SALMAGUNDI.

To the Girls.

BY DOW, JR.

☞ Ladies, you caged birds of beautiful plumage, but sickly looks; you pale pots of the parlor, vegetating in an unhealthy shade with a greenish white complexion, like that of a potatoe sprout in a dark cellar—why don't you go out in the open air and warm sunshine, and add lustre to your eyes, bloom to your cheeks, elasticity to your steps, and vigor to your frames? Take early morning exercise—let loose your corset strings, and run up hill on a race and down again for fun. Roam in the fields, climb the fences, leap the ditches wade the brooks, and go home with an excellent appetite. Liberty thus exercised and enjoyed, will render you healthy, blooming and beautiful—as lovely as the Graces and as prolific as Devorra. The buxom, bright eyed, rosy cheeked, full breasted, bouncing lass—who can darn a stocking, mend her own frocks, command a regiment of pots and kettles, feed the pigs, milk the cows, and be a lady withal in company, is just the sort of girl, for me or any worthy young man to marry; but you, pepining, lolling, screwed up, wasp-waisted doll dressed, putty faded, consumption mortgaged, music-murdering, novel-devouring daughters of fashion and idleness—you are no more fit for matrimony than a pullet is to look after a family of fourteen chickens. The truth is, my dear girls, you want generally speaking, more liberty and less fashionable restraint—more kitchen and less sofa—more pudding and less piano—more frankness and less mock modesty—more corned beef and less bishop. Loosen yourselves a little; enjoy more liberty and less restraint by fashion. Breathe the pure atmosphere of freedom, and become something nearly as lovely and beautiful as the God of Nature designed.

☞ An examining committee about to test the capacities of an individual for school teaching put the following questions:

"At what period did France produce her greatest General?"

"At what period?" pausing and scratching his head, "at what—ah! you've got me there, shure."

"Well, was it before or after Christ?"

"Before or after Christ—before or after well, old hosses, you've got me again certain."

INSANE WIT.—An insane woman, in one of our hospitals, became so unruly the other day that it was necessary to confine her in a room by herself. This was more easily said than done, however. It was not until she had mastered several of the attendants, that she was forcibly lifted up and carried by four of them toward the room. Finding herself overpowered, her whole demeanor instantly changed, and with a look of comic resignation she said: "Well, I am better off than my master was—He was carried by one ass, but I am carried by four."

JEFF says that women are called the "softer sex," because they are so easily humbugged. Out of one hundred girls, he says, ninety five would prefer ostentation to happiness—a dandy husband to a mechanic.

Maxims for Business People.

1. The world estimates men for their success in life; and, by general consent, success is evidence of superiority.

2. Never under any circumstances, assume a responsibility you can avoid consistently to yourself and others.

3. Base all your actions on a principle of right; preserve your integrity of character, and, in doing this never reckon the cost.

4. Remember that self-interest is more likely to warp your judgment than all other circumstances combined, therefore, look well to your duty when your interest is concerned.

5. Never make money at the expense of your reputation.

6. Be never lavish or nigardly; of the two avoid the latter. A mean man is universally despised; but public favor is a stepping stone to preferment—therefore, generous feelings should be cultivated.

6. Let your expenses be such as to leave a balance in your pocket. Ready money is a friend in need.

7. Keep clear of the law; for, when you gain a case, you are generally a loser of money.

8. Never relate your misfortunes, and never grieve over what you cannot prevent.

10. No man who owes as much as he can pay, has any right to endorse for another.

FRANKLIN'S TOAST.—Long after Washington's victories over the French and English had made his name familiar over all Europe, Dr. Franklin chanced to dine with the English and French Ambassadors, when, as nearly as I can recollect the words the following toasts were drunk: By the British Ambassador. "England—the *sun* whose beams enlighten and fructify the remotest corners of the earth," The French Ambassador, glowing with national pride, drank: "France—the *moon*, whose mild, steady, and cheering rays are the delight of all nations; consulting them in darkness, and making their dreariness beautiful." Dr. Franklin then rose, and with his usual dignified simplicity, said—"George Washington—the Joshua, who commanded the sun and moon to stand still, and they obeyed him."

Corners have always been popular. The chimney corner, for instance, is endeared to the heart from the earliest to the latest hour of existance. The corner-cupboard! what stores of sweet things has it contained for us in our youth—with what luxuries its shelves have groaned in manhood! A snug corner in a will! who ever objected to such a thing? A corner in a woman's heart! Once get there, and you may soon command the entire domain. A corner in the Temple of Fame! arrive at that and you become immortal.

Agricultural Implements.

To the person who shall exhibit any new or improved Agricultural Implement, the invention being his own, which in the opinion of the Committee merits a reward, 300

Banner Township.

To the exhibitors of the township sending the largest number of Neat Stock, 10 00

To the exhibitors sending next largest, 5 00

Fancy articles are earnestly requested in order to add interest to the Exhibition, and their merits shall be specially noticed.—But in the present state of the Society's funds, it is impossible to extend the premium list, which is greatly increased.

Applicants for premiums on grain and potatoes are requested to give the mode of cultivation, and furnish the Society with undoubted proof of the quantity raised.—Applicants for premiums on milch cows must state the greatest quantity of milk in any one week during the season, which must be marked on the card which contains the number. Persons presenting agricultural implements, or articles of mechanical ingenuity and utility, are requested to furnish the Secretary with a description of the article, as it is intended to publish a list for the benefit of manufacturers and purchasers. The foregoing premiums will be paid by the Treasurer on the report of the Judges being declared by the President.

