountains, between the 105th and 106th degrees of West longitude. Hitherto it has been in-

very impoverished inventive faculty, when a community has to use a name already immortal, and alnaming of them.

Jefferson Territory, lying between Kansas and Utah, will have a most interesting position, and an important one in the developement of our country. Let a civilized and prosperous population be established there among the Rocky Mountains, and its streams will flow off East and West, towards the Mississippl and the Pacific, fertilising both slopes, and hastening the great work of redeeming the desert wastes that have been occupied by wild beasts and savages, and even reforming the white semi-barbarism that sanctions polygamy. The Rocky Mountains will become a political as well as a topographical summit ridge, and it is, therefore, peculiarly important that the political principles planted there be of the true kind, that will bear good fruit in the future, when the recritory reaches the altitude and the er having occasion to newly paint the woodvigor of a State. It will be a calamity to the whole work in the interior of his green-house, deternation, if the turbulent territorial history of Kansas is to be reproduced in Jefferson. But we do not anticipate such a result, and we hope for the peaceful growth of a free State, destined, in the course of a

The growth of population, the increase of gold in the manufacture of gas. This coal tar, be mining, and the establishment of prosperous companies the advantage of its color, offers considered to the control of the co merce and agriculture in Jefferson Territory, will erable economy in painting, being about one-make a railroad to the East absolutely necessary, and as soon as the necessity is felt, the railroad will be made. Congress, which halts before the idea of Question was executed before the setting in building a railroad across the unpeopled wilderness, of winter. On the return of spring the gar-will not be so appalled when asked to grant lands dener observed, with no less surprise than or a railroad to Denver City. That will finish one. satisfaction, that the spiders and other insects half of the Pacific Railroad, and then in a few years, the business of Utah, California, Oregon, and Warhington will make the construction of the remaining half indespensable and feasible. As a great movement, therefore in behalf of the Pacific Railroad, the organization and peopling of Jefferson Territory are very important.—Philadelphia Bulletin.

LIFE IS A MISSERT.—The following is beyond all table grapes." number, says Punch, the most extraordinary phenomenon we ever read :- Six ladies were enjoying themselves over the tea-table at Rotherah, and, by way of amusement, they began confiding to each other in ton, as in existence in the several States, 786 secret how old they were; and it was found that Agricultural Societies. Illinois has the largsecret how old they were; and it was found that their united ages amounted to one hundred and test number of any State, 88; then N. York, twenty-five years. The most singular thing, howev. 77; Indiana, 75; Pennsylvania, 68; Ohio, twenty-five years. The most singular thing, however, is, that the daughters of these six ladies—and each lady had one—were in the next room, trying over the last new Polks; and, upon calculating their over the last new Polks; and, upon calculating their over the last new Polks; and, upon calculating their over the last new Polks; and, upon calculating their over the last new Polks; and, upon calculating their over the last new Polks; and, upon calculating their over the last new Polks; and provide the store of said BRONSON. united ages, the result revealed the astounding fact that, though not yet married, still they were older than their Mammas by seven years, eleven months, in Oregon, 11 in Minnesota, 1 in Utab, 2 in ed; and yet, we should be loth to accuse the young ladies, for the purpose of gaining a victory of no moment whatever, of having made themselves out to be older than they really were.

La "As long as your head is not cut off, don't say you'll merer weer a bat.".

Fannon's Mare. Philadelphia 12 a Seat of Polytechnic Reneation.

The alteration of Prof. Heary Vetrake, LLD, to
the chair of higher Mathematics in the Polytechnic
College, is an event alike creditable to himself and
to the Institution. Four months ago we chronicled
the fact of the resignation of this distinguished scholar from the position of Provest of the University of

ever he would. Down on the east of Little river, the parusan and some four or five of his followers one day captured a man by the name of Hunter, a political opponent, from the country about Salisbury. This was sufficient cause of death, and Faanon told the man he should hang him. Hunter was evidently a man of his time; but what could he do alone and in those of any other American city. In the value detenceless, with half a dozen bitter enemies? and variety of her mampfactures she is without a rival; her civil and mechanical engineers occupy the first rank in their profession; her workshops and threw out its convenient branches. Fannon foundries afford all needed opportunity for the intellection of the might pray, for his time was come. The poor man kneeled down, and seemed absorbed in his last petition to the throne of mercy. Fannon and his men stood

