

not a serious response. It is very singular indeed, that this man, so full of wisdom and understanding, is not cognizant of the fact, that, from motives of public policy, our Legislatures generally enact all general laws to take effect in future. We have ample time to aid ourselves of this irremediable paper before the law takes effect, and if we neglect to do it let the consequences rest upon our heads.

When Mr. "Bostonian" "talks of" "booming canons," &c., we are sadly puzzled. Perhaps he is imaginative; he is acting over again the gallant soldier in some "shar's fight," or probably fancies himself in a "military drill," surrounded with "all the pomp and circumstance of glorious war." Be this as it may, it sounds big for a "little man."

His hard-pressed efforts to appear both serious and eloquent, his unmitigated perversions, his silent conceit and false statement of facts, will, only when renewed, elicit the notice of

A PENNSYLVANIAN.

LATER FROM EUROPE.

ARRIVAL OF YOUR STRAMBERS

Since our last, four steamers have arrived from Europe, viz: the America, Herman, Atlantic, and Canada, bringing news four days later than previous dates, promising, however, but little importance.

In Parliament there is nothing doing of interest. There has been some informal discussion in the House of Lords, between the advocates of protection and free trade, but no action.

A motion in the Commons to repeal the window taxes, was lost on the 25th, by a vote of 64 to 130.

The Times of the 24th ult., has a leader from which it is plain to see that a general European coalition against Great Britain, growing out of the Greek question, is much feared.

Miss Jane Porter, the well-known authoress of the "British Chieftain" and many other works of fiction, died at the residence of her brother in Bristol, on the 23d ult., aged 74.

The Arctic expedition, to search for Sir John Franklin, under Sir John Ross, has sailed. The commander and crew were all in a beastly state of intoxication at the time, and it was feared they would continue so.

The new Electoral Law is still under discussion in the French Assembly and the first and second section, although somewhat modified from their original shape, passed.

The President has suppressed the "Napoleon" newspaper on account of the appearance of articles in it calculated to embarrass the settlement of the Greek difficulty with England.

Paris is perfectly quiet, and is likely to continue so for some time.

The French fleet in the Mediterranean is being gradually augmented preparatory to trouble, should it come of the Greek ques-

tion. In Turkey and Greece quiet prevails. The King of Prussia is quiet, though ill. An attempt to assassinate him was made by a person in the disguise of a sergeant of the artillery, recently but failed, and the pistol ball just grazing his arm, and wounding him slightly.

The weather in Europe generally is fine, and the prospect of a fair harvest very flattering. In consequence, grain and breadstuffs have slightly fallen. Cotton maintains its former rates with fair demand.

TEN DAYS LATER FROM CALIFORNIA.

The steamer Cherokee arrived at New York on Wednesday with today's late advices from California. She also brought \$1,200,000 of gold dust, and about 120 passengers.

The California Legislature adjourned on the 22d of April.

The intelligence from the mines is of the usual kind—gold is abundant as ever, and a great deal more so. New placers and "gulches" continue to be discovered, and the old ones yield in great profusion. The miners are in high spirits, and enjoy unusual health. It is predicted that the amount of gold which will be taken out and sent to the United States the present session will amount to every body.

A new one, or two, is already in progress. Trinidad Bay-houses are being erected, stones opened, lands enclosed, surveyed, and laid in for building purposes. The timber in the vicinity is said to be the most splendid for building and ship purposes ever beheld. The harbor is also considered the best yet discovered on the coast, except San Francisco and San Diego, and with a little artificial improvement, can be made perfectly secure to all class vessels in all weather.

Humboldt Harbor has also been discovered, 40° 45' latitude. It is described to be a bay 18 miles long and 2 to 3 miles wide, and at the shallowest place there were full three fathoms of water, and a bottom that would hold any vessel in a hurricane. It is said to be the most beautiful landlocked bay upon the coast.

A large number of Chinese are constantly flocking to the territory, and pushing for the mines.

The markets are without any material variation. Lumber is down so low as scarcely to pay cost and freight. Flour ranges from \$65 to \$100 per sack for Goshen, and about the same per bbl. for Michael.

NAMING SNAFFS.—There is a law or naval regulation, says the Pennsylvania, requiring that the Secretary of the Navy shall name all ships of war of the first rate, rivers, mountain, &c., and the small craft after distinguished individuals. But it appears by the following from the Boston *Advertiser*, that the Secretary is about to dispense with the rule, that the name of the most famous naval operator of the day may be properly perpetuated. We suggest a figure head, a bust of George W. Crawford, Secretary of War.

We understand that a new U. S. privateer is to be built and named the "Galaphin," Command, Crawford; first Lieut. Johnson; Purser, Meredit. She will cost about \$250,000. She is to take the place of the Essex Squadron, which is now bearing round the coast of Cuba, in executing the anticipated rebellion of the slave-trading people of that hemisphere. The government-owned vessel, "The Galaphin," has been built by orders of the Cabinet for the special benefit of her chief officers.

A SPECK OF WAR!

THE CUBAN DIFFICULTY.

From the following dispatches and extracts of correspondence it will be seen that there is "trouble brewing" with Spain, in consequence of the ill-advised and ill-fated attempt on the part of some citizens of the United States to get up a revolution in Cuba. What it will amount to, of course it is for the future to disclose—perhaps to open war, and perhaps to a clever "smoke," and nothing else. The following is a dispatch from Washington on Tuesday week:

Dispatches have been received by the government, from our Consul at Havana, stating that he had demanded the removal of five persons taken into the Spanish ship of war, and that he had sought justice in vain. The following is a dispatch from Washington on Tuesday week:

It is reported that with rain, with rain, force us to appear to both serious and eloquent, his unmitigated perversions, his silent conceit and false statement of facts, will, only when renewed, elicit the notice of

A PENNSYLVANIAN.
