A Journal of Farm Labor.

We find in the Granite Farmer some excellent remarks and directions relative to this subject, from which we extract the following:

Most farmers, as we know by frequent inquiry, have little notions of their crops; and yet what is more vital to their prosperity? And how easily is this knowledge obtained, by simply keeping a diary of the daily labor and expenditure. A small blank book, costing a shilling or a quarter of a dollar, or a few sheets of paper stitched together, and provision is made. Now for a method to be pursued in making the entries. This may be done by one system of daily entries, entering at night the labors of the day. This is perhaps the simplest at first, as there is but one place to write out the different operations of the day In making out the debt or credit of each field or crop at the end, the entries of the season must be reviewed, and a new account made out with the separate crops. This last labor may be avoided by keeping the account separate. Let the fields be numbered and measured, and let each have a separate page in the journal. For example, let one page be given to the 'garden,' one to the 'corn, six acres,' one to the 'oats, four acres,' and 'potatoes, two acres,' &c., giving a part of the journal to every sort of expense and income. At the close of each day's work, let the work done be entered, charged to the crop to which it has been given.

It is obvious that an account kept in this way through the season, will show the absolute credits, of course being when the produce shall have been gathered, measured, sold or stored.

Another advantage will grow out of this plan if fully carried out, which is, that every farmer will become convinced that he cannot afford to raise medium, or small crops. He will see that if it costs him $20 per acre to raise 30 or 35 bushels of merchantable corn, he is receiving but a very small income, say from four to eight dollars per acre. He will see that if by plowing and harrowing more, and applying more manure, so as to bring the cost of culture up to $30 per acre, he can harvest 60 bushels, he will receive a much greater profit, say $18 per acre.

The same would be true of other crops, and as a result of judgment, would improve his methods of farming. By having a journal of farm operations of several years standing, and by comparing these results each year, the farmer will soon have a guide book to his farm that will be most invaluable.

A Hint to Farmers.

The Main Farmer gives the following pertinent paragraphs on the importance of the proper care of stock.

We may send to England for Durham Cows and to Spain or Saxony for the choicest sheep—we may search the world over for cattle that please the eye, but unless they receive the best care and liberal feeding, they will most assuredly deteriorate, and eventually become as worthless and unworthy of propagation as any of the skeleton breeds that now haunt our rich but neglected pasture lands. We remember an anecdote in point, and will relate it by way of illustration. A farmer having purchased a cow from a country abounding in the richest pasturage, on taking her to his own inferior pasturage, found that she fell short of the yield which he was informed she was accustomed in former times to give. He complained to the gentleman of whom he had purchased that the cow was not the one he bargained for, or in other words that she was not what she was "cracked up to be." Said the seller, "I sold you my cow, but did not sell you my *pasture*, too."

The above which we cut from an exchange reminds us of the reply which a shrewd old farmer whom we knew many years ago made to one of his neighbors. The latter had obtained some pigs of a man residing some miles off, and who, because intelligent was always successful in his farming operations, particularly surpassing his neighbors in raising pork. Shortly after, meeting the old gentleman referred to, he says, "Well, Mr. Sweet, I'm going to beat you raising hogs this year. I have got some of J. M——'s breed." "Y-a-a-s," drawled out the old man, "you'd better get the breed of his h-o-g trough!"

GUM ARABIC STARCH.—The fine gloss on new linen, shirt bosoms, &c., is made by the following receipe: Take two ounces of fine white gum arabic powder—put it into a pitcher, and pour on it a pint of boiling water, according to the degree of stiffness you desire and then having covered it, let it set all night. In the morning pour it carefully from the dregs into a clean bottle, cork it for use. A tablespoonful of gum water, stirred into a pint of starch that has been made in the usual manner will give to lawns, either white or printed, a look of newness when nothing else can restore them after washing. It is also good, if much diluted, for white muslin and bobinet.

THE POISON OF RATTLESNAKES.—At a late meeting of the Boston society of natural history, a paper was read showing that this poison is a most powerful sedative, and that stimulants were its antidotes. Alcohol is designated. In two instances in which this remedy has been applied, the persons have been cured. Brandy was freely given them until relieved from the usual symptoms, and continued in smaller doses until the third day, when they went about as usual. Alcohol in these cases did not produce intoxication. The venom of rattlesnakes is now employed as a remedy and is already found to be a specific for very many maladies.