mines of coal, iron, lead, zinc, and copper, and her by, and the trusty mare stood among them railroad communication with them, present eligible with the rains on her neck. They began to practical facilities to the students of mining and engineering. Here, therefore, are centered interests devotional exercises. But they soon discov-which mark Philadelphia as the proper seat of the Hunter's thoughts, for he suddenly sprang on Fannon's mare, bowed his head down on her powerful neck, pressed his heels on her flanks and darted away like the wind. The rifles were leveled in a moment.-

'Shoot high!" cried Fannon, "save my mare." The slugs all whistled over Hunter's ert upon the flevelopment of all her resources, and which tore and battered his shoulder dreadback, save one that told with unerring ain, the perfection of every branch of her industry. | fully. He reeled on the saddle and felt sick at heart, but hope was before him, death behind him, and he nerved himself for the race. On he sped—through woods, and ravines, and brambies, did that powerful mare carry him safely and swiftly. His enemies were in bot pursuit. They followed him by the trail of blood from his wounded shoulder. He had come to Little river; there was no ford, the bank was high, and a deep place in the stream cluded in Kansas; but a wilderness of five or six before him. But the foe came. He drew hundred miles lies between the inhabited part of the rein and clapped his heels to her sides, Kansas and the inhabited region of the Rocky Moun- and the gallant mare plunged recklessly into tains, and a separate government is required.— the stream. She snorted in the spray as she Whether the "provisional government," whose or rose, pawed the yielding wave, arched her ganization we announce to day, will be recognized beautiful mane above the surface, and skimand sanctioned by Congress, we are unable to say. med along like a wild swan. Hunter turn-At all events, it is the first step of a government, ed her head down the stream, in the hope of and it is probable the region referred to will evading his pursuars, and she reared and be known forever as "Jefferson." It shows a dashed through the flashing waters of the shoal like lightning in the storm-cloud.

But Fannon was on the trail, and rushing ready used to excess all over the country. But down the bank with all the mad energy that American frontiersmen are rarely imaginative : they the loss of his favorite could inspire. Hunt. can build States, and care little about the proper or turned the mare to the opposite bank; it was steep-several feet of perpendicular rock -but she planted herself on the shore at a bound, and then away she flew over the interminable forest of pines, straight and swift as an arrow—that admirable mare!

On and on did the generous brute bear her master's foeman, till the pursuers were left hopelessly behind. Late in the evening H. rode into Salisbury, had the slug extracted from his shoulder, and after lingering some time with the effects of his wound and excitement, finally got well. And that gallant mare that had done him such good service, he kept and cherished till she died of old age. -Metropolitan Record.

An English paper says : "A garden, mined to make a trial of the theory of the ab sorption of heat by black color, with the view of promoting the maturity of his plants and shrubs by means of a greater quantity of cageneration, to be one of the most important in the loric. In the preparation of the paint he used

coal tar, procured by the distillation of coal which had intested his green house had totally disappeared. He, moreover, remarked hat a vine, trained on an espatier, which for the space of two years had been sensibly decaying, and which he had intended to uproot for the purpose of planting another in its place, had acquired such renewed health and vigor as to be capable of producing excellent.

There are upon record in the office of the Secretary of the Interior, at Washing. have but few, except Virginia, 31; Maryland 10; Tennessee, 18; South Carolinia, 8, etc.