Farmers, their wives, sons and daughters, are invited to attend, and all others who feel an interest in the prosperity of the county. Let them attend these annual fairs, and each one contribute something to give interest to the Exhibition, which is in promotion of the great cause of Agriculture, and as the Society offers such liberal premiums, it is hoped that all members will settle their small annual subscription, and each induce others to come forward in support of the Society, for it only requires a united effort to place Susquehanna in the front rank of agricultural counties in Penn'a.

A plowing and drawing match will take place, of which due notice will be given.

By order of Executive Committee.

☞ Young ladies who have the good fortune to become farmer's wives, will find it more profitable to know how to make Johnny cake and cheese, than to play on the piano.

UROSCOPA.

DR. S. E. CRAIN, *German Physician*, takes this method of informing his friends and the public in general, that he has located in the village of Owego, County of Tioga, and has established a permanent office in Main-st. over E. H. Hubbart's store, and is ready to attend to any business in the line of his profession.

His superior method of arriving at a correct diagnosis in disease, and his unparalelled success in treating the various diseases incidental to the human system, more especially those of an acute, subacute, chronic, or complicated character, are all that is necessary for him to offer to the invalids and diseased of every character to entrust him to the confidence of a discriminating public. And the benefit of those unacquainted with his method of practice he would say that he describes disease by a chemical and microscopical examination of the *Urine.*

Persons may send or bring their Urine in a clean (at least two ounce) vial, the first in the morning preferred, and as a record is kept of all the cases examined, the name and age of the patient are also required. No charge is made for examining a case where no medicine is taken.

His medicines are principally selected from the Vegetable Kingdom, and are administered according to the German *Botanic Practice.*

He would also add, that he has at last made an important discovery in relation to treating diseases of a calculous origin, or Gravel. This is a singular deposition, and may consist in crysta line grains, of a gritty harsh feel, but not distinctly visible upon a close examination; or it may consist in irregular shaped transparent concretions, sufficiently large to be readily distinguished by the eye, and denominated calculi.

The preparation that he has introduced is capable of dissolving and holding in solution, calculous, or latentious concretions, which is the source of irritation, and very often excites inflammations of the Urinary organs, thereby allowing the same to escape.

References can be had at his Office. Persons living in all the Western counties of the State of New York, Pennsylvania, Michigan, &c., who had been given up to die by the most skillful Physicians, bearing testimony of themselves of his skill have been restored to good health. The great German Remedy for Female Obstructions, Worms, Croup and Dysentery, may always be found at the Office. D. S. E. CRAIN

ASTROLOGY—THE Celebrated Dr. C. W. ROBACK, Professor of Astrology, Astronomy, Phrenology, and Geomancy, combined with CONJURATION, from Sweden, office No. 71 LOCUST Street, Philadelphia, offers his services to the citizens of Montrose. He has been consulted by all the crowned heads of Europe, and enjoys a higher reputation as an Astrologer than any one living. Nativities calculated according to Geomancy—Ladies $3, Gentlemen $5. Persons at a distance can have their nativities drawn by sending the date of the day of their birth. All letters containing the above fee will receive immediate attention, Nativities sent to any part of the world written on durable paper; and he is prepared to make use of his power by conjuration on any of the following topics:—Courtship advice given for the successful accomplishment of a wealthy marriage, he has the power to redeem such as are given to the use of the bottle; and for all cases of hazard, and for the recovery of stolen or lost property, and he purchasing of lottery tickets. Thousands of the above named cases have been done in this city and its vicinity, and in the United States to the full satisfaction of all. 10,000 Nativites or Horoscopes have been cast during the last four years while here. Letters will answer every purpose, and will do as well as to call in person, and the mail is now so safe that persons need not fear to trust money through the Post Office. Dr. Roback receives from 500 to 1000 letters monthly, and has never missed one. All letters will be reliciously attended to if pre-paid. For particulars call at the Democrat office and get an Astrological Almanac.

☞ Be particular to mention the Post-office, county and State. 11*1y

$50 FORFEIT—Dr HUNTER will forfeit $50 if failing to cure any case of disease that may come under his care, no matter how long standing or afflicting. Either sex are invited to his Private Rooms, 38 North SEVENTH st., Phila., without fear of interruption by other patients. Strangers and others who have been unfortunate in the selection of a physician are invited to call. Those who have injured themselves by solitary vice are also invited.

HEAD AND REFLECT.—The afflicted would do well to reflect before trusting their health, happiness, and in many cases their lives, in the hands of physicians, ignorant of this class of maladies. It is certainly impossible for one man to understand all the ills the human family are subject to. Every respectable physician has his peculiar branch, in which he is more successful than his brother professors, and to that he devotes most of his time and study.

YEARS OF PRACTICE, exclusively devoted to the study and treatment of diseases of the sexual organs, together with ulcers upon the body, throat sore, rheumatism, pains in the head or bones, mercurial rheumatism, strictures, gravel, irregularities, disease arising from youthful excesses or impurities of the blood, whereby the constitution has become enfeebled, enables the Doctor to offer SPEEDY RELIEF to all who may place themselves under his care. 19 1y
