Agricultural.

Housewifery.

The earlier the breakfast the more work will be gotten through with during the day and the better health will the whole household have, because food or warm drink in the stomach antagonize the disease engendering damps, fogs and miasmas, which impregnate the air about sunrise, in all countries, especially in warm weather.

Quinces baked in sugar and water, or syrup, or simply baked and eaten with powdered sugar make a good substitute for baked apples.

Potatoes may be kept a very long time from rotting, in a cellar protected from the frost, by dusting the floor or bin with lime; then put down a layer of potatoes six inches thick; then dust with lime, another layer of potatoes: they sprout least in darkness.

Woolen flannel is the best protection against taking cold in all seasons, if kept pliable by washing in strong, hot soapsuds, without wringing, merely squeeze, then rinse in clear, warm water, and hang on a line to dry.

Silks are best, next the skin, for some persons. Wash them by spreading on a board smoothly; rub on white soap; brush with a hard brush, then brush off with cold water, applied to both sides; a little alum in the last water prevents it from "running." Grease-stains are removed from silk by taking equal parts of alcohol and camphene; never wring silks after washing, because the creases thus made will always remain. While "burning fluid," which is a mixture of alcohol and turpentine removes grease and others stains from light-colored gloves; sour milk is good for bleaching linen; but grease is best removed from carpets with strong, cold soapsuds, thus avoiding the danger of camphene. Life has been lost by keeping oxalic acid in the house, to remove ink and iron stains; but as it is only suitable for white fabrics, it should be plainly labelled and marked "poison," in large letters, if kept in the house,) it is better to use the juice of lemons or of sorrel leaves, especially as oxalic acid eats the fabric, unless immediately and thoroughly washed off.

Persons have been suffocated by inhaling the fumes of burning sulphur, when used to bleach out colors and stains of fruit and vegetables particularly, hence the fumes should be conveyed to the stained spot by means of a funnel-shaped paper roll; but it is safer to dip stained fabric in sour milk then dry in the sun, repeating the operation till the bleaching is perfected.

Flannel shirts, or other woolens, should have grease spots removed without rolling them up: Put one ox-gall in three gallons of cold water, in which immerse the garment, and squeeze or pound (not wring) it, until the spots are removed; then thoroughly wash in cold water, else the gall becomes very disagreeable.

If burning-fluid or benzole are used to remove grease or stains, let it be at least two yards from any blaze of candles, gas lamp or fire. Valuable lives are lost every year by neglecting this precaution.

Eggs are good which are diaphanous, or show a faint reddish color, when held in a dark place, towards a candle or other light, when held in the circle made by the thumb and forefinger. They are bad in proportion as they seem black. This is an infallible test.

Milk is kept good longer if it is boiled, evaporated, condensed or kept still at a temperature of about forty degrees. If heated three days in succession in summer and two in winter, (as per Guy Lussac's experiments,) up to the boiling point, it will keep two months without turning sour.

The best way of keeping milk in summer is to have a spring-house well shaded, and on the north side of a hill, the pans sitting in a stream of running water, protected against currents of air.

Peaches are peeled without waste, when fully ripe, by pouring boiling water on them, and let them remain a minute, to cook only skin-deep, as in tomatoes.

Clinkers are removed from stove-grates and range-backs, thus: When the coal is all ago., throw in half a dozen broken oyster-shells, cover those with fresh coal, and when all are red hot the clinkers are easily removed.—*Hall's Journal of Health.*

A Cheap and Valuable Paint.

One of our neighbors has painted his outhouses, fences, &c., with a paint made as follows, and found it nearly as good as ordinary oil paint, and vastly cheaper; in fact, the cost is scarcely anything except the labor:

Take half a bushel of nice unslacked lime; slack it with boiling water, covering it during the process to keep in the steam, and add to it a peck of clean salt, previously well dissolved in warm water; three pounds of green rice, boiled to a thin paste, and stirred in boiling hot; half a pound of clean glue, which has been previously dissolved by first soaking it well, and then hanging it over a slow fire in a small kettle within a large one filled with water. Add five gallons of hot water to the whole mixture; stir it well, and let it stand a few days covered from the dirt. It should be put on right hot; for this purpose it can be kept in a kettle on a portable furnace. It is said that about one pint of this mixture will cover a square yard upon the outside of a house, if properly applied.

