to als worldly goods did not give him a tithe of pleasure he derived from the bestowal of twenty dollars. He thought, too, of the three hundred dollars he had lost by a misplaced codfidence; yet even as the shadow cast from that event began to fall upon his heart, the bright face of John Levering was conjured up

by fancy, and all was sunny again.

Mr. Everett went home to his family on that evening, a cheerful minded man. Why? not because he was richer by nearly two thousand dollars. That circumstance would have possessed no power to lift him above the chadowed, fretful state which the loss of three hundred had produced. Why! He had bestowed of his abundance, and thus made suffering hearts glad; and consciousness of this pervedud his bosom with a warming sense of

Thus it is, that true benevolence carries with it, ever a double blessing. Thus it is, that in giving, more is often gained than in eager accumulation, or selfish withholding. Pictorial Drawing Room Companion.

## Accident at Niagara Falls.

On Tuesday of last week, three men, who it is supposed fell asleep in a small boat a short distance above the Falls, were lost in the CRAT." cutaract. Two of them went over immediate done, can do so by calling at our, ly, the third caught hold of a log, where he remained for several hours, the particulars of which are given from the correspondence of the N. Y. Herald:

As I was an eye witness of the horrible scene-which the rapids at Ningara presented will always find a gentleman, during business during Tuesday's accident, it may interest yours, at the printing office, to wait on them many of your readers to learn a few particulars, which will enable them the better to re- Democratic Standing alize the awful position in which, for twenty hours, the late unfortunate Joseph Avery was

The log on which he sat, and occasionally stood upright, was firmly jammed between some rocks, about half way between the bridge which crosses the American branch of the river and the Falls. At the same time he was in the very centre of the river. which there boils foam, and whirls towards the tremendous abyss of the cataract. Of the force of the idea. To draw anything in the shape of boat or raft against it is simply hopeless. Therefore the only feeble chance of saving the man was to have let a boat down the rapids from the bridge by ropes, and should he have succorded in entering into it to allow it to drift across, if possible, to a small island, called Clapin's Island, about half way between the log and Goat's Island, which divides the Canadian from the American rapids.

When I reached the bridge, at about two o'clock, the American shore and the bridge were lined with spectators in a state of the most thrilling and intense excitement. The more eager were propounding all kinds of extravagant plans for saving the man, for the most part founded on a total ignorance of the gigantic force of the torrent, which rendered any plan that involved hauling or dragging through the water utterly useless, inasinuch on the ways Gov. Digier has seen re-nomination. They will not permit converge ever could have had of itself, for such a policy ever could have had of itself, for such a policy anything but a mangled and shapeless corpse to reach the bridge or shore, even if it had atream at all. The man had now been six- which are the structure configurations and to this country, from their unhappy England, upon the rights of the ir consciences? What of timber. The traveller, whiched along in the teen nours on the log. One poar had been typolice and desired countries and is a most perfect illustration of this truth, would not do the Presbyterians the Baptists, cars, will see nothing of this beautiful work, round the log, and it was terrible to witness to detach the rope; but the strain upon the boat rendered it impossible. These on the bridge who were exerting themselves to save editors, with rifles at thirty pages, but without the man reluctantly gave mealt hope of doing. the man reluctantly gave up all hope of doi anything with the boat, and, having made a piece of timber attached, now turned all their efforts to the launching of a raft—his last faint chance of salvation from the fate that await-

This raft consisted of two large beams of wood, united by planks nailed across, and on one end of it was lashed a barrel; the other was provided with ropes, crossed in various directions, to enable the man to lash himself to the raft by getting under them, and a small tin case containing spirits and food. The raft. it touched the water before those above let go their hold, and it was with great rapidity carried down in the direction of the victim.-But now occurred, perhaps, the most melanlitterally torn through the hands of some twenty men who were holding it, notwithstanding all bleeding from the passage of the rope. on the log had been repeatedly in and out of ed a decline in breadstuffs. the boat, and continued to make desperate efforts to release the rope from the log. He 'still appeared capable of considerable exertion. After great delay, and some discussion on the bridge as to the measures to be adopted, a second raft was prepared, and another life-bost which had arrived from Buffalo was mounted upon it, and thus secured from being swamped as the preceding boats had been.— This second raft was let down the rapids in the same way as the first, and by about six are of thrilling interest. o'clock the man succeeded in getting upon it. O'clock the man succeeded in getting upon it.