There was one in Kansas, one in the Indian (unorganized) Territory, 8 in California, 2 Washington Territory

Is IT WELL TO CHANGE THE PASTURE OF Cows?—We had supposed that it was; but in the Report of the Committee appointed by the New York State Agricultural Society, to visit dairy farms, it is stated that Edwin Pitcher, of Martinsburg, who has a dairy of eighty cows, has but one pasture in summer for his cows (except about twenty acres for night pasture), which he deems preferable, as the cows are more contented, and do better through the season than when changed in their pasture. What say our correspondents

HOSTETTERS

It is a fact that, at some period, every member of the human family is subject to disease or disturbance of the beddily functions; but, with the aid of a good tonic and the exercise of plain common sense, they may be able so to regulate the system as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr. Höstetter has introduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, howels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple process of strengthening nature, enable the system to triumph over disease.

For the cure of Dyspepsia, Indigestion, Nausen, Flatulency, Loss of Appetite, or any Billious Complaints, arising from a morbid inaction of the Stomach or Howels, producing Cramps, a Dysentery, Colic, Cholera, Morbus, &c., these Bitters have no equal.

Bitters have no equal.
Diarrhoan, dysentery or finx, so generally con-

Diarrhon, dysentery or finx; so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this preparation. Dyspepsia, a disease which is probably more prevalent, in all its various forms, than any other, and the cause of which may always be aftributed to derangements of the digestive organs, can be cured without fall by using pluster than the probability of the digestive of the di

organs, can be cured without fail by using HOSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind; then why not use an article known to be infallible? All nations have their Bitters, as a preventive of disease and strengthener of the system in general; and among them all there is not to be found a more healthy people than the Germans, from whom this preparation emanated, based upon scientific experiments which have teaded to prove the value of this great preparation in the scale of medical science.

Feven and Ague.—This trying and provoking disease, which fixes its relegatess grasp of the body of man, reducing him to a mere shadow in a short time, and rendering him physically and mentally useless, can be driven from the body by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they neither create numeressary any change of diet or interruption of ordinary pursuits, but promote sound sleep and healthy digestion, the complaint is removed as speedily as is consistent with the production of a thorough and permanent cure.

For Persons in Advanced Pears, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative of strength and vigor, and need only be tried to be appreciated. And to a infirm body, these Bitters are invaluable as a restorative of strength and vigor, and need only be tried to be appreciated. And to a mother while aursing these Bitters are indispensable, especially where the mether's nour alishment is inadequate to the demands of the child, consequently her strength must yield, and here it is where a good tonic, such as Hostetter's Stomach Bitters, is needed to impart a temporary afterneth and vigor to the averem

the stetter's stemach Bitters, is needed to impart temporary strength and vigor to the system. Endies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will recommend their use in all cases of weakness. CAUTION .- We caution the public against using my of the many imitations or counterfelts, but ask Hostetten's Celebrated Stonach Bittens, and see that each bottle has the words "Dr. J. 5 Hostetter's Stomach Bitters" blown on the side of of the bottle, and stamped on the metallic cap

overing the cork, and observe that our autograph ignature is on the label. agrature is on the label.

Auother Remarkable Care! Another Remarkable Care!

Dr. Swayer.—Dear Sir.—Belleving it a duy I awy to the publicand in Justice to you. I have thought proper to make known are the most entraordinary current in my own case, that has ever been truly recorded. In the month of October last, I was afflicted with a severe gathering in my breast, which formed a larger abscess and severe gathering in my breast, which formed a larger abscess and dacharged large quantitle Jungand very much afflicted them, and dacharged large quantitle my large and out the and internal. My my breast with a sparent case, attended with a violent cough day and night, loss of appetite, and extreme dability, so that my physican thought my case hopeless and beyond the bower of medicine. Instantial of in this writched condition for a long time, until I was wasted to a mere skeleton, and there seemed to be no hope for me but having read in the public papers of the midty wonderful cures performed by your Consecus Stare or Wint Fuzzar, I hancellately sent to Baltimore for fey bottless and commenced its use, and to my great satisfaction and inly anxious family, the abscess or opening in any lungs began to heat, and the cough subsidied, and on unsinged bottles I was restored to perfect health.

"User for eyesy have elsped, and it sill remain a perfectly histary chellers mountly."

teenmonths, case-accept my grateful acknowledgments.

Sons, very respectfully,

solvent acknowledgments.