☞ An exchange paper says: "Never let people work for you gratis." Two years ago a man carried a bundle for us and we have been loading him two shillings a week ever since."

The Country Doctor.

The following scene in the life of the country doctor is taken from the *Knickerbocker*.

The doctor is called from his bed on a stormy night with the stirring summons:

'Doctor, want you to come right straight away off to Bank's. His child's dead.'

'Then why do you come.'

'He's pisoned. They gin him laud'num for paregorick.'

'How much have they give him?'

'Do'no. A great deal. Think he won't get over it.'

The doctor pushes off through the storm, meets with divers mishaps by the way, and at length arrives at the house of his poisoned patient. He finds all closed, not a light to be seen.

'He knocks at the door but no answer. He knocked furiously, and at last a night-cap appeared from the chamber window, and a woman's voice squeaked out—

'Who's there?'

'The doctor, to be sure; you sent for him.—What the dogs is the matter?'

'Oh it's no matter, doctor. Ephraim is better. We got a little *skeered* kinder. Gin him laud'num and he slept kind o'sound, but he's woke up now.

'How much laud'num did he swallow?'

'Only two drops. Taint hurt him none. Wonderful bad storm to night.'

The doctor turns away buttoning up his over-coat under his throat, to seek his home again, and tries to whistle away mortification and anger, when the voice calls—

'Doctor, Doctor!'

'What do you want?'

'You wont charge nothin' for this visit, will yer?'

Pat and the Alphabet.

The following rich scene recently occurred in one of our private schools:

'An, Pat,' exclaimed the school mistress to a very thick headed urchin, into whose muddy brain she was attempting to beat the alphabet 'I'm afraid you'll not learn anything. Now what's that letter?'

'Sure, I don't know, ma'am,' replied Pat.

'I thought you'd recollect that.'

'Why, ma'am

'Because it has got a dot over the top of it.'

'Och, ma'am, but sure I thought it was a fly speck'

'Well, now remember—it is I.'

'No, no—not U, but I.'

'Not I, but you, ma'am—how's that?'

'Not U, but I, blockhead!'

'Oh yes, now I'll have it, ma'am. You mean to say that not I, but you are a blockhead.'

'Fool!' exclaimed the pedagogue, almost bursting with rage.

THE WAISTS OF AMERICAN LADIES.—The unnatural length and ridiculous smallness of their waists baffle description. A waist that could be spanned is an English metaphorical expression used in a novel—but it is an American fact; and so alarming does it appear to an Englishman, that my first sentiments on viewing the phenomenon was one of pity for unfortunate beings who might possibly break off in the middle, like flowers from the stalk, before the evening concluded. No less extraordinary is the size of the ladies' arms. I saw many which were scarce thicker than moderate sized walking sticks. Yet strange to say when these ladies pass the age of forty, they frequently attain an enormous size. The whole economy of their structure is then reversed, their wrists and arms becoming the thickest parts of the body. Here is a subject worthy the contemplation of the ethnologist How comes it to pass that English type—which I presume has not in every case, been so affected by the admixture of others as to loose its own identity—how comes it to pass I say, that the English type is so strangely altered in a few generations? I have heard various hypotheses amongst others, the habits of the people—the dry climate. The effect of the latter on a European constitution, would have appeared to me sufficient to account for the singular conformation, if I had not been persuaded by natives of the country, that the small waists is mainly owing to tight lacing. This practice, it is said, is persevered in to an alarming extent, and, if report be true, it is to be feared that the effects will be felt by future generations, to a greater degree than they are at present.—*Dublin University Magazine.*

POWER OF MUSIC.—Crying children in church are usually considered as nuisances, and taken out, but this is not always the case as the following anecdote from the Ladies' Repository for April, will show:

'A brother just returned from California, says he was present in the congregation of brother Owen, when a babe in the arms of its mother began to cry.