A universal shout of triumph arose from the crowd upon the shore and bridge. All waved the Lackawanna and Western Railroad, near less Kings to their tombs.—have overturned couragement. Alas! the next moment the raft struck against a rock, and at the moment few minutes inter to raise himself to his full imagined to be the words Good bye, but ly. which was probably a mere inarticulte cry of for the first time the men who had been working like lions all day long beneath a burning

tion of the press has been engaged in discusstry, which should redound finally to their own thus accomplish certain political punishments which they judged that particular sect to mer-

-Such men are never wanting-they may be found overywhere. Alarmists in the strictest sense, their volatile characters enable them to seize upon all subjects,-to make themselves the saints of earth, or the sinners of perdition,-angels of light, or demons of darkthe ness,-the rebukers of sin, or the workers of ounty, wishing to bay for the DEMO- its iniquity, in short, anything and every-transported Blanks, or get Job Work thing asseire umstances may seem to demand. GREAT only mat they can best keep in agitation the great public mind, and gather some treasure from the wrecks strown about upon the surface of fix turbulent waters.

-In a large majority of instances the efforts of such men end in splendid failures. The public mind, in this country, cannot be kept in perpetual excitement. Our institutions, our climate, our people, constitutionally sober, all forbid success to selfish, sinister and fanatical zealots. But occasionally, they strike the public pulse aright, some extraneous circumstances perhaps aiding at the time,-and the dire efforts of their work are then seen in great public outbreaks, in popular disturbances and revolutionary movements.

-All past history admonishes us, that the most dangerous cord, the most sensitive nerve rnnning through the body of any government or community, is that of Religion. No matter what may be the tenets, formulas, or faith of any particular sect, there is one great nerve from priest to layman, from layman to layman, and from heart to heart again, which, when touched, thrills the whole body like an electric shock, -it rises volcanie and terrible, it fears no fate, it recks no consequences, for how can man better die-

The last the

Since our last visit an addition has been made to the United States department which attracts a large share of attention. This is a large painting, representing Liberty in the act miration in unqualified terms, notwithstanding of crowning a bust of Washington with a lauits present incomplete condition in conse-quence of continued receipt of goods which arto some other department, but this is considered the most appropriate place for it. The painting may be seen on the front of the galcorner of the west and north naves. Large additions have been made to the works of art in bronze, among which the group representing a Shehperd attacked by a Leopard is particularly deserving of notice. It is full of spirit, and has many excellent points about it with very few defects. The chief fault we find in it is that the whole group is not high enough for its length. However, this is a defect that will be overlooked by the public .-This statue may be seen in the north paye. Among the specimens of their handicraft

and skill which are on exhibition at the Crystal Palace. from the manufactory of Ames & Co., at Chicopec, Mass, is a sword prepared lished officer, Col. Thayer, of the Engineer one side of the scabbard is this inscription:-

His first class of 1124 TENT 1817 Graduate of 1820-21-22. to COL SYLVANUS THAYER. CORPS OF EXCINEERS.

superintendent of the U.S. Military Academy. West Point, 1817-1833.

On the reverse side, within a wreath which eats the names of vall the survivors, viz :-Baker, La.; Walker, U. S. A.; Donelson, Tena. Courtenay, University of Va.; Dimmock, Va. or the Exhibition is on account of the Directors feeling anxious to give every opportunity and indiana; Allston, S. C.; Scott, U. S. A.; Morof showing to advantage the working of the different machines, have caused to be creeted U. S. A.; Wheeler, Mo.; Mansfield, U. S. A.; S. A.;—is the following:—
"Tho' some have fallen.

operation of each machine by those interested. Their memories still live in the Breasts of those who survive. Who offer for all this token of grateful re-

The surviveng members of this original class eleven in 1821, and four in 1822-determined eight months ago, to have a social reunion, on eral and ornamental design. The rush of vis classic ground, this summer, of as many a itors on the return of the Gothamites to town could assemble together, and to present

The proposed reunion took place at West Point on the 13th inst. The individual memas to their own condition and prospects, and interchanging information as to the universal Each faction complains of receiving less of the feelings and the various fortunes of their absent spoils than the other, and from the great num- comrades, adopted this sword as an appropr tender the same to their former impartial and

Shortly after the invention of powder, men found it necessary to use this explosive mate

ployed, were used in the battle of Crest, in believed to have been more than large bland drbusses. The first cannons were made ood, around which a good many layers of Dwyer, Consul at Masambique.

The Picagune at New Orleans has received In the latter part of the 14th century a conadvices from Santa Fe, New Mexico, to the position of copper and tin was introduced with June.

An order had been received by the Mexican Sweden, used in the Thirty Year's War, can hoops and leather, two of which are still to be seen at the arsenal in Berlin. They are cal-

By the last advices from Europe the Eastern question still remained unsattled with every prospect of its continued and the Califor with his vassals. Men have always been entered and the continued and the contin guns, percussion and needle guns.

The first guns were fired with matches, it

grievances, and completely routed his argument. It is pronounced a very able paper.—
The Collins steamer is due this evening or tomorrow morning, by which we may learn
the look consists of a hammer, which holds
whether there is to be war or not.

Market quotations are uncertain. The advices by the Franklin has caused a considerable idvance in breadstance, and on receiptiof
