MORE GLORIOUS NEWS: We have just received news of the capture of Wilmington. Last week we announced the capture of Columbia, the capital of South Caro lina. This week we announce the capture of Charleston, mother of nullification, secession, and all the pestilent isms that have threatened our

country with ruin,-and of Wilmington, the great port of entry for the blockade runners. without which the rebellion would long since have been subdued. Unless some unlooked for reverse occurs, it is certain that the end draweth nigh. Now for Lee and Richmond, and soon after blessed peace in a free land.

FACTS ABOUT THE 7-304—THE ADVAN-TAGES THEY OFFER,

THEIR ABSOLUTE SECURITY .-- Nearly all ac tive credits are now based on Government secu rities, and banks hold them as the very best and strongest investment they can make. If it were possible to contemplate the financial failure o the Government, no bank would be any safer If money is loaned on individual notes or bond and mortgage, it will be payable in the same currency as the Government pays with, and no better. The Government never has failed to meet its engagements, and the national debt is a first mortgage upon the whole property of the country. While other stocks fluctuate from ten to fifty, or even a greater per cent., Governmen stocks are always comparatively firm. Their value is fixed and reliable, beyond all other se curities; for while a thousand speculative bubbles rise and burst, as a rule they are never be-

low par, and often above. Its Liberal Interest.-The general rate of interest is six per cent. payable annually. This seven and three tenths, payable semi-annually If you lend on mortgage, there must be a searching of titles, lawyers' fees, stamp duties and delays, and you will finally have returned to you only the same kind of money you would receive from the Government, and less of it. If you invest in this loan you have no trouble. Any bank or banker will obtain it for you without ny charge. To each note or bond are affixed five "coupons" or interest tickets, due at the expiration of each successive half-year. The holder has simply to cut off one of these cou pons, present it to the nearest bank or Government Agency, and receive his interest; the note itself need not be presented at all. Or a coupon thus payable will everywhere be equivalent, when due, to money. If you wish to borrow ninety cents on the dollar upon these, you have the highest security in the market to do it with If you wish to sell, it will bring within a fraction of cost and interest at any moment. It will

be very handy to have in the house. It is Conventible into a six per cent. goldbearing bond. At the expiration of three years a holder of the notes of the 7-30 Loan has the option of accepting payment in full or of funding his notes in a six per cent. gold-interest hand, the principal payable in not less than five, nor more than twenty years from its date, as the Povernment may elect. These bonds are held at such a premium as to make this privilege now worth two or three par cent. per annum. and adds so much to the interest. Notes of the same.class, issued three years ago, are now selling at a rate that proves the correctness of this tatement

ITS EXEMPTION FROM STATE OR MUNICIPAL AXATION.—But saide from all the advantages we have enumerated, a special Act of Congress exempts all bonds and Treasury notes from lo cal taxation. On the average this exemption is worth about two per cent. per acnum., according to the rates of taxation in various parts of the country.

IT IS A NATIONAL SAVINGS BANK.—While in covering the troey outterles. Assume It is a National Savings Bank.—While this loan presents great advantages to large captedlists, it offers special inducements to those who wish to make a safe and profitable investment of small savings. It is in every way the best Saving's Bank; for every institution of this kind must some how invest its deposits profitibly in order to pay interest and expenses. They will invest largely in this loan as the best investment. But from the gross interest which they are the later of their coances with the many complete of the page of the page in the page is well as the page is the page in this loan as the best investment. But from the gross interest which they are the page in the page is the page in the page in the page is the page in the page is the page in the page in the page is the page in the page is the page in the page in the page is the page in the page in the page is the page in the page in the page is the page in the page is the page in the page in the page is the page in the page in the page is the page in the page in the page is the page in the page in the page is the page in the page in the page in the page in the page is the page in the page in the page in receive, they must deduct largely for the expenses of the Bank. Their usual rate of interest allowed to depositors is 5 per cent. upon sums we all most care of the weather to deposit or the state of t allowed to depositors is 5 per cent. upon sums over \$500. The person who invests directly with the Government will receive almost 50 per cent. more. Thus the man who deposits \$1000 at particle of the deposits the same sum in this National Savings' Bank receives \$50 a year interest; if he deposits the same sum in this National Savings' Bank he receives \$73. For those who wish to find a safe, convenient, and profitable means of investing the surplus earnings which they have reserved for their old age or for the benefit of their children, there is nother tween the Robel Commissioners and Section of the control of the result of the interest of the control of their children, there is nother the same that the control of their children there is nother the same that are the control of their children.

tation of the Southern States will increased.— CHARLESTON CAPTURED If the whites there refuse the suffrage to the negroes they themselves will have greater political nower than ever before. 'If only the voters are counted as the basis of representation, according b Mr. Sumner's plan, it will be a strong induce ment to give the right to yote to the negroes, for the sake of the additional power. If it is refused the Southern States will have less power than before; if granted, much greater. The measure

s sagacious as well as just.

THE FALL OF CHARLESTON. We estimate the loss of Charleston, says the New-York Duly Tear of this time, equal to he loss of 50,000 men to the Confederates in battle.