A thing so unusual in California, attracted not a little attention, and the mother rose to retire. 'Don't leave,' said the preacher, 'the sound of that babe's voice is more interesting to many in the congregation than my own. It is perhaps the sweetest music many a man has heard since a long time ago he took leave of his distant home.' The effect was instantaneous and powerful, and a large portion of the congregation melted into tears.'

TRUSTING IN PROVIDENCE.—A writer says I knew an excellent old lady who always dates from the time their horse ran away; to be sure, it was a remarkable begin, and she used to remark, in describing it, that she put the fullest reliance on Providence till the breeching broke, and then she gave up."

☞ A strange genius, in describing a lake in Minnesota, says its so clear that by looking into it you can see them making tea in China.

☞ A good old minister prayed for those of his congregation who were too proud to kneel and too lazy to stand.

☞ The man who attempted to sell the golden rule, has cut his throat with a boy's jack.

Liver Complaint,

Jaundice, Dyspepsia, Chronic or Nervous Debility, Diseases of the Kidneys,

AND all diseases arising from a disordered liver or stomach such as constipation, inward piles fullness or blood to the head, acidity of the stomach, nausea, heart-burn, disgust for food, fullness or weight in the stomach, sour eructations, sinking or fluttering at the pit of the stomach, swimming of the head, hurried or difficult breathing, fluttering at the heart, choking or suffocating sensations when in a lying posture, dimness of vision, dots or webs before the sight, fever and dull pain in the head, deficiency of perspiration, yellowness of the skin and eyes, pain in the side, back, chest, limbs &c., sudden flushes of heat, burning in the flesh, constant imaginings of evil, and great depression of spirits, can be effectually cured by

Dr. Hoofland's celebrated German Bitters.

Prepared by Dr. C. M. Jackson, at the German Medicine store, 120 *Arch street*

Philadelphia.

Their power over the above diseases is not excelled, if equalled, by any other preparation in the United States as the cures attest, in many cases after skilful physicians had failed.

These bitters are worthy the attention of invalids.—Possessing great virtues in the rectification of diseases of the liver, the most important of the digestive organs, they are without a parallel in their operation, and to the afflicted we advise their use

Scott's Weekly, one of the best literary papers published, said, August 25th—

"*Dr. Hoofland's German Bitters*, manufactured by Dr. Jackson, are now recommended by some of the most prominent members of the medical faculty as an article of much efficacy in cases of female Weakness. As such is the case, we would advise all such to obtain a bottle, and thus save themselves much sickness. Persons of debilitated constitutions will find these Bitters advantageous to their health, as we know from experience the salutary effect they have upon weak systems."

More Evidence.

The Philadelphia Saturday Gazette, the best family paper published in the United States, says of Dr. Hoofland's German Bitters—

"It is seldom that we recommend what are termed Patent Medicines, to the confidence and patronage of our readers, and therefore when we recommend Dr. Hoofland's German Bitters we wish to be distinctly understood that we are not speaking of the nostrums of the day, that are noised about for a brief period and then forgotten after they have run their gully race of mischief, but of a medicine long established, universally approved, and which has met the hearty approval of the faculty itself."

Look well to the marks of the genuine. They have the written signature of C. M. JACKSON upon the wrapper and his name blown in the bottle, without which they are spurious.

For sale, wholesale and retail, at the *German Medicine Store*, No. 120 Arch street, one door below Sixth, Philadelphia, and by respectable dealers generally throughout the country.

Prices reduced.—To enable all classes of invalids to enjoy the advantages of their great restorative powers, Seventy-five Cents.

THE ROAD TO HEALTH!

HOLLOWAY'S PILLS.

CURE OF A DISORDERED LIVER AND BAD DIGESTION.

Copy of a Letter from Mr. R. W. Kirkus, Chemist, Prescot street, Liverpool, dated 6th June, 1851.

To Professor Holloway—SIR:—Your Pills and Ointment have been in use in this neighborhood for some years. A customer, to whom I can refer for any enquiries, desires me to let you know the particulars of her case. She had been troubled for years with a disordered liver, and bad digestion. On the last occasion, however, of the return of the attack was so alarming, and the inflamation set in so severely, that doubts were entertained of her not being able to bear up under it; fortunately she was induced to try your Pills, and she informs me that after the first, and each succeeding dose, she found great relief. She continued to take them, and although she used only three Boxes, she is now in the enjoyment of perfect health. I could have sent you many more cases, but the above, from the *severity of the attack*, and the *speedy* cure, I think, speaks much in favor of your astonishing Pills.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN VAN DIEMEN'S LAND.