Brushes more or less small may be used, according to the neatness of the job required. It answers as well as oil paint for wood, brick, or stone, and is cheaper. It retains its brilliancy for many years. There is nothing of the kind that will compare with it, either for inside or outside walls. Coloring matter may be put in, and made of any shade you like. Spanish brown stirred in will make red or pink more or less deep, according to the quantity. A delicate tinge of this is very pretty for inside walls. Finely pulverized common clay, well mixed with Spanish brown before it is stirred into mixture, makes a lilac color. Lampblack in moderate quantities makes a slate color, very suitable for the outside of buildings. Lampblack and Spanish brown mixed together produce a reddish stone color. Yellow ochre stirred in makes a yellow wash; but chrome goes farther, and makes a color generally esteemed better.—*Genesee Farmer.*

Selecting Cows.

A Vermonter gives his experience on this subject as follows: "First I get a broadside view of the animal, at a distance of about two rods, as I have noticed for years that there was a great similarity in the general proportions of all first-class milkers—being very small in girth just back of their forward legs, as compared with the girth just forward of their hips. I have never known a first-rate milker, not thus proportioned; so that if this form is wanting in an animal I have recommended to me, I do not care to look at her more, unless I want a breeder for some other purpose than the dairy. For breeding oxen I would want a cow of reverse proportions—larger girth forward. I next feel the size of the "milk veins," and trace them to their entrance into the chest, which in superior cows are large, admitting the ball of the largest finger; if divided, or subdivided, as is sometimes the case, I judge of the size of each orifice, as I care less for the size of the vein itself than the orifice. Next I examine by sight and touch the udder or bag, which must be capacious, in order to hold much milk, with teats wide apart and free from large seed warts or sores of any kind; I then inquire how long she goes dry before calving, as I don't want a family cow to give milk less than forty-six weeks out of every fifty-two; also as to the quantity of the milk; and to close, I milk her with my own hands."

Potato Blossoms.

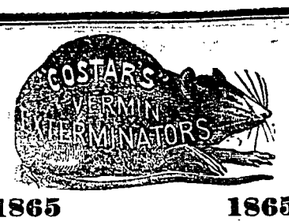
In an article stating the importance of burying potato tops on the spot where the potatoes are raised, Prof. J. F. W. Johnston, who is perhaps, as good authority on most agricultural matters as any living writer, makes a statement which will seem singular, at least to American readers. It is that by taking off the blossoms of potatoes, besides the usual increase of the crop, the tops keep green till the potatoes are dug.—Thus much green matter is obtained; and if this be made into manure, and applied to the next potato crop, it is said to raise the largest produce of tubers.

Carpet Sweeping.

Draw the broom to you with short, quick strokes taking up the dirt every half yard in a dust-pan, or at each stair, and thus avoid working the dust into the cleaner parts. Never use tea leaves, paper, or damp grass, to collect the dust, but let the dust-pan do that.

Weather-Wise.

Allow the sugar to dissolve in your coffee or tea without stirring; if the froth remains in the centre, durable weather is indicated; rainy if it settles around the sides; variable if it remains between the two, so says M. Sauvageon.



1865 **1865**

"Eighteen years established in N. Y. City."
"Only infallible remedies known."
"Free from Poisons."
"Not dangerous to the Human Family."
"Rats come out of their holes to die."

HENRY R. COSTAR,
☞ PRINCIPAL DEPOT, 482 BROADWAY, NEW YORK.
☞ Sold by all Druggists and Dealers in Montrose, Pa.

1865.

INCREASE OF RATS.—The Farmer's Gazette (English) asserts and proves by figures that one pair of rats will have a progeny and descendants to eat 1,819,850 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 64,000 human beings.
☞ See "COSTAR'S" advertisement in this paper.

1865.

RATS versus BIRDS.—Whoever engages in shooting small birds is a cruel man; whoever aids in exterminating RATS is a benefactor. We should like some of our correspondents to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—[Scientific American, N. Y.]
☞ See "COSTAR'S" advertisement in this paper.

1865.

