Important Discovery. CONSUMPTION, and all diseases of the LUNGS and THROAT are positively curable by INHALATION, which conveys the remedie to the cavities in the lungs through the air passes ges, and coming in direct contact with the disease neutralizes the tubercular matter, allays the cough causes a free and easy expectoration, heals the lange, purifies the blood, imparts renewed vitality to the nessous system, giving that energy so indispensable for the restoration of the health. To be able to state confidently that Consumption is curable by Inhalation, is to me a source of unalloyed pleasure. It is as much under the contro of medical treatment as any other formidable disease; 90 out of 100 cases can be cured in the 1st stages, and 50 pr ct. in the 2nd: but in the 3rd stage it is impossible to save more than 5 pr ct. for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, INHALATION affords relief to the last stages, INIALATION affords relief to the suffering attending this fearful scourge, which annually destroys 95,000 persons in the U.S. alone; Expenses. Salaries and generate calculation shows that text the salaries and and a correct calculation shows that of the present population of the earth, 80,000,000 are destined

to fill the consumptive's graves.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but sweeps off alike the brave the beautiful, graceful and gifted. By the help of the Supreme Being from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption.

The first cause of tubercles is from impure blood, and the immediate effect produced by their deposition in the lungs is to prevent the free admisosition in the lungs is to prevent the free admission of air into the air cells, which causes a weak-Stocks, Collaterals, on ened vitality thro' the entire system. Thus, Inhalation is a local remedy, nevertheless | Deferred Payments on it acts constitutionally, and with more power and certainty than remedies administered through the stomach. To prove the powerful and direct form inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous sys tem, so that a limb may be amputated without the slightest pain: inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of ammonia will arouse the system when fainting or apparently dead. The ed. or of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convineing proof of the constitutional effects of inhala tion, is the feet that sickidess is always produced by breathing foul air-is not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs should produce the happlest result? During 18 years practice, many thousands suffering from diseases of the lungs and throat, have been under my care and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that Consumption is no longer a fatal disease. My treat ment of Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tabercles, etc., enables me to distinguish, readily, the various forms of disease that simulate Consumption, and apply the proper remedies, rarely being mistaken even it a single case. This familiarity, in connection with cortain Pathological and microscopic discoveries, enables me to relieve the fungs from the effects of contracted chests, to enlarge the chest purify the blood, impart to it renewed vitality, giving energy and tone to the

The mainines are pleasant without odor, causing no sickness, and free from mercury or balsam. During 20 years of practice I have rescued from the jaws of Death many thou sands, who in the last stages of the above, mentioned diseases had been given up to die by their physicians, which warrants me in promising to the afflicted, who place themselves under my care, a perfect and most speedy cure. Secret dis eases are the greatest enemies to health, as they as they are the first cause of Consumption, Scrofula, and many other diseases, and ought to be a terror to the human family. As a permanent cure is scarcely ever effected, a majority of the cases fal ling into the hands of incompetent persons, who not only fail to cure, the diseases, but ruin the constitution, filling the system with mercury, which, with the disease, hastens the sufferer into a rapid consumption.

But should the disease and the treatment not cause death speedily, and the victim marries, the disease is entaited upon the children, who are born with feeble constitutions, and the current of life corrupted by a virus which betravs.it-off in and consigning them to an early grave.

# FARMERS!

Ever Invented. THE undersigned is now prepared to furnish L to FARMERS, Millers and others the world renowned Excelsior Corn Sheller-the wonder of the times—being the best, most durable, and easiest running Sheller now in use. Warranted to shell more corn in a shorter space of time than any other machine, entirely cleaning the ear, from end to end, without crushing either

The Machines are constructed with fwo cranks, and pully for a belt, so that two persons can turn them, or attach a belt in motion by any power. The attention of persons owning milis, is solicited, as the Machines are wonderfully adapted to any kind of power. They are very easily turned, and when once in motion a small boy can turn them; they are capable of shelling one bushel per minute-every Farmer should have one—as they save their cost, in

les than one seasons.

They are on exhibition at Searle's Hotel, Sayre's Foundry, Elv's Mill in Brooklyn, and at Lathrop's Lake Mills, where they can be seen in operation at any time. All orders addressed to the undersigned, will receive prompt attention. Machines shipped at a distance and warranted to operate. D. D. SEARLE.

We need not speak to the public of its virtues. Throughout every town, and almost every hamilet of the American Etates, its wonderful cures of pulmonary complaints have made it already known. Nay, 6-w are the families in any civilized country on this continent without some personal experience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the subtle and dangerous diseases of the throat and lungs. While it is the most powerful antidote yet known to man for the formidable and dangerous diseases of the pulmonary organs, it is also the pleasantest and safest remedy that can be employed for infants and young persons. Parents should have it in store against the insidious enemy that steads upon them unprepared. We have abundant grounds to believe the Cherry Precorate saves more lives by the consumptions it prevents than those it cures. Keep it by you, and cure your colds while they are curable, nor neglect them until no human skill can master the inexorable canker that, fastened on the vitals, eats your life away. All know the dreadful fatality of lung disorders, and as they know too the virtues of this remedy, we need not do more than to assure them it is still made the best it can be. We spare no cost, no care, no toil to produce it the most perfect possible, and thus afford those who rely on it the best agent which our skill can furnish for their cure.
