Medition of a Young Girl in Cal-

At this point of the proceeding, a young wer mounted the bridge railing, and deomeed the whole affair in words of more Fred to speak long. A dozen hands his State, in the following language ? ulled him down, and as many feet were igourously applied to him along the length book he was forbidden to enter Downieille again, under penalty of being tarred and feathered.

Even the propetrators of this outrage hould have been shamed into common huminy by the next a peal. A physician well known in the place, stated upon his on a that the girl was enciente, and deanded for her the reprieve which was alas ga and by the merciful common law England, even in the darkest ages and ost barbari ous periods. But no! Merto a murdress! Time to give birth to other of the viner's blood! They hooed at the idea! The physician was ordred to leave town within three days, for having dared to distarb the majesty of the earle arrisen to assert justice.

Meanwhile the girl had been looking on mill the utmost nonchalance. At the failre of this last anneal, a scornfol smile disorted ber lin, and she at on e began to erform the last offices for herself. The anta was rem wed from her head and givn to her paramour, with a watch, purse, lomaments. Her black hair fell in sses over her shoulders but she cambe ped the noose, dangling near by, and

from her lips with - " I would do it again by them in trials, and comfort them in tribthemaldito-!" She did not finish the ulation." entence, but dropped the cigarita. This was the signal, and her light form shot pidly up in the air, hardly struzgling, so owerful was the will that kept her free arms stiffly pressed against her sides.bere she bung over that fearning riveretween sky and earth, the mark of deepdisgrace upon all our people.

The Mortality of New York. The deaths reported to the City Inspecof New York during the year last past, feluding 1,268 still born infants, was 20,year, including still-born were only 8831. year is 3850, an increase of nearly 200 on be previous year. There has been no epidenic during the year. Small pox, which