HOUSEKEEPERS troubled with vermin need be so no longer, if they use "COSTAR'S" Exterminators. We have used it to our satisfaction; and if a box cost $5, we would have it. We have tried poisons, but they effected nothing; but "COSTAR'S" article knocks the breath out of Rats, Mice, Roaches, Ants, and Bed Bugs, quicker than we can write it. It is a great demand all over the country.—[Medina, Ohio, Gazette.
☞ See "COSTAR'S" advertisement in this paper.

1865.

A VOICE FROM THE FAR WEST.—Speaking of "COSTAR'S" Rat, Roach, Ant, &c. Exterminator—"more grain and provisions are destroyed annually in Grant County by vermin than would pay for a ton of this Rat and Insect Killer"—[Lancaster, Wisconsin, Herald.
☞ See "COSTAR'S" advertisement in this paper.

1865.

FARMERS AND HOUSEKEEPERS.—should recollect that hundreds of dollars' worth of Grain, Provisions, &c. are annually destroyed by Rats, Mice, Ants, and other insects and vermin—all of which can be prevented by a few dollars' worth of "COSTAR'S" Rat, Roach, Ant, &c. Exterminator, bought and used freely.

☞ See "COSTAR'S" advertisement in this paper.
☞ Sold in MONTROSE, PA.
☞ By all Druggists and Dealers. 6m.

Agricultural Implements.
THE Undersigned desires to call the attention of the public to the article of THRESHING MACHINES manufactured the long established and well known firm of
Wheeler, Melick & Co., at Albany.
These Machines are so favorably known and universally approved that any effort at recommendation I consider unnecessary. So far as I can say that experience in manufacturing, and long use, have brought out improvements which make them the
CHAMPIONS OF THE WORLD.
I would call especial attention to their
Barger's Patent Cleaning Attachment
a new thing, and attached to single, double, treble, or any other horse-power, and to either undershot or overshot threshers. The fan can be used as an ordinary hand mill, and is superior, as such, to an fanning mill made. It takes no more power to drive the whole machine, than it does to drive an ordinary separator or shaker.—Different sizes of cleaning attachment, same patent, are made.
Horse Powers, single and double, Wheeler's patent, with recent improvements. Lawrence & Gould's patent, one, two, and three horse powers. Saw mills for sawing wood, feed cutters, clover hullers, horse rakes, &c. An unrestricted warranty gives to the public the strongest guaranty that the above machinery is unequaled in its work, durability, convenience, and cheapness.
For further particulars, send to the subscriber for circular, or examine machinery. Orders solicited and filled with promptness and fidelity. Also Agent for
HUBBARD'S MOWING MACHINE,
light draft, manufactured by S. H. SAYRE & BROTHERS, Montrose, Pa.—the best mower for this country. Machines warranted to give entire satisfaction. Instructions for using, and Machines delivered, free of charge for freight or transportation.
All persons wishing to secure the best and cheapest Mowing Machine are advised to witness the work of the Hubbard's Light Draft Mower, before committing themselves to any other Mower now in use. Orders solicited and promptly attended to.

