

Agriculture.

AGRICULTURAL DIVISION OF THE PATENT OFFICE.—Production of New Varieties of Sweet Potatoes from Seed.—A gentleman of Ipswich Massachusetts, has written to the Commissioner of Patents, requesting to be furnished with seed of the common sweet potato, for the purpose of cultivating them in a green-house, and obtaining new varieties.

It is clearly to be seen in this country, because, so far as is ascertained, this plant will not flower here. The same is true with respect to the potato, although some species, such as the red or pink-colored from the East Indies and the islands of the Pacific, have been brought to perfect maturity in France, and new varieties have been obtained from their seed. Potatoes of this kind will flower in Cebs and in the Southern States. It is desirable to obtain the seeds of such species of the sweet potatoes as can be brought to maturity in southern latitudes.

Coal Ashes.—If farmers who reside in the coal regions have not tried the benefit of coal ashes on their cherry trees the sooner they do so the better. It reflects well when a boy, of carrying the coal ashes from the grate and piling them around a tree, which was known by all the family, as the "little orphan," on account of its sprouting from the roots of an old tree which had died, and the peculiar hard time it had in endeavoring to reach the stature of even a bush. The summer after the coal ashes were deposited around its base it put forth vigorous and in three years was quite a thrifty tree, heavily laden with delicious fruit. My father seeing the good results of the ashes, a wagon load was thrown around the base of each tree on the farm, and the effect was astonishing. Old trees that were fast decaying were resuscitated, and sent forth new branches, and bore fruit abundantly.—Let those who have coal ashes test its virtues upon fruit trees.

Delaware, Ind., 1855.

Japan Peas.—I bought from an extortioner this spring a few seeds of this new variety of pea a cent apiece. I planted them, knowing nothing of their habit, but supposing it akin to our common pea. I found it very different. It grows up a single, strong stalk from three to four feet high putting out branches like a tree. These branches at the end of the season become profusely laden with downy pods, about one and a half inches in length, containing two or three peas, resembling very much our common pea, but which when boiled, changes in appearance entirely, becoming exactly like a small buff pea. This pea will work its way, I believe, into extensive favor. It is exceedingly productive in an excellent winter food for man, and no doubt for animals also; it is easily cultivated; it hard, and grows on both poor and rich soil. I planted mine in the beginning of May which, I believe, is the best time, ripening with the early frost, in rows three feet apart, one foot between each seed.

Education Needs.—The following actual dialogue occurred in a Court, in a State not two thousand miles from New England. A quack doctor of the Thompsonian order was called to the stand as a witness, and after he had testified to the having made a night visit, the Prosecuting Attorney began the cross examination thus: "Mr. Doctor, to what school of practice do you belong?"

"I don't belong to any school. I never went to any school in my life, I thank you."

"But that is not quite what I want to know. I mean to what school of medicine do you belong?"

"I tell you sir, I never went to any school of medicine, or practice, or anything else—I am a seventh son, sir, and didn't need to go to school."

"Well, well, what system of medicine do you practice? That is, what kind of medicine do you give?"

"Oh, that's what you want, is it? Why I give the Britanic medicine always, and every where."

"The Britanic? You mean the Botanic system, don't you?"

"No, sir, the Britanic. Yes."

"Now will you tell me how much you charge for a nocturnal visit?"

"Sir, (very indignantly,) I don't give any such medicine. I practice, as I told you to the Britanic system, and I'll have you and this Court to understand I don't give any such medicine as that horrid stuff."

"No more questions were asked.—R. I. Scholmaster.

Mr. FRENCHMAN WITH PLAINS.—A Farmer, in the County of Gloucester, offers the following remedy for preventing grass and mice from destroying young fruit-trees. "Take tin or sheet-iron, bent round like a store-pipe six or eight inches long, not soldered or fastened together, so that the sides slip by each other on top over, so that the tree grows it can expand; then spring apart and set it round the bottom of the tree, one end crowded a little into the ground; fill it up with powdered charcoal. Be sure to have no grubs in when the charcoal is applied. This, I think, will be a sure preventive."

It is an open question with farmers, whether it is best to have a drain running from the barn-yard into the road.

SALAMANDER SAFES.

EVANS & WATSON, No. 36 South Fourth St., Philad. GRAY & PIRNIE, 15, 15, 15, & FIFTH St., Friday morning, December 15th, 1854. Evans & Watson's Salamander Safe is triumphant, as they always are when put to the test.

Mr. Evans & Watson, No. 36 South Fourth St., Philadelphia. GENTLEMEN—We take much pleasure in recommending your Salamander Safe to Merchants and others in want of a secure means of preserving their books, papers, &c., from fire, as the one we purchased from you about seven months since has preserved our books, and is in as good a condition as when we put it into it, & has done the great fire which destroyed the entire block of buildings on Chestnut and Fifth streets. The box was in our office, on the second floor of our building, from which place it fell into the cellar and remained there until the fire was out. The Safe was then removed and opened in the presence of about 1000 persons, and the contents were found to be in perfect condition. Will you please have the Safe and Lock repaired as we intend to put it in use again, having perfect confidence in its fire-proof qualities.

Yours respectfully, LACY & PHILLIPS.

Evans and Watson take pleasure in referring to the following, among the many hundreds who have their safes in use: P. & M. Philad.; Farmers and Mechanics Bank, Philad.; Samuel Albert, Esq., High Sheriff Phila.; John N. Henderson, City Controller; Caleb Cope & Co., No. 183 Market St.; R. B. Lister, Esq., Esplanade; Charles Sharpless Bro., No. 32 South 2d St.; James, Kent and Santee, No. 141 North Third St.; W. H. Hoffman and Sons, No. 31 North 3d St.; Smith, Williams & Co., No. 87 Market St.; J. & B. Orne, No. 185 Chestnut St.

A large assortment of the above Safes is always on hand (warranted to stand 1000 lbs. more fire) and Evans & Watson's Salamander Safe is in use by EVANS & WATSON, Patent Safe Locks, &c., Please give us your order, at No. 36 South Fourth St., Philadelphia—151
