AUTUMN AND WINTER CARE

CARE OF SHEEP. The following timely notes on this subject, communicated to the New York Chronicle, by Gen. R. Harmon, of Wheatland, may be read with profit:

"Much depends in successfully managing sheep upon keeping them divided into lots of least one-fourth their value. My method of the same age or condition. Lambs and small yearlings should be by themselves for several weeks before they are brought to the them clean, but to save all, I throw all they barn to mintered and every day filled with I hose cows which are in milk, are fed a slop mill-feed or oats, in the proportion of one peck to fifty lambs, and they should be furnished with salt twice a week. They should be made so tame that they will come and eat spring bag, when they are fed once a day, the out of a dish or out of your hand. Lambs are more easily made tame than older sheep. The tamer they are, the easier they are kept,

"At this season of the year the grass has lost some of its nutriment, and lambs will not keep in good condition without some extra attention; and if they come to the barn thin in flesh, and we then begin to feed them on graingit will be very apt to bring on the scours; and if that disease once takes hold of a flock of lambs, it will prove fatal to many of them.

For winter management there is a differeace of opinion as to how much space they should occupy. I have found my lambs do carefully dried and well greased to prevent best when they cover one hird of the yard or rusting. Rust is a viper which poisons the shed. Lambs should be fed under cover, and farmer's purse; many farmers allow their never suffered to be out in any storm : moist plows, harrows and cultivators to rust and andw or rain is very injurious to them. Lambs rot in the corners of open, damp sheds, that are housed through the winter will give surprised that their implements do not last one-quarter more wool with the same amount longer. All farm implements, after having of feed. A trough and rack combined for been used during spring, summer and fall, feeding, I have found most convenient, so that hay, grain, and roots may be fed out in the same place. Lambs of the merino stock should be so wintered that the average weight of flecce should be five pounds, and the farmer whose lambs come short of that, should improve his stock or feed. If lambs are left to suffer the first year of their growth, it is hard to overcome the loss in after years.-When they are kept housed they should be furnished with fresh litter every day; in so doing, they will be kept clean and healthy, measure; for here we use the Winchester and make more and better manure than when bushel, which contains, 2,150 42-100 cubic left to run in an open yard.

legs, for a rack twelve or fourteen feet long; bushels are about equal to 33 of ours. scautling, three inches square, twenty-two | The following are commercial weights of hads between the sticks on each side of the pecks. rick, and eat without crowding each other or getting into the trough. These racks will 196 pounds; powder, 250 pounds; cider, and more than pay their cost in a single winter. other liquids, 30 gallons; corn, 5 bushels, of all the various contrivances for sheep-feed- shelled. By this latter measure crops are ing that I have ever seen, these are the most estimated, and corn bought and sold throughconvenient and easily made. They are light out most of the Southern and Western States. and readily moved from one place to another, At New Orleans, a barrel of corn is a flour and a yard can be quickly supplied with a barrel full of ears. In some parts of the West rack of this kind. For feeding bucks or horn- it is common to count a hundred ears for a ed sheep, the sticks will not be used. A bushel. board at each end, raised about twenty inches, and another in the centre with a parrow board laid on, will keep the sheep from getting in the trough.

- "The farmer who lets his sheep run in the open yard, and scatters their food on the ground, or in the mud, to be trodden under foot before it is half eaten, and shears two to three and a half pounds of wool from each sheep, may say that sheep keeping is poor sheep, may say that sheep keeping is poor earth, 95 pounds; compact soil, 124; a Tea, choice kinds, from 2s. 9c. to 6s. per lb. sent themselves each day; each day we are suspenses, and will not pay; but if sheep are strong or clayer soil, 127; pure clay, 135; Sugar now at 9 cts. Best Coffee 11 1-2cts., more anxious to provided for, there is no stock that will pay better for the amount of food consumed, and the attention given."

COWS FOR THE DAIRY.

There are certain points in a milker, that can hardly be mistaken. She should be descended from the best milking stock; her but is put up in different States varying from head should be small, of medium size, muzzle 280 to 720. fine, and nostrils expanded and flexible; face long, slender and dishing; cheeks thin; eyes full, mild and prominent; horns delicate and waxy, and they may be either branching, lopped, crumpley or hornless; long, thin, lively, thin and small at its junction with the head; deep chest, but not heavy before; back level deep yellow; and a fine thick coat of glossy hair; and she must be of a good disposition, and perfectly free from tricks.

Yet, with all the skill of a weel-practised taste in the selection of animals, the dairyman will frequently find his theories and results at sad variance. One may sometimes the shoulder blade; say the girth is 6 feet 4 Cornelian Rings, Tops, Clarionettes, Accordeselect a fine animal, with every appearance of inches, and the length 5 feet 3 inches, on, Harmonicons, Harps, and many curious good milking qualities, which is but a medi- which multiplied together, gives 31 feet. um cow at the pail; another, that hardly reems worthy of notice, and which sets at defiance many established milking points, and while yielding, and when dry, in turning all she consumes into valuable meat.—Arator.

Suggestion of the foot of the foot of the foot of the foot of

WINTERING COWS. Somebedy has made the following excelent suggestion, which we recommend to the pecial notice of our farmer friends. At all events it is worth a trial.