Copy of a Letter inserted in the Hobart Town Courier of the 1st March, 1851, by Major J. Welch.

Margaret M'Connigan, nineteen years of age, residing at New Town, had been suffering from a violent rheumatic fever for upwards of two months, which had entirely deprived her of the use of her limbs, during the period she was under the care of the most eminent medical men in Hobart Town, and by them her case was considered hopeless. A friend prevailed upon her to try Holloway's Pills, which she consented to do, and in an incredible short space of time they effected a perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERSON 84 YEARS OF AGE.

From Messrs Thew & Son, Proprietors of the Lynn Advertiser, who can vouch for the following statement.—August 2d, 1851.

To Professor Holloway—*Sir*:—I desire to bear testimony to the good effects of Holloway's Pills. For some years I suffered severely from pain and tightness in the stomach, which was also accompanied by a shortness of breath, that prevented me from walking about. I am 84 years of age, and notwithstanding my advanced state of life, these Pills have so relieved me, that I am desirous that others should be made acquainted with their virtues. I am now perfectly free, that means, comparatively active, and can take exercise without inconvenience or pain, which I could not do before.

(Signed) HENRY COE, North st., Lynn, Norfolk.

WONDERFUL EFFECT OF HOLLOWAY'S PILLS IN A CASE OF DROPSY.

Persons suffering from Dropsy, either about the turn of life, or at other times, should immediately have recourse to these Pills, as hundreds of persons are annually cured, by their use, of this direful complaint in its different stages, when all other means had failed.

These celebrated Pills are wonderfully efficacious in the following complaints.

MARRIAGE,

HAPPINESS AND COMPETENCE.

WHY IS IT?

That we behold many females, scarce in the meridian of life broken in health and spirits with a complication of diseases and ailments, depriving them of the power for the enjoyment of life at an age when physical health, buoyancy of spirits, and happy serenity of mind, arising from a condition of health, should be predominant.

Many of the causes of her sufferings at first—perhaps years before, perhaps during girlhood, or the first years of marriage—were in their origin so light as to pass unnoticed, and of course neglected.

IN AFTER YEARS,

When too late to be benefitted by our knowledge, we look back and mourn, and regret the full consequences of our ignorance.

What would we not often give to possess, in early life, the knowledge we obtain in after years! And what days and nights of anguish, weeknight not have been spared, if the knowledge was timely possessed. It is

MELANCHOLY AND STARTLING

To behold the sickness and suffering endured by many a wife for many years, from causes simple and controllable, easily remedied—or better still,—not incurred, if every

WIFE AND MOTHER

Possessed the information contained in a little volume, (within the reach of all) which would spare to herself

YEARS OF MISERY.

And to her husband the constant toil and anxiety of mind, necessarily devolving upon him from sickness of the wife, without giving him the opportunity of acquiring that competence which his exertions are entitled, and the possession of which would, secure the happiness of himself, wife, and children.

SECURE THE MEANS OF HAPPINESS

By becoming in time possessed of the knowledge, the want of which has caused the sickness and poverty of thousands.

In view of such consequences, no wife or mother is excusable if she neglect to avail herself of that knowledge in respect to herself, which would spare her much suffering, be the means of happiness and prosperity to her husband, and confer upon her children that blessing above all price—healthy bodies, with healthy minds. That knowledge is contained in a little work entitled

It is impracticable to convey fully the various subjects treated of as they are of a nature strictly intended for the married, or those contemplating marriage, but no female desirous of enjoying health, and that beauty, consequent upon health, which is so conducive to her own happiness, and that of her husband, but either has or will obtain it, as has or will every husband who has the love and affection of his wife at heart, or that of his own pecuniary improvement.

READ AND REFLECT.—The afflicted would do well to reflect before trusting their health, happiness, and in many cases their lives, in the hands of physicians ignorant of this class of maladies. It is certainly impossible for one man to understand all the ills the human family are subject to.
