

Montrose Democrat.

THE LARGEST CIRCULATION IN NORTHERN PENNSYLVANIA.

E. B. CHASE & ALVIN DAY, Editors.

Montrose, March 30, 1853.

NOBLEMAN.

The noble man I know on earth,
Are men whose hands are brown with toil,
We bickered by no ancestral grave,
How down the woodsy bank the soil,
With the wife a tender mate,
That suffering king, or warrior's name.

The working men! what's the task,
To carve the stone, or beat the hod,
They lay upon their honest bane,
The royal stamp'd soul of God,
And brighter are the drops of sweat,
Than diamonds in a corset.

Holiness and Vice.

Young men, beware of idleness. Accustom the mind to habits of regular labor. Fix the attention upon a course of usefulness to yourself and others. Awaken within yourself an interest for the accomplishment of a purpose. Cultivate a habit of patient endurance. Let it be your desire to secure the approbation of the wise and good. Link yourself to those who are doing something in the world, and who compose the frame work of society, and let your motto be determination, activity, and perseverance. Sit down, calmly, while you are young, and look over the ground, and get a clear view of what is before you. Then lay your foundation and go to work.

What is the difference between one who begins life in earnest in this manner, and another who lives away all the precious time of preparation? The one starts strong and vigorous from the grand work of life; the other commences feebly; nuns one stroke here and then lays down his tools, and don't know when he will take them up again. The one exerts an influence throughout the community in which he lives, and his name is honored, and will be handed down to posterity as one identified with his country's progress in all that is good and great; the other is unknown except to those to whom he is a burden—he is fit to no use as a member of society, or to his own family, and when he passes away his name will be forgotten by all but those who connected with him by the ties of nature, will perhaps, long feel sad at the recollection of the fact, "he died at the foot death." It seems surprising that two such beings can belong to the same species. And yet this is the natural consequence of starting in the two different directions. We often see such widely different careers diverging from almost the same point. The same family will be able to rejoice over one son who has realized the expectations of friends, and is pursuing an honorable career, and on the other hand will be called to mourn over another who is bringing his parents to shame.

It is true, too, that every young man has all the masters in his own hands. Each has the power to turn his feet from the path of the foolish and seek for true honor. We are more and more fearfully impressed with the fact that every man has the power of control over his own destiny, except in cases of absolute ignorance of the way of improvement. Young man, look about you. Inquire what you are doing, and what you ought to do. Let it not be said that you are

"fixed like plant, to one peculiar spot,
To draw nutrition, propagate, and rot."

If you have been dreaming away your life, wake up and take a new start. It is not too late. You can yet make your mark upon the world. These are stirring times, and though we do not, with some, think the world on the high road to perfection, yet we do know that this is an age of wonders, an age of progress, and who offers an opportunity, for every man who wants to work, which has never been offered before. *Ad Temp. Union.*

WORK! WORK!

I have seen kind hearted people who thought it beneath them to work—to employ themselves industriously at some useful labor. Beneath them to work! Why, work is the greatest motto of life, and he who accomplishes the most by his industry, is the most truly great man. And he is the most distinguished man among his followers, too. And the man who forgets his duty forbids his fellow creatures and his God—whoever forgets the great blessing of life as to allow his energies to stagnate in inactivity and uselessness, and better die, says Hor. Writ. "He that will not, neither shall he eat." An idler is a cumberer of the ground; a weary curse to himself as well as those around him.

Beneath human beings to work! Why, what but the continual history that brings forth the impotency that never allows him to be contented with any attainment he may have effected—what but this raises man above the brute of creation, and under Providence, surrounds him with comforts, luxuries and refinements, physical, moral, and intellectual blessedness. The great orator, the great poet, and the great scholar, are great workmen. The vocation infinitely more laborious than that of handcraftsmen, and the student's life has more anxiety than that of any other man. And all without the presence, the attention to real industry, can never succeed.