"If I were to have come wintered just to my liking, they should be fed on corn stalks, and, if profit were consulted, these, by all means, should first run through a stalk cutter. This in my estimation, is a saving of at ket full of chopped stalks, they will not eat of buckwheat bran, night and morning; those not yet come in are given two or three ears of coin at each feeding until they begin to same as the cows which are milked. In this way cows may be kept in a thriving condition and I believe a yield of milk and butter can be better obtained than from any other mode of feeding."

A warm stable, plenty of litter, and daily carding of cattle is true economy.

TAKING CARE OF FARM IMPLEMENTS.

Every iarmer should have a house for keep ing his implements. It should be tight and dry, and adapted for repairing, cleaning and sharpening them. Every implement, when not required for use, should have its proper place, and before it is laid past for winter. during six months of the year, and they seem should have their wood-work painted, and also their coarse metal work; and every bolt and nut should be oiled. The loss of an ounce of iron by rust, is equal to the loss of an ounce of gold. Carefulness in all things is economy, and a little extra trouble saves extra ex-

CATHARTIC PILLS OPERATE by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action. They remove the obstructions of the stomach, bowels, liver, and other contractions of the stomach, bowels, liver, and the contractions of the stomach, bowels, liver, and the contractions of the stomach, bowels, liver, and the contractions of the stomach and the contractions of the stomach and th

obstructions of the stomach, bowels, liver, and other obstructions of the stomach, bowels, liver, and other organs of the body, and by light causes of disease. An extensive trial of their virtues, by Professors, Physicians, and Patients, has shown cures of dangerous diseases almost beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of antruth Their certificates are published in my American Almanac, which the Agents below named are pleased to furnish free to all inquiring.

Annexed we give Directions for their use in the complaints which they have been found to cure. For Costiveness.—Take one or two Pills, or such quantity as to gently move the bowels. Cos-

FOR COSTIVENESS.—Take one or two Pills, or such quantity as to gently move the bowels. Costiveness is frequently the aggravating cause of Piles, and the cure of one complaint is the cure of both. No person can feel well while under a costive habit of body. Hence it should be, as it can be, promptly relieved.

FOR DYSPETSIA, which is sometimes the cause of Costiveness, and always uncomfortable, take mild doses—from one to four—to stimulate the atomach and liver into healthy action. They will do it, and the hearthurn, bodyburn, and soulburn of dyspepsia will rapidly disappear. When it has gone, don't forget what cured you.

For a Four Stomach, or Morbid Inaction of the Bowels, which produces general depression of the

forget what cured you.

For a Poul Stonach, or Morbid Inaction of the Bowels, which produces general depression of the spirits and bad health, take from four to eight Pills at first, and smaller doses afterwards, until activity and strength is restored to the system.

For Nervousness, Sick Headacher, Nausea, Pain in the Stomach, Back, or Side, take from four to eight pills on going to bed. If they do not operate sufficiently, take more the next day until they do. Those complaints will be swept out from the system. Don't wear these and their kindred disorders became your stomach is foul.

For Scrofula, Errstfrelas, and all Diseases of the Skin, take the Pills freely and frequently, to keep the bowels open. The cruptions will generally soon begin to diminish and disappear. Many dreadful ulcers and sores have been healed up by the purging and purifying effect of these Pills, and some disgusting diseases which seemed to saturate the whole system have completely yielded to their influence, leaving the sufferer in perfect health. Patients! your duty to society forbids that you should parade yourself around the world covered with pimples, blotches, ulcers, sores, and all or any of the unclean diseases of the skin, because your system wants cleansing.

of the unclean diseases of the skin, because your system wants cleansing.

To Puhiff the Blood, they are the best medicine ever discovered. They should be taken freely and frequently, and the impurities which sow the seeds of incurable diseases will be swept out of the system like chaff before the wind. By this property they do as much good in preventing sickness as by the remarkable cures which they are making everywhere.

Liver Complaint, Jaundice, and all Bilious Affections arise from some derangement—either torpidity, congestion, or obstructions of the Liver. Torpidity and congestion vitiate the bile and render it unfit for digestion. This is disastrous to the health, and the constitution is frequently undermined by no other cause. Indigestion is the symptom. Obstruction of the duct which empties the bile into the stomach causes the bile to overflow into the blood. This produces Jaundice, with a long and dangerous train of evils. Costiveness, or alternately costiveness and diarrhea, prevails. Feverish symptoms, languor, low spirits, weariness, restlessness, and melancholy, with sometimes inability to sleep, and sometimes great drowsiness; sometimes there is severe pain in the side; the skin and the white of the eyes become a greenish yellow; the stomach acid; the bowels sore to the touch; the whole system irritable, with a tendency to fever, which may turn to bilious fever, bilious colic, bilious diarrhea, dysentery, &c. A medium dose of three or four Pills taken at night, followed by two or three in the morning, and repeated a few days, will remove the cause of all these troubles. It is wicked to suffer such pains when you can cure them for 25 cents. LIVER COMPLAINT, JAUNDICE, and all Bilious

the cause of all these troubles. It is wicked to suffer such pains when you can cure them for 25 cents. Rheumatism, Gour, and all Inflammatory Ferers are rapidly cured by the purifying effects of these Pills upon the blood and the stimulus which they afford to the vital principle of Life. For these and all kindred complaints they should be taken in mild doses, to move the bowels gently, but freely. As a DINNER PILL, this is both agreeable and useful. No Pill can be made more pleasant to take, and certainly none has been made more effectual to the purpose for which a dinner pill is employed. PREPARED BY
