Agricultural.

...anufactures of the Season 1849.

...s season just gone by, will probably be chiefly remembered, in this country, on account of the visitation of the *cholera*, that most serious pestilence, which, with more or less mortality, pass'd over our principal cities and towns, and the melancholy records of whose ravages have been made the public through the appropriate channels.

...mmercial point of view, the summer of ... was generally distinguished for the ... remarkable absence of thunder and lightning ... over the northern and eastern states. ... the proportion of New York and New ... there were no rains to benefit vege... from the 15th of June to the 6th of ... August; and in the central and western ... of New York the ground did not be... ...ished till the 1st of October, ... previously light rains ... afforded some benefit to corn and ...

Hay, was generally good, as to quantity, ... northern sections of this coun... ...ere it was cut off by the drouth.

Wheat, as a staple, was very variable, ... country together. So far as we ... ...ve statistics relative to this grain to ... ...ast at the Alleghany mountains, ...ve lost their usual quantity, and ... some may be said of New York the ... ...rn parts of Ohio, Indiana, Illinois, ...e greater portion of Michigan and ... Wisconsin. Throughout a great extent of ... to the southwest, the crop was in... The rust. In some districts it was al... ...ed, the worst on ridge.

Rye yielded well. This grain is now rarely ... ...n part of New York, and to ... ...extent in Vermont, Massa... ...ticut, on lands which ... ...ally produced good wheat—the cultiva... ...on to rye having been discontinued ... ...upon account of the attacks of ... ...ge from which this crop is ... ...ally injured.

Barley was injured by drouth, and the ... ...ill cut off: but to what per cent, we ... ...ave not the data for estimating.

Oats, in the eastern and south eastern ... of New York, were much injured by ... drouth, and in some instances nearly de... ...royed. The grain is also of much less ... ...weight. In the northern sections ... ...and in the Canadas, where the ... ...ops always suffer later in the season, we ... ...ve not as yet received, after the ... ...ceive a fair yield, in some instances.

Indian Corn has been greatly injured ... ...the several causes above mentioned ... ...ing been visited by drouth. In the ... ...ter portion of the south-west, em... ...acing the eastern parts of Ohio, Indiana, ... Illinois, west to Virginia, Kentucky, Ten... ...essee, and Missouri, we are informed that ... ...ery heavy crop. In New York and ... New England the yield will fall below an ... ...erage. We hear of but few *large* crops, ...ere and there in localities particularly fa... ...vorable in respect to moisture. In most in... ...stances the yield is represented to have ... ...been neglected by drouth from ... ...the period ...

Potatoes ... ...ere is a light ... ...ield is owing to drouth, ...the prevalence of the disease, ...the several years it has been so nice... ...ly described by Cobbett, as the ... ...Colorado bug has long furnished a fer... ...tile subject of speculation, we have heard ... ...but little the present season, either in this ... ...country or from Europe. Enough of it, ...however, is reported from both continents, ...to show that it is not yet extinct. Whether ... ...it will be troublesome in future years, we can ... ...form no reasonable opinion. In regard ... ...to the remedies or prevention, we have ... ...nothing to offer.

Dairy products have been lessened in ... ...the drouth. In some instances, ...we have heard of the amount of butter and ... ...cheese manufactured to be only five per cent ... ...of the usual average. From the ... ...great extension of the business, however ... ...it is supposed that the whole quantity has not ... ...fallen off, and will be at least equal to that ... ...of the previous year.

Fruit, in general, have, with other crops, ...suffered the effects of protracted drouth ... ...Apples are scarce. Persons desirous, the ... ...first season of a new orchard, that it became stunted from lack of nutriment, apparently, and is comparatively small, inactive size. The high price ... ...of fruit indicates the deficiency of the ... ...crop. Pears are not as plenty, nor of as ... ...good a size as usual. The blight of the tree ... ...is more prevalent in this vicinity, than in some former years. Plums may be said ... ...to be the only fruit, of which there was an ... ...average in this vicinity. Of this crop, ...the trees in 1848, and from the trees ... ...not their capacity for ... ...was probably increased; and ... ...excessively the past season ... ...where attention was not giv... ...the burden, having been bro... ...down. There were more peaches in the north ... ...of this country, than are usually obtained; though they never are found here in large quantities.—*Albany Cultivator.*

DEFICIENCY OF THE MINT.—The Report of Dr. Patterson, Director of the Mint in this city to Congress, says, the amount of California gold in the last year, $3,200,000 in value has increased the expenses of that establishment, as the gold must be separated from the silver by a chemical process, requiring, for operations upon so large a scale, a great and expensive increase in the laboratory, and the employment of additional workmen. It asks for $50,000 to meet the expenses of the year. It also asks that the salary of the Assayer, who receives $1500, shall be increased to $1500. The appropriation for the wages of workmen has, for a long time, been $24,000.—The increase of labor at the Mint has made it nec ...sary to present an estimate for $25,-200.

Petitions are in circulation in New York city, calling upon Congress to suspend diplomatic intercourse with Austria, "by reason of its tyranny, its barbarous punishments, its sanguinary atrocities and judicial murderers in Hungary, Austria and Italy."
