Latest from the Sea Sarpent.

Long Island, stated the following particuors of this port, on his last arrival, which, absent on a trip to the eastward. When North. returns, we are promised an interview with him, and an extract from his log book. Capt. Burr states that when in latitude S deg. North, and long. 21 or 22 West, on is passage from the Isle of Sal, Cape de ones, appeared to be about 120 feet long av. on Thursday evening and killed. His and its body as large as the lower mast of lorse took fright from fire crackers. Of the small one the brig and in sight 20 Thursday and was killed. inutes or more. They were steering to the Eastward. Some of the small ones ame quite along the side of the brig, Capt. Burr having a pair of five prong granes on

now missing. Its gills are very large and men from bringing their engines well to bear heels and run! was evidently suction. The eyes are large, one on each side, and 10 inches back from the muzzle back to within an inch or two of the eyes, the size of the proboscis, or whatever it may be called, is nearly uniorm, say an inch and a quarter in diameter, n its present diminished condition; but there the eyes are inserted, the diameter that point commences what may be calld the body. Of this only about four inchare preserved, enlarging to the point here the granes broke- it asunder. The ntire length of the head, including this nall section of the Lody, is 17 inches. apt. Barr thinks the portion of the body hich fell off, was 15 or 16 feet long, at ast; and its largest diameter 5 or 6 inch-There was no back fin. The tail was ot seen. The entire casing of this strange sh'or serpent, as the case may be, is much arder than the common bone; and we can asily immagine that in a full grown subthan beneath. The capacity of the gullet, s well as the absence of teeth, shows that his animal, like the land snake, is in the babit of swallowing its food on the gross, ithout mastication. Of the mother snake, boout

een above the water at once. These, gentle reader, are the facts as hey are given to us. Mr. Burr is said to didate for Governor. e a man of excellent character. Whethr what he saw, was a family of the sea sercents, or not, the render can judge as well as we. The part above described, is beore our eyes, and can be seen by any one sho pleases, at the office of the Marine surreyors. If it is not a part of a young seaerpent, what is it? Will the naturalists eil us? It is evidently a water animal; or else what is the use of gills and fins? We have never seen the like of it before; and re understand the old salts are equally at hult in regard to it. About the eyes, we are told, it resembles a certain species of ligator. But the mouth is entirely unlike that of the aligator; the long proborcis or nout does not belong to the alligator; and on the whole, it clearly belongs to a differant family .- Jour. of Com.
