THE DEMOCRAT. MONTROSE, APRIL 22. 1852.

manin the second

From the Boston Journal.

A Warning Voice from Californis. A friend has handed us a latter which he rework for him to do. In San Francisco and Sacramento, our only sities, of any moment, ceived from a brother in California by the last you can hire the best of workmen for \$4 per steamer, and which was written in reply to one day, and both places are crowded to overflowasking advice in regard to another brother's going out to the gold regions. The letter be- ing with the best of mechanics. The calcufore us was written, not for publication, but lation is, that 100,000 men will some to this as a brother's advice to a brother. Its state. land this spring. What they are going to do ments may therefore be relied upon, and the is more than I can imagine. You know we SHAVENG AND HAIB DRESSING SALEON. Search extracts which we have made, ought to be well lean entirely upon the mines and miners to Sudding, part door to the Postoffice, Albarrose, P considered by the hundreds of young men who five out here." As soon as they begin to fail, re now rashing for California, with hopes every thing else must fail too; and yet the which to all human probability must be sadly high price of provisions must be kept up. I disapp in ed. The letter is dated Bear River, think I can say with truth that there are more poor men in California now than in any other Jan. 37. The writer says:

"The principle object of your letter was to ask my advice about brother A's coming to

California. Now I beseech you, do not think of such a thing for a moment. I will tell you why. In the first place A. is a married man and has a family of children to watch over and take care of, and what could he do for them here. Another reason is, if A. comes out here it will cost him nearly \$400, and he will be send you an article on mising Corn, and is ac landed without a dime in a land where every. cordance with that promise have hastily thing is ton times as costly as at home, with penned the following, which is at your serthe only exception of labor, which at the pres- vice :

ent time is below par. I will give you s tew For the last six years I have been experifacts which you can rely upon as truth. The menting, for the purpose of ascertaining the last trip up of the Golden Gate she had on best mode of growing corn. One great error beard thirteen hundred and fifty passengers into which our farmers fall, is that of planting mostly mechanics of New York and the state too close; from three feet to six inches being of Maine. A good portion of them immediate. the distance usually allowed between the rows ly started for the mines. When they had got each way. My plan is to score out my rows

land,

Ameleultural.

From the Faim Journal for April.

Corn-Late vs. Early Planting.

MR. EDITOR : I promised some time ago to

some hundred miles from Sacramento they from north to south, leaving a space of full found themselves without a dime in the world, four feet between each. I then drop two The hand was fail of them. They could not grains at one place, with an interval of two go to mining, and if they should they would and a half feet between each dropping. My go to mining, and is they should they would and a half feet between each dropping. My not make enough to pay for what they eat, matting aside tools to work with: I have had is least a hundred men offer to work for me sun as possible, and to prevent in a certain de-material and in the met improved style. Charges low. at least a hundred men offer to work for me sun as possible, and to prevent in a certain defor their board, and you can hire as many as gree one row from shading another. Corn, you want for from \$30 to \$50 per month, and like anakes, is fond of the sun. Every hill is on that sum no man can live out here, when covered with the hoe, (preferring the good old provisions are as high as they now are. Every way in that respect to any other,) taking good one I have spoken to about A's coming out care that no stones or clods rest upon the bere, 'say to him, stay at home by all means. place where the corn has been planted. This Do not let him make a fool of himself by com. | can be accomplished in no way so well as with out here, as thousands of others have done .'-- the hoe-

He is ten thousand times better off at home My time for planting is generally between with 75 cents a day than with 83 or 84 out the 10th and 15th of May, giving the ground a chance to become well warmed before the here.

You must not believe all the stories that are seed is put into it. There is far less danger written about California. Most of them are of the corn rotting when the ground is warm lies and base forgeries. They are manufac- and the rapidity of its growth more than compensates for the lateness of the season : betured by a few men engaged in steam boats sides, it is not near so liable to a back set as and other conveyances, to keep up this excitement so that their boats and coaches may go when it is planted earlier. Many farmers plant full. I will give you an instance which actu- their corn the last week in April, when the ground is wet and cold, and as a consequence ally occurred. Just after the arrival of a large number of new comers at Sacramento, the pro-(unless under very, favorable circumstances,) it prietor of a line of stages running into the lays there for weeks without germinating and Pr mountains' gave a large specimen of gold, which very frequently rots. I have known corn to he had purchased from a gambler, to a person remain in the ground for three weeks before and told him to raise an excitement with it ____ it made its appearance above ground, while it The lump was worth \$1575. The man took is seldom that corn planted from the 10th to it and went down to the lower part of the city, 15th of May, does not sprout in three or four where he exhibited it on the side-walk, telling days. It may be proper to remark here, that at the same time, a good story, how, when and I always soak my seed corn in hen manure

where it was obtained. According to his story water before planting.