Hence the number of mere pretensions to scholarship, or those who have not the strength and industry to be real scholars, but stop half way, and are not smothered, a shame to the profession!

Beneath human beings to work! Look in the artist's studio, the poet's garret, where the genius of immortality steals ready to seal his work with an unerasable signet, and there you will only see industry standing by her side.

Beneath human beings to work! Why, I had rather that a child of mine should be born, regularly at the lowest, meanest employment, than to waste its time, body, mind and soul, in folly, idleness and uselessness. Better to wear out in a year than to rust out in a century.

Beneath human beings to work! What big work has filled our fields, clothed our bodies, built our houses, raised our churches, printed newspapers, cultivated our minds and souls, worked out your own salvation, —sustained the spirit of the Genius.

Doris or Lulu—Some wife, incorporate the following organizing elements of life: "For ever, and to my last days, if they can, Every man ought to help his neighbor—if he can." Every man and woman ought to be numbered of his care. Every wife should please her husband if she can. Every wife should sometimes hold his tongue—if she can. Every father should sometimes tell the truth—if he can. Every one should take a walk, per se, every day—if he can.

What an argument in favor of social connection in the other classes, that by communicating our grief we have less, and by communicating our pleasure we have more.

The Dying Wife.

By EVA.

Yes, she is dying! Her physician has just pronounced the solemn words, and yet she sleeps so quietly. A smile like that of infant occasionally passes over her downy cheek. Her breathing is easy and regular, except a little shorter, and she looks so pleasant you cannot believe her dying. Oh! how earnestly you beseech the God of life to spare your loving and lovely companion. How tenderly you press her to your heart, like some tender mother would her sleeping infant! How passionately you press your lips to her cold brow, and think the sweet seasons you have passed with her. Memory recalls the time when, with a trembling voice she whispered that your love was all returned; and how true she has ever been to that love. Yet you recollect how happy and trusting she looked into your face when you first pronounced the words "my wife?" You remember, too, when you come in tired and weary, her tender smile, her uplifted eyes, full of love and sympathy were upon you! How willingly she ministered to all your wants, and in her own cheerful way soon made you forget the tumults of life.

O Memory, be quiet! And yet there is a sound pleasure in such thoughts, for you know that to that confiding creature you were interested for the accomplishment of a purpose. Cultivate a habit of patient endurance. Let it be your desire to secure the approbation of the wise and good. Link yourself to those who are doing something in the world, and who compose the frame work of society, and let your motto be determination, activity, and perseverance. Sit down, calmly, while you are young, and look over the ground, and get a clear view of what is before you. Then lay your foundation and go to work.

What is the difference between one who begins life in earnest in this manner, and another who lives away all the precious time of preparation?

The one starts strong and vigorous from the grand work of life; the other commences feebly; nuns one stroke here and then lays down his tools, and don't know when he will take them up again.

The one exerts an influence throughout the community in which he lives, and his name is honored, and will be handed down to posterity as one identified with his country's progress in all that is good and great; the other is unknown except to those to whom he is a burden—he is fit to no use as a member of society, or to his own family, and when he passes away his name will be forgotten by all but those who connected with him by the ties of nature, will perhaps, long feel sad at the recollection of the fact, "he died at the foot death."

It seems surprising that two such beings can belong to the same species. And yet this is the natural consequence of starting in the two different directions. We often see such widely different careers diverging from almost the same point. The same family will be able to rejoice over one son who has realized the expectations of friends, and is pursuing an honorable career, and on the other hand will be called to mourn over another who is bringing his parents to shame.

It is true, too, that every young man has all the masters in his own hands. Each has the power to turn his feet from the path of the foolish and seek for true honor. We are more and more fearfully impressed with the fact that every man has the power of control over his own destiny, except in cases of absolute ignorance of the way of improvement.

Young man, look about you. Inquire what you are doing, and what you ought to do. Let it not be said that you are