Real Estate Agency!
THE undersigned have formed a partnership and opened an office for the purchase, sale, and rental of real estate in the County of Susquehanna, Pa., and will endeavor by strict attention to make it for the interest of all who desire either to purchase, sell, or rent real estate, to give us a call. We design to advertise extensively in all those counties both in New York and New Jersey, from whence come most of the persons who buy lands in this county. Mr. Hinds is extensively acquainted throughout the county and will give the matters entrusted to us his whole attention. We have
Several Farms on Hand,
suitable for dairying purposes. The larger part of the purchase money can run for a term of years, payable in installments, as
No. 1.—275 acres of land in Forest Lake, 125 improved, good dwelling house, six barns, well watered, and will support from 20 to 35 cows. Convenient to meetings, schools, and mechanics. A large part of the purchase money can remain for a series of years.
No. 2.—125 acres of land in Franklin, (Upsonville,) 100 acres improved, well watered, two dwelling houses, two barns. Convenient to meetings, schools, and store. Well suited for dairy purposes.—Part of the purchase money may remain for a series of years.
No. 4.—191 acres of land in Hilmick, 120 improved, well watered and fenced, good new dwelling house, 2 barns, 2 orchards, and chestnut timber upon it sufficient to fence the whole farm for fifty years. Two and a half miles from Dimock Corners, and five miles from Montrose. Two thirds of the purchase money can remain for a series of years, secured by bond and mortgage.
No. 7.—Situate in the township of Forest Lake, four miles from Montrose. A daily stage passes the house. 166 acres. Over 100 improved, a good dwelling house, two barns and sheds, good orchard, saw mill in good running order, and cider mill, carding by water, milk house, &c. Terms: One-half of the purchase money down, the balance in five annual payments.
No. 8.—Situate in the township of Lenox, seven miles from Montrose, containing sixty acres, forty-five improved, a good house, barn, a grafted orchard, and a very fine sugar bush, convenient to Churches, Schools, and Mills. One-half of the purchase money down, the balance can be paid in four equal payments.
No. 9.—Situate in the township of New Milford, containing 160 acres—120 acres improved; two miles from the Borough of New Milford, and about eighty rods from the Lackawanna and Western Rail Road; well watered with springs; good buildings, and a fine bearing orchard—a grove of chestnut upon the premises suitable for pike or telegraph poles—a school house in the immediate vicinity; and three different churches within two miles. 100 acres of the best farm will be sold if the purchaser should not want the whole. Terms made to suit purchaser.
No. 11.—406 acres, adjoining the village of Susquehanna Depot, on the N. Y. & Erie Railway, one of the most convenient farms in the vicinity from which to sell milk in the village. Will rent 25 cows, and teams to work the farm. There are about 7000 telegraph poles on the farm, worth $1,00 each, besides a quantity of Railroad ties and wood within a mile of the village; two good dwelling houses, two barns, a saw mill. There is also on the farm a good wood-pile mine, and a paint mill in good running order; two good orchards. No less than 12 passenger trains leave the depot daily. For an enterprising man to make money the farm is one of the most desirable in the southern part of the State.

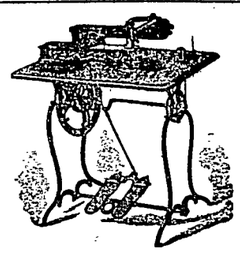
GROVER & BAKER'S
FAMILY SEWING MACHINES.
PERSONS wishing the BEST Machine should call at CHANDLER'S and examine Machines at work on exhibition daily—with either the Shuttle or Lock-Stitch, or the Grover & Baker Stitch.
THE EGE MACHINE are the most SIMPLE, PERFECT, EFFICIENT, and DURABLE MACHINE yet introduced. F. B. CHANDLER, 2d'T.
Montrose, August 7th, 1865.

TO DAIRYMEN.
F. B. CHANDLER will pay the highest market price for prime Butter—furnish package or consign to some of the best dealers in New York. Ashton dairy by the sack or pound.
Montrose, May 16, 1864.



A WORD TO THE WISE.
WHEELER & WILSON'S,
The Best Family Sewing Machine
MADE,
☞ IS NOT A SHUTTLE MACHINE, ☜
But makes the Lock Stitch.
THE VERDICT OF THE PEOPLE
IS DECIDEDLY IN ITS FAVOR.
The fact of there being more of these Machines sold THAN OF ANY OTHER
ATTESTS ITS SUPERIORITY.
For further particulars call upon the Agent, where the different styles of machines are on exhibition.
Parties that have used other so called Standard Machines have thrown them aside and give their testimony in favor of these.
EVERY MACHINE WARRANTED TO GIVE ENTIRE SATISFACTION.
For several reasons it recommends itself above all others.
1. Beauty and excellence of stitch, alike upon both sides, working equally well on silk, linen, woolen, and cotton goods—seaming, quilting, gathering, hemming, felling, cording, and braiding.
2. Strength of seams that will not rip nor ravel.
3. The most simple in construction of any two-threaded machine in use; therefore less liable to get out of repair.
4. Sews without the use of a shuttle, thereby doing away with much cumbersome machinery, and the trouble of regulating the tension of the under thread.
5. Runs at a greater speed than a shuttle machine possibly can.
These machines with all the new improvements, warranted and delivered in Montrose, at Manufacturers' prices.
The test of HOME REFERENCES given. Over ONE HUNDRED in use in Montrose and vicinity.