it was found at a large creek near Auburn, where there are plenty of chances for thou-sunds of miners. These new comers engerly bit at this bait. Some of them perhaps have but a few dimes, or at the most, but a few dol. to 80 bashels per acre, without extra manur-to 80 bashels per acre, without extra manur-to 80 bashels per acre, without extra manurlars, and these they readily give to ride in the ing, which I consider a fair yield. stage to this golden place, where all they Last season, I tried an experiment upon ten have to do is to stoop down and pick up the acres, by planting one half full 4 feet apart, rich lumps. The poor fellows soon find that two grains at a place, 3 1-2 feet apart. The rich lumps. The poor fellows soon find that two grains at a place, 2 1-2 feet apart. The equaled, by any other preparation in the United States they have been guiled—that they are penniless other half was drilled in, 4 feet apart. The had failed. They have been guiled—that they are penniless other half was drilled in, 4 feet apart. They have been guiled at the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for something to one drilled at the set of the bar for some drilled at the set of the bar for some drilled at the set of the bar for some drilled at the set of the bar for some drilled at the and have got to beg for something to ent.— This is solemn truth. There is not a day that passes but I feed and let over my bridge free, from ten to twenty persons, because they have not a dime to pay for it. Think over the list of those you know who have made anything. A great many of them have made anything. A great many of them get just mency enough to get home, and thous-the same to california, and see how many of them have made anything. A great many of them and have got to beg for something to ent .-- drilled portion was much more difficult to keep get just money enough to get home, and thous- this article, that my ground intended for corn get just money enough to get home, and thous-ands and thousands die and rot here, because is always put in the very best condition before they cannot get money to take them home.— I'am told by persons that have just arrived out here, that the enchantment is greater than ever before in all the Eastern States, and that ing this plain statement 4 will metaly mersely consider the statement and the state of the state and series and the state of the state and series the state of the sta ever before in all the Eastern States, and that one half the population will come out here in that if the same attention were paid to corn the Spring. How much suffering there will growing, that is given to the missing of wheat be, God only knows. Now let me tell you how Leive out here. Since hast July I have slept on the ground, with merely a blanket to the acre, as we now raise fifty. ever before in all the Eastern States, and that ing this plain statement, I will merely remark, slest on the ground, with merely a blanket to the acre, as we now raise fifty ever me, and when it was raining in torrents. N. F. ELLMAKER. a piece of board to keep me from the wet, and Spring Lawn Farm, Lanc. co., Pa. an old tent to keep me from the wet, and an old tent to keep the thickest off my head... I have lived like a nigger, and worked like a share, and you know how much of the stuff way to escape the rot, and the potatoes as the last of a medicae about for a brief period and then forgot to plant your potatoes as early as the last of the number of the stuff the stuff the stuff alitic gold I have been able to send home.... If it had not been for my pride, I should have been home long ago. No one knows what I have suffered—sometimes even for food, and potatoes in this way for the last five years, and his name blows in the bottle, without they are have suffered—sometimes even for food, and potatoes in this way for the last five years, and his name blown in the bottle, without which they are spurious. with nothing but the blue canopy of Heaven none of them have ever rotted. I have also store, No. 120 Arch street, one door below dixth, Phila-to cover me at night. Is it at all strange, then planted some in May every year for several dephis; and by respectable dealers generally through that I feel so about A,'s coming out here I for years (without liming,) and they have always The does, he has got to go through with the rotted, more or less.

Ayer's Cherry Pectoral, For the cure of Coughs, Colds, Hoarseness, Bronchitis, Whooping-Cough, Croup, Asth-

ma, and Consumption. Among the numerous discoveries Science has made in this generation to facilitate the business of life-increase its emjoyment, and even prolong the term of human ex-listence, none can be named of mote real value to man-kind, that this contribution of themistry to the Healing istence, hone can be mand of more real value to man-kind, that this contribution of themistry to the Healing Art. A vast trial of its virtues throughout this broad country, has proven beyond a doubt, that no medicine or combination of madicines yet known, can so surrely control and cure the numerous varieties of pulmonary disease which have hitherto swych from our midst thou-sands and thousands every year. Indeed, there is now abundant reason to believe a Remady has at length been found which can berelled on to cure the most dangerous affectome of the lungs. Our space here will not permit us to publish any proportion of the cures effected by its use, but we woald present the following opinions of emi-neut men, and refer further inquity to the circular which the Agenter below named, will always be pleased to fur-nish here, metrica.

proof of these facts. From the President of Amherst College, the celebrated Professor Hitchcock.

proof of thiese facts.
From the Precident of Amherst Callege, the celebrated Professor Hitchcock.
"James C. Ayers-Sir: I have used your Cherry Pec-toral in my own case of deep-seated Bronchitis, and am an instant compound for the relief of laryngial and brouch-ial difficulties. If my opinion of its superior character can be of any service, you are at liberty to use it as you think proper. EDWARD HITCHCOCK L. L. D. Prom the widely celebrated Professor Sillman, M. D., L. L. D., Professor of Chemistry, Mineralogy, &c., Tale College, Member of the Lit. Hits. Mod. Phil. and Scientif-ie Societies of America and Europe "I deem the Cherry Pectoral an admirable composi-tion from some of the best articles in the Materia Miclica, and a very effective remedy for the class of dissates it is intended to cure" New Haven, Ct., Nov. 1, 1840.
Maj. Pattison, President of the B. O. Senate, states that he has used the Oherry Pectoral in my partice, and prefer it to any otherry Pectoral in any partice, and prefer is to any other mediane for pulmonary complaints. From observation of may serve cases, I am cowinded it will cure coughs, coids, and disenses of the lungs, that have put to defiance all other precedes.
Jin and chanker mediane for pulmonary complaints. From iobservation of may serve cases, I am cowinded it will cure coughs, coids, and disenses of the lungs, that have put to defiance all other remedies.
Jinvariably recommend its use in cases of consump. for, and consider it much the best remedy more for that dusates. Respectively yours.
Prepared and sold by James O, Ayer, Cherrie is the how the classe.
